Blood in the Fields Matthew Philipp Whelan, 2020-02-14 On March 24 1980 a sniper shot and killed Archbishop Oscar Romero as he celebrated mass Today nearly four decades after his death the world continues to wrestle with the meaning of his witness Blood in the Fields Oscar Romero Catholic Social Teaching and Land Reform treats Romero's role in one of the central conflicts that seized El Salvador during his time as archbishop and that plunged the country into civil war immediately after his death the conflict over the concentration of agricultural land and the exclusion of the majority from access to land to farm Drawing extensively on historical and archival sources Blood in the Fields examines how and why Romero advocated for justice in the distribution of land and the cost he faced in doing so In contrast to his critics who understood Romero's calls for land reform as a communist inspired assault on private property Blood in the Fields shows how Romero relied upon what Catholic Social Teaching calls the common destination of created goods drawing out its implications for what property is and what possessing it entails For Romero the pursuit of land reform became part of a more comprehensive politics of common use prioritizing access of all peoples to God's gift of creation In this way Blood in the Fields reveals how close consideration of this conflict over land opened up into a much more expansive moral and theological landscape in which the struggle for justice in the distribution of land also became a struggle over what it meant to be human to live in society with others and even to be a follower of Christ Understanding this conflict and its theological stakes helps clarify the meaning of Romero's witness and the way God's work to restore creation in Christ is cruciform

Central American Biodiversity Falk Huettmann, 2015-08-04 This book highlights key results and lessons learnt from two field sites La Suerte in Costa Rica and Ometepe Nicaragua It provides long term data on species abundance and distribution Primates receive specific attention in this book as they are flagship species and good indicators for the health of an ecosystem but as well a money maker Many primate species are sensitive to habitat alteration and are often hunted out first But they play an important role as seed dispersal agents for the regeneration of the forest The book then compares results from the two field sites with regional trends and explores potential solutions such as REDD This book strongly calls for new approaches in conservation it makes the case for looking beyond the pure species biology and classic conservation angle and to take into account the economic

and political realities *Collective Empowerment in Latin America* Gerardo Otero,Efe Can Gürcan,2024-06-20 This book develops a theory of collective empowerment that looks for change both from the bottom up in civil society and from the top down from state interventions responding to such pressure Reflecting on the advancement of Indigenous and peasant movements in Latin America since the neoliberal reformation of capitalism in the 1980s the book outlines a path for progressive social action in which bottom up pressure by social movements can help progressive parties to gain state power The book considers how Indigenous and peasant movements in Argentina Bolivia Brazil Ecuador and Mexico have tried to reshape crucial structures of society from the bottom up While this mobilization from below is critical and necessary the book argues that these movements must be supplemented by top down change from progressive state interventions as happened mostly in Bolivia and Brazil The authors conclude that progressive societal action can have massive impact in transforming some of the main socioeconomic structures that determine humans relation to the extraction of natural resources income and wealth inequality and even the location of a nation s insertion in world capitalism This book will be an important resource for social movement activists and for researchers working in political sociology sociological theory political studies development studies social movements and Latin American Studies **State-Society Relations in Guatemala** Omar

Sanchez-Sibony,2023-07-31 By embedding Guatemala in recent conceptual and theoretical work in comparative politics and political economy this volume advances knowledge about country s politics economy and state society interactions The contributors examine the stubborn realities and challenges afflicting Guatemala during the post Peace Accords era across the following subjects the state subnational governance state building peacebuilding economic structure and dynamics social movements civil military relations military coup dynamics varieties of capitalism corruption and the level of democracy The book deliberately avoids the perils of parochialism by placing the country within larger scholarly debates and paradigms

