Land and Revolution in Iran, 1960-1980 Eric J. Hooglund, 2014-07-03 Carried out by the government of the shah between 1962 and 1971 the Iranian land reform was one of the most ambitious such undertakings in modern Middle Eastern history Yet beneath apparent statistical success the actual accomplishments of the program in terms of positive benefits for the peasantry were negligible Later the resulting widespread discontent of thousands of Iranian villagers would contribute to the shah s downfall In the first major study of the effects of this widely publicized program Eric Hooglund s analysis demonstrates that the primary motives behind the land reform were political Attempting to supplant the near absolute authority of the landlord class over the countryside the central government hoped to extend its own authority throughout rural Iran While the Pahlavi government accomplished this goal its failure to implement effective structural reform proved to be a long term liability Hooglund who conducted field research in rural Iran throughout the 1970s and who witnessed the unfolding of the revolution from a small village provides a careful description of the development of the land reform and of its effects on the main groups involved landlords peasants local officials merchants and brokers He shows how the continuing poverty in the countryside forced the migration of thousands of peasants to the cities resulting in serious shortages of agricultural workers and an oversupply of unskilled urban labor When the shah s government was faced with mass opposition in the cities in 1978 not only did a disillusioned rural population fail to support the regime but thousands of villagers participated in the protests that hastened the collapse of the monarchy *The U.S. Press and Iran* William A.

Paradox of Plenty explains why in the midst of two massive oil booms in the 1970s oil exporting governments as different as Venezuela Iran Nigeria Algeria and Indonesia chose common development paths and suffered similarly disappointing outcomes Meticulously documented and theoretically innovative this book illuminates the manifold factors economic political and social that determine the nature of the oil state from the coherence of public bureaucracies to the degree of

centralization to patterns of policy making Karl contends that oil countries while seemingly disparate are characterized by similar social classes and patterns of collective action In these countries dependence on petroleum leads to disproportionate fiscal reliance on petrodollars and public spending at the expense of statecraft Oil booms which create the illusion of prosperity and development actually destabilize regimes by reinforcing oil based interests and further weakening state capacity Karl s incisive investigation unites structural and choice based approaches by illuminating how decisions of policymakers are embedded in institutions interacting with domestic and international markets This approach which Karl dubs structured contingency uses a state s leading sector as the starting point for identifying a range of decision making choices and ends by examining the dynamics of the state itself

identities to demonstrate how these structures and ideologies offered the Qashqa'i a way to confront the pressures emanating from the two central governments. Existing scholarly works on politics in Iran rarely consider Iranian society outside the capital of Tehran and beyond the reach of the details of national politics. Local level studies on Iran accounts of the ways people actually lived are now rare especially after the revolution. Based on long term anthropological research, *Nomads in Postrevolutionary Iran* provides a unique insight into how national level issues relate to the local level and will be of interest to scholars and researchers in Anthropology, Iranian Studies and Middle Eastern Studies. ***Rural Development in Iran, 1960-2020*** Mostafa Azkia, 2025-06-30 This book is an authoritative account of rural development in Iran spanning 60 years and 2 distinct political regimes. Professor Mostafa Azkia has spent many decades demonstrating the importance of participatory rural development not only in addressing rural problems but also in reducing urban concerns such as unemployment and overpopulation. This book is the culmination of this work bringing together a detailed analysis of the theories, history and strategies of rural and state development in Iran both before and after the Islamic Revolution. Putting rural communities at the fore, the book demonstrates that there has been significant progress in reducing the rural-urban gap both in terms of income and standards of living, resulting in a more equal path of socioeconomic development for Iran. This comprehensive assessment from Iran's foremost rural sociologist will be an important read for researchers and professionals working on rural development and sociology in the Middle East. ***A History of Social Justice and Political Power in the Middle East*** Linda T. Darling, 2013-05-02 From ancient Mesopotamia into the 20th century, the Circle of Justice as a concept has pervaded Middle Eastern political thought and underpinned the exercise of power in the Middle East. The Circle of Justice depicts graphically how a government's justice toward the population generates political power, military strength, prosperity and good administration. This book traces this set of relationships from its earliest appearance in the political writings of the Sumerians through four millennia of Middle Eastern culture. It explores how people conceptualized and acted upon this powerful insight, how they portrayed it in symbol, painting and story, and how they transmitted it from one regime to the next. Moving towards the modern day, the author shows how, although the Circle of Justice was largely dropped from political discourse, it did not disappear from people's political culture and expectations of government. The book demonstrates the Circle's relevance to the Iranian Revolution and the rise of Islamist movements all over the Middle East and suggests how the concept remains relevant in an age of capitalism. A must read for students, policymakers and ordinary citizens, this book will be an important contribution to the areas of political history, political theory, Middle East studies and Orientalism. **Both Eastern and Western** Afshin Matin-Asgari, 2018-08-16 Studying intellectual trends in Iran in a global historical context, this new intellectual history challenges many dominant paradigms in Iranian historiography and offers a new revisionist interpretation of Iranian modernity. **The Right Kind of Revolution** Michael E. Latham, 2011-01-15 After World War II, a powerful conviction took hold among American intellectuals and policymakers that the United States could profoundly

accelerate and ultimately direct the development of the decolonizing world serving as a modernizing force around the globe By accelerating economic growth promoting agricultural expansion and encouraging the rise of enlightened elites they hoped to link development with security preventing revolutions and rapidly creating liberal capitalist states In *The Right Kind of Revolution* Michael E Latham explores the role of modernization and development in U S foreign policy from the early Cold War through the present The modernization project rarely went as its architects anticipated Nationalist leaders in postcolonial states such as India Ghana and Egypt pursued their own independent visions of development Attempts to promote technological solutions to development problems also created unintended consequences by increasing inequality damaging the environment and supporting coercive social policies In countries such as Guatemala South Vietnam and Iran U S officials and policymakers turned to modernization as a means of counterinsurgency and control ultimately shoring up dictatorial regimes and exacerbating the very revolutionary dangers they wished to resolve Those failures contributed to a growing challenge to modernization theory in the late 1960s and 1970s Since the end of the Cold War the faith in modernization as a panacea has reemerged The idea of a global New Deal however has been replaced by a neoliberal emphasis on the power of markets to shape developing nations in benevolent ways U S policymakers have continued to insist that history has a clear universal direction but events in Iraq and Afghanistan give the lie to modernization s false hopes and appealing promises
