Elson, 2016-01-13 This book analyses the changing context and conditions of production and livelihood amongst Southeast Asia's peasants since the beginning of the nineteenth century. It argues that with demographic growth and the nineteenth century development of great global markets based on small scale production the size and economic significance of peasantries throughout the region was magnified. However such changes brought with them new forces stronger states more regular legal systems a revolution in communications intensive commercialisation which themselves worked to undermine the foundations of peasant society and eventually to transform peasants into farmers workers and citizens State, Market and Peasant in Colonial South and Southeast Asia Michael Adas, 2018-10-29 The essays collected in this volume first published in 1998 address the profound changes and disruptions wrought in peasant societies as a result of European colonial domination and the spread of the capitalist world economy from its European base. Detailed case study evidence is included in the essays and all are aimed at delineating broader patterns and addressing general questions and debates regarding peasant responses to the varied impact of colonialism and capitalism **Peasant History of Late Pre-colonial and Colonial India** B. Peasants on the Edge William P. Mitchell, 2010-07-05 Throughout Latin America and the rest of the Third World profound social problems are growing in response to burgeoning populations and unstable economic and political systems In Peru terrorist acts by the Shining Path guerilla movement are the most visible manifestation of social discontent but rapid economic and religious changes have touched the lives of almost everyone radically altering traditional lifeways In this twenty year study of the community of Quinoa in the Department of Ayacucho William Mitchell looks at changes provoked by population growth within a severely limited ecological and economic setting including increasing conversion to a cash economy and out migration the decline of the Catholic fiesta system and the rise of Protestantism and growing poverty and revolution When Mitchell first began his field studies in Quinoa in 1966 farming was still the Quinoas principal means of livelihood But while the population was increasing rapidly the amount of arable land in the community remained the same creating increased food shortfalls At the same time government controls on food prices and subsidies of cheap food imports drove down the value of rural farm production These ecological and economic factors forced many people to enter the nonfarm economy to feed themselves Using a materialist approach Mitchell charts the new economic strategies that Quinoas use to confront the harsh pressures of their lives including ceramic production wage labor petty commerce and migration to cash work on the coast and in the eastern tropical forests In addition he shows how the growing conversion from Catholicism to Protestantism is also an economic strategy since Protestant ideology offers acceptable reasons for redirecting the money that used to be spent on elaborate religious festivals to household needs and education The twenty year span of this study makes it especially valuable for students of social change Mitchell s unique interdisciplinary approach considering ecological economic and population factors simultaneously offers a model that can be widely applied in many Third World areas Additionally the inclusion of an

entire chapter of family histories reveals how economic and ecological forces are played out at the individual level The Long Revolution of the Global South Samir Amin, 2019-04-22 The final writings of Samir Amin a mix of personal experiences and theoretical analysis of global challenges and movements In this second volume of his memoirs Amin takes us on a journey to a dizzying array of countries recounting the stages of his ongoing dialogue over several decades with popular movements struggling for a better future As in his many works over the years The Long Revolution of the Global South combines Amin's astute theoretical analyses of the challenges confronting the world's oppressed peoples with militant action In these final writings based on his life Amin presents us with theoretical interventions analyses of political conjunctures and narration of personal experiences Amin's reminiscences of travels to places too often overlooked by the world at large are a joy to read We even catch a glimpse of some of his memorable and sometimes not so memorable culinary adventures