Exploring Sustainable Development Martin Purvis,Alan Grainger,2013-06-17 Sustainable development is capturing the attention of planners politicians and business leaders Within the academic sphere its study is increasingly breaching disciplinary boundaries to become a focus of attention for natural and social scientists alike But in studying such a key concept it is vital that there is a clear definition of what it means how it is applied on the ground and the influence it exerts upon people s perceptions of change in the physical environment economic activity and society Exploring Sustainable Development is a major new text which provides a multifaceted introduction to key areas of study in this field examining sustainability at the full range of spatial scales from the local to the global Building on existing theory it demonstrates the unique contributions that thinking geographically about space place and human environment relationships can bring to the analysis of sustainable development This book explores different interpretations of sustainable development in both theory and practice in developed and developing countries and in rural and urban areas It pays particular attention to the local national and international politics of implementation the future of climate and energy the role of business and different

conceptions of agricultural sustainability This wide ranging text is ideal for undergraduates and postgraduates in geography environmental science development studies and related social and political sciences **Reflections on Uneven Democracies** Daniel Brinks, Marcelo Leiras, Scott Mainwaring, 2014-09-22 This volume is a must read for all who are concerned with development and Latin American political economy It brings together two generations of leading international scholars who probe themes such as regime dynamics and stability party politics and institutions and the quality of democratic governance The pieces build to a contribution that is reminiscent of O'Donnell himself brilliant quirky important _ editorial Forging Democracy from Below Elisabeth Jean Wood, 2000-10-30 This book first published in 2000 analyzes the role of economically marginalized people in recent transitions to democratic rule **Commodities and Globalization** Angelique Haugerud, Margaret Priscilla Stone, Peter D. Little, 2000 Today's growing fascination with flows of people commodities technology capital images and ideas across national and other boundaries poses fresh theoretical and methodological challenges to anthropology Commodities offer a particularly useful window on globalization because they unlike electronically conveyed capital transport cultural messages These ideological or symbolic transfers are of particular interest to economic anthropology This collection considers how conceptions and roles of commodities may change in response to widening spheres of economic interaction and exchange The essays in this volume are ordered under two themes Those included in the first section Commodities in a Globalizing Marketplace address historically and culturally defined variations in meanings and practices associated with commodities in globalizing markets In Part Two The Circulation and Revaluation of Commodities contributors analyze how commodity producers experiences are informed by colonial and post colonial history state directives in the marketplace and locations in dependent or marginalized regions The chapters all focus on the production process as it responds to is distorted by and increasingly is controlled by the determination of the value of those commodities outside a locality **Themes in International Economics** Mats Lundahl, 2018-12-07 First published in 1998 this collection of essays deals with four different areas of international economics the theory of international trade trade and development protectionism and factor movements notably migration and foreign aid These themes explore the determinants of trade patterns the relation between these patterns and those of underdevelopment and development the failure of protectionism to increase welfare and finally the impact of emigration on the source country and that of foreign aid on the recipient country Military Foundations of Panamanian Politics Robert Harding II, 2019-01-22 This is a comprehensive examination of the evolution of the politicization of the Panamanian military and the legacy of this transformation in modern Panamanian politics It addresses the fundamental role that the Panamanian military played in influencing and molding the modern day Panamanian political system structurally legally and constitutionally and chronicles the corporate and political growth of the Panamanian military filtering its analysis through civil military theory to achieve its two primary goals *Social Movement Dynamics* Federico M. Rossi, Marisa von Bülow, 2016-03-03 This book presents an

overview of new approaches to the study of social movements emerging out of Latin America based on original and innovative analyses of the recent changes in collective action across the region Over the past decade new repertoires of contention have emerged in parallel to changes in the configuration of actors in previously established patterns of relationship between social movements and political institutions and in the shapes of collaborative networks both domestic and transnational The authors analyze a broad set of countries and social movements while focusing on three key theoretical debates the interactions between routine and contentious politics the relationship between protest and context and the organizational configurations of social movements The research agenda put forward by this book is neither defined nor restricted by geographical boundaries even though the chapters are based on field research undertaken in Latin America In doing so this volume contributes to a still underdeveloped dialogue in theory building in social movement studies among scholars from the South and from the North as well as among scholars specialized in different regions
