Dodson, 2002-10 The Discovery of First Principles looks at the history of human settlement on the earth and the socio political arrangements and institutions evolving over the ages The author presents the case for the existence of universal moral principles that must serve as the basis of law if law is to be just The story he tells is fascinating and insightful drawing on the observations and commentary of many of the most thoughtful actors in this human drama **A - Airports** British Library, 2012-05-21 No detailed description available for A Airports Institutions and Geographical Patterns Robin Flowerdew, 2015-12-22 An increasing amount of work in many aspects of human geography is concerned with the effects caused by different types of institutions Included in this book originally published in 1982 is material from Britain Ameican and Europe and it is shown that differences in institutional powers in these places especially those vested in the State relate directly to their own particular urban and environmental policies and problems Each chapter written by an expert on this subject considers key institutions in a number of fields and draws conclusions about how this institutionalist approach can be used by geographers **The Ireland that We Made** David R. From British Peasants to Colonial American Farmers Allan Kulikoff,2014-02-01 With this book Allan Kulikoff offers a sweeping new interpretation of the origins and development of the small farm economy in Britain s mainland American colonies Examining the lives of farmers and their families he tells the story of immigration to the colonies traces patterns of settlement analyzes the growth of markets and assesses the impact of the Revolution on small farm society Beginning with the dispossession of the peasantry in early modern England Kulikoff follows the immigrants across the Atlantic to explore how they reacted to a hostile new environment and its Indian inhabitants He discusses how colonists secured land built farms and bequeathed those farms to their children Emphasizing commodity markets in early America Kulikoff shows that without British demand for the colonists crops settlement could not have begun at all Most important he explores the destruction caused during the American Revolution showing how the war thrust farmers into subsistence production and how they only gradually regained their prewar prosperity Hungry City Carolyn Steel,2013-01-31 Cities cover just 2% of the world s

surface but consume 75% of the world's resources. The relationship between food and cities is fundamental to our everyday lives. Food shapes cities and through them it moulds us along with the countryside that feeds us. Yet few of us are conscious of the process and we rarely stop to wonder how food reaches our plates. *Hungry City* examines the way in which modern food production has damaged the balance of human existence and reveals that we have yet to resolve a centuries-old dilemma, one which holds the key to a host of current problems from obesity and the inexorable rise of the supermarkets to the destruction of the natural world. Original, inspiring and written with infectious enthusiasm and belief, *Hungry City* illuminates an issue that is fundamental to us all.

Mobility and Modernity Steven Lawrence Hochstadt, 2023-07-28. *Mobility and Modernity* uses voluminous German data on migrations over the past two centuries to demonstrate why conventional assumptions about the relationship between mobility and modernity must be revised. Thus far, the changing total volume of migration has not been traced over a long period for any country. Unique migration registration statistics, both detailed and broadly geographical in coverage, allow the precise plotting of migration rates in Germany since 1820. Steve Hochstadt combines careful quantitative methods, easily understood numerical data, and social analysis based upon broad reading in German social history to show that current beliefs about the direction and timing of changes in German mobility, which have been based on late nineteenth-century anxieties about urbanization and industrialization, do not match the data. Migration rates in Germany rose continuously throughout the nineteenth century and have fallen during the twentieth century. *Mobility*, Hochstadt argues, was not an unprecedented accompaniment to industrialization but a traditional rural response to specific economic changes. Hochstadt's more precise analysis of urban in- and outmigration shows the mechanism of urbanization to have been the migration of families rather than the much greater but also more circular migration of single men and women. Hochstadt demonstrates the importance of examining historical behavior, powerfully justifying the methods of historical demography as a path to social understanding. The data and specific conclusions are German, but the methods and reinterpretation of migration history have much wider application, both to other modern European nations and to currently developing countries. Those who study the modern social history of Europe, the mechanisms that formed urban working classes, and the methods of historical demography will be interested in Hochstadt's work.

Social Formation and Symbolic Landscape Denis E. Cosgrove, 1998. Hailed as a landmark in its field since its first publication in 1984, Denis E. Cosgrove's *Social Formation and Symbolic Landscape* has been influential well beyond geography. It has continued to spark lively debate among historians, geographers, art historians, social theorists, landscape architects, and others interested in the social and cultural politics of landscape.

Socialist Europe and Revolutionary Russia Bruno Naarden, 2002-05-02. This book analyses perceptions and images of Russia held by European socialists from 1848 to the 1920s.
