Land Kinship And Life Cycle:

Land, Kinship and Life-cycle Richard M. Smith, 1986 Land, Kinship and Life-Cycle Richard M. Smith, Jan De Vries, Paul Johnson, 2002-08-08 Essays on land transfer in English rural communities over the period 1250-1850 Land and Family John Mullan, Richard Britnell, 2010-10 With a special emphasis on the exchange of land between medieval servile tenants especially from the 13th century onward this scholarly examination of the peasant land market of the Middle Ages explores the identification of peasant families with particular lands to which they had a hereditary right Using this theme to explore village life and showing how peasants were affected by the changes over time and place this study employs primary source material from the Winchester estates Analyzing thousands of land exchanges and interactions from more than 50 different manors on Winchester this volume reveals unparalleled opportunities for comparing regional and local differences of experience *Manors and Maps in Rural England, from the Tenth Century to the Seventeenth* P.D.A. Harvey, 2023-05-31 P D A Harvey is a historian of medieval rural England with a wide interest in the history of cartography this collection of his essays brings together both these strands It first looks at the English countryside from the 10th century to the 15th investigating problems in particular documents in the village community and in underlying long term changes How landlords drew profits from their property in the eleventh and twelfth centuries how and why there followed changes in the way landed estates were run and in the written records they produced what new light their personal seals can throw on medieval peasants are all among the topics discussed while the local management of large estates and the development of the peasant land market are themes that recur throughout There follow essays on the way maps were brought into the management of landed estates in the 16th and 17th centuries starting with the introduction of consistent scale into mapping a new concept crucially important in the general history of topographical maps The collection closes by looking at some of the traps that both documents and maps set for the historian of the English countryside **The Culture of the English People** N. J. G. Pounds, 1994-05-27 This wide ranging book first published in 1994 traces the development of popular culture in England from the Iron Age to the eighteenth century *Medieval Society and the Manor Court* Zvi Razi, Richard Michael Smith, 1996 The records of manorial courts have been used increasingly as the principal source for the reconstruction of rural and small town society in medieval England They offer a unique source with which to investigate peasant demography family patterns the village community and economy the characteristics and instruments of customary law and the ways in which that law was perceived and exploited by landlords and tenants The essays in this collection provide novel approaches to all of these themes and are written by many of the historians who have pioneered the use of this source category in the last two decades In two introductory chapters the editors review the historiography of manorial court rolls and account for their origins as a distinctive record of customary law within the broad context of medieval European society A valuable appendix contains an inventory of the most comprehensive unprinted manorial court roll series arranged systematically on a county to county basis

Rethinking the Great Transition Peter L. Larson, 2022 This case study of two rural parishes in County Durham England provides an alternate view on the economic development involved in the transition from medieval to modern partly explaining England s rise to global economic dominance in the seventeenth century Coal mining did not come to these parishes until the nineteenth century these are an example of agrarian expansion Low population favourable seigniorial administration and a commercialised society saw the emergence of large farms on the bishopric of Durham soon after the Black Death these secure copyhold and leasehold tenures were among the earliest known in England Individualism developed within a strong parish and village community that encouraged growth while enforcing conformity tenants had freedom to farm as they wished within limits Along with low rents this allowed for a swift expansion of agricultural production in the sixteenth century as population rose and then as the coal trade expanded rapidly The prosperity of these men is reflected in their lands livestock and consumer goods Yet not all shared in this prosperity as the poor and landless increased in number simply by population growth Through reformation and rebellion these and other parishes prospered without experiencing severe disruption or destruction In north eastern England agrarian development was an evolution and not a revolution This study shows England s economic development as a single narrative woven together from a collection of regional experiences at different times and at different speeds

The Agrarian History of England and Wales: Volume 3, 1348-1500 Edward Miller, Joan Thirsk, 1991-07-18 The third volume of The Agrarian History of England and Wales which was first published in 1991 deals with the last century and a half of the Middle Ages It concerns itself with the new demographic and economic circumstances created in large measure by endemic plague

