Love and the Novel G. Paizis,1998-09-07 The popularity of romance fiction is such that it constitutes nearly one quarter of new paperback fiction printed in the world Its success depends on its ability to reflect and articulate the reader s aspirations for a better life and stands at the same time as a testament to her alienation This fresh look at the romantic fiction seeks to discover the reason for its appeal by combining analysis of the poetics of the genre with a study of the real reader s intervention **Women and Men in Love** Luisa Passerini,2012-07 It has often been assumed that Europeans invented and had the exclusive monopoly over courtly and romantic love commonly considered to be the highest form of relations between men and women This view was particularly prevalent between 1770 and the mid twentieth century but was challenged in the 1960s when romantic love came to be seen as a universal sentiment that can be found in all cultures in the world However there remains the historical problem that the Europeans used this concept of love as a fundamental part of their self image over a long period traces of it still remain and it became very much caught up in the concept of marriage This book challenges the underlying Eurocentrism of this notion while exploring in a more general sense the connection between identity and emotions *Women and Men in Love* Anthony Edward Waine,2007 It has often been assumed that Europeans invented and had the exclusive monopoly over courtly and romantic love commonly considered to be the highest form of relations between men and women This view was particularly prevalent between 1770 and the mid twentieth century but was challenged in the 1960s when romantic love came to be seen as a universal sentiment that can be found in all cultures in the world However there remains the historical problem that the Europeans used this concept of love as a fundamental part of their self image over a long period traces of it still remain and it became very much caught up in the concept of marriage This book challenges the underlying Eurocentrism of this notion while exploring in a more general sense the connection between identity and emotions , *La Sagesse angélique sur le divin amour et sur la divine sagesse ... French Orientalism Desmond Hosford, Chong J. Wojtkowski, 2010-07-12 In 1798 Napoléon I launched his Egyptian Campaign and opened what has become recognized as the canonic period of French Orientalism which extends from the late eighteenth through the early twentieth century As defined by Edward W. Said Orientalism 1978 Orientalism is intrinsically Eurocentric and places the Orient in opposition to the European West as the quintessentially foreign Other In this sense the Occident supposedly defines itself by gazing at the East as its inverse image and purportedly asserts a geopolitical dominance materially confirmed through imperialism and colonization Although Europe may cast the Orient as the archetypal Other this necessarily entails deep conflict since the Orient is also frequently posited as the source of Western civilization which prohibits the articulation of a complete separation between Europe and the Orient Nevertheless according to French Orientalist discourse the East had fallen into barbarism inertia and languished awaiting the mission civilisatrice by which France undertook a heroic project of universal enlightenment The canonic approach to Orientalism has drawn much criticism which calls for re-examining the notion of French Orientalism broadening the scope of enquiry and exploring the history and ideological strategies behind French formulations of the Orient from the Middle Ages through the twenty-first century Such an expanded field of investigation reveals that the canonic Orientalist paradigm is not universally applicable particularly regarding material from before the late eighteenth century New theoretical literary historical philosophical and cultural perspectives provide the opportunity to deploy question subvert and resituate canonic Orientalist theories revealing the continuing evolution and relevance of French Orientalism as a notion with global stakes and material consequences

Because of its broad scope and variety of theoretical approaches this volume will interest scholars and students from a wide spectrum of disciplines including literature gender studies history theater art history music cinema and cultural studies

Modern Retellings of Chivalric Texts Gloria Allaire, 2018-12-21 Published in 1999 the ten essays in this collection identify and examine reworkings of identifiable source texts from the medieval or Renaissance periods The reasons for the modern adaptations depend variously on an individual author's personal perspectives the worldview of his or her society and the individual's place in it The various chapters therefore address issues such as why a particular model was chosen and how its retelling depends on the modern author's misreading or rereading of medieval chivalric conventions This book complements numerous existing studies of medievalism in the Enlightenment and Victorian eras by examining more recent adaptations of the much studied Arthurian romances but primarily extends the discussion on the nature of revivals to other medieval or Renaissance chivalric texts especially the Carolingian cycle epic The collection includes not only literary retellings of medieval texts but also some in different media such as theatre and cinema