The First Century of Welfare Jonathan Healey, 2014 The first major regional study of poverty and its relief in the seventeenth century the first century of welfare The English Old Poor Law was the first national system of tax funded social welfare in the world It provided a safety net for hundreds of thousands of paupers at a time of very limited national wealth and productivity The First Century of Welfare which focusses on the poor but developing county of Lancashire provides the first major

regional study of poverty and its relief in the seventeenth century Drawing on thousands of individual petitions for poor relief presented by paupers themselves to magistrates it peers into the social and economic world of England's marginal people Taken together these records present a vivid and sobering picture of the daily lives and struggles of the poor We can see how their family life their relations with their kin and their neighbours and the dictates of contemporary gender norms conditioned their lives We can also see how they experienced illness and physical and mental disability and the ways in which real people's lives could be devastated by dearth trade depression and the destruction of the Civil Wars But the picture is not just one of poor folk tossed by the tides of fortune It is also one of agency about the strategies of economic survival the poor adopted particularly in the context of a developing industrial economy of the support they gained from their relatives and neighbours and of their willingness to engage with England's developing system of social welfare to ensure that they and their families did not go hungry In this book an intensely human picture surfaces of what it was like to experience poverty at a time when the seeds of state social welfare were being planted JONATHAN HEALEY is University Lecturer in English Local and Social History and Fellow of Kellogg College University of Oxford

Lordship and Medieval Urbanisation Richard Goddard, 2004 An examination of Coventry's process of urbanisation from its origins in the Anglo Saxon past to the eve of the Black Death The processes by which medieval urban communities were formed and developed can be clearly seen in this study of Coventry Following a survey of Domesday evidence the book goes on to look at the mechanisms for economic growth in Coventry during the twelfth century in which both lay and monastic lords played a significant part Coventry in the thirteenth century reveals other issues migration to and from the town the occupational structure within Coventry and the urban land market The story of Coventry's development into the fourteenth century ranges over trade manufacturing and occupations and notes changes in the land market Making extensive use of the town's rich documentation this study presents the reader with a closely argued analysis of the stages by which Coventry developed from its origins in the Anglo Saxon past to a vibrant and wealthy urban community on the eve of the Black Death Dr RICHARD GODDARD teaches in the School of History University of Nottingham

Farming to Halves E. Griffiths, M. Overton, 2009-07-07 Farming to halves is the English version of sharefarming a system of letting land familiar in Europe and the New World but thought to never have existed in England This book reveals its hidden history in England overturning traditional accounts of the relationship between landlords and tenants in the course of English Agrarian development

Women in the Medieval English Countryside Judith M. Bennett, 1987-03-12 Unlike most histories of European women which have typically focused on the 19th and 20th century elite this study reconstructs the public lives of peasant women and men during the six decades before the Black Death of 1348-49 Drawing on the extensive records of the forest manor of Brigstock Judith Bennett challenges the myth of a golden age of equality for medieval men and women Instead she ably shows that women faced profound political legal economic and social disadvantages in their dealings with men These disadvantages stemmed more from women's household status as

dependents of their husbands than from any notion of female inferiority consequently adolescents and widows participated much more actively than wives in the public life of Brigstock Women in the Medieval English Countryside demonstrates not only how enduring the subordination of women has been throughout English history but also how firmly that subordination has been rooted in the conjugal household **The History of Old Age in England, 1600-1800, Part II vol 5** Lynn

Botelho, Susannah R Ottaway, Anne Kugler, 2024-10-28 What did it mean to be old in seventeenth and eighteenth century England This eight volume edition brings together selections from medical treatises sermons legal documents parish records almshouse accounts private letters diaries and ballads to investigate cultural and medical understanding of old age in pre industrial England **Plantagenet England, 1225-1360** Michael Prestwich, 2005 In this thorough and illuminating work Michael Prestwich provides a comprehensive study of Plantagenet England a dramatic and turbulent period which saw many changes In politics it saw Simon de Montfort s challenge to the crown in Henry II s reign and it witnessed the deposition of Edward I In contrast it also saw the highly successful rules of Edward I and his grandson Edward III Political institutions were transformed with the development of parliament and war was a dominant theme Wales was conquered and the Scottish Wars of Independence started in Edward I s reign and under Edward III there were triumphs at Cr cy and Poitiers Outside of politics English society was developing a structure from the great magnates at the top to the peasantry at the bottom Economic changes were also significant from the expansionary period of the thirteenth century to years of difficulty in the fourteenth century culminating in the greatest demographic disaster of historical times the Black Death In this volume in the New Oxford History of England Michael Prestwich brings this fascinating century to life **Historical Geography of England and Wales** Robert A. Dodgshon, Robin A. Butlin, 2013-10-22 This text has been designed to cover all aspects and phases of the historical geography of England and Wales in a single volume In its substantially revised and enlarged form the treatment of standard themes has been completely re written to take account of recent work and shifts in viewpoint while its overall coverage has been extended to embrace newer themes like symbolic landscapes and the geography of the inter war period Its comprehensiveness and freshness of approach ensure its continuing value and success as a text Breadth of coverage from prehistory to 1939 Uses a range of data sources and approaches Well illustrated with particular emphasis on key themes Major revision of 1st edition with much wider range of topics
