Land Resource Management In Machakos District Kenya 1930 1990:

Land Resource Management in Machakos District, Kenya, 1930-1990 John English, Mary Tiffen, Michael Mortimore, 1994
World Bank Environment Paper 5 This paper reviews land management practices and agricultural innovation in this semi arid region since the 1930s when it was feared that the region would quickly lose its capacity to support its inhabitants and the

The Global Environmental Benefits of Land Degradation Control on Agricultural Land Stefano Pagiola, 1999-01-01
This book focuses on the global effects of land degradation but emphasizes other important levels of land degradation at the field level it may result in reduced productivity at the national level it may cause flooding and sedimentation and at the global level it can contribute to climate changes damaging bio diversity and international waters The effects on climate changes are explored and the report questions the extent to which land degradation on agricultural land affects climate change Does it increase emissions of greenhouse gases Does it affect land s capacity to serve as a carbon sink Can appropriate management enhance both land s productivity and its capacity to store carbon The carbon cycle in soils is analyzed indicating land degradation is likely to reduce the ability of soils to serve as carbon sink and release stored carbon into the atmosphere and bio diversity effects are likely to be adverse Global benefits of land degradation control include afforestation to allow increased carbon sequestration and provide adequate bio diversity habitats and community based wildlife management can provide alternatives to some marginal areas Although integrating global dimensions into land degradation control projects may reverse the field level or national problems it is causing difficulties and constraints will likely contribute to the failure of these projects

Land Resources Anthony Young, 2000-07-20 This book provides an authoritative review of the resources of soils water climate forests and pastures on which agriculture depends It assesses the interactions between land resources and wider aspects of development including population and poverty Unless action is taken the developing world will face recurrent problems of food security and conflict The book gives some forcefully expressed criticisms of current methods of assessing land degradation and placing an economic value on land It should be read by all involved in rural development including scientists economists geographers sociologists planners and students of development studies It provides a summary and perspective of the field of land resources and suggests improvements needed to conserve resources for future generations The hardback edition of the book received excellent reviews

Rethinking Sustainability Jonathan Mark Harris, 2009-11-12 Bringing together the thoughts of economists political scientists anthropologists philosophers and agricultural policy professionals this volume focuses on the issues of sustainability in development Examining such topics as international trade political power gender roles legal institutions and agricultural research the contributors focus on the missing links in theory and practice that have been barriers to the achievement of truly sustainable development Any theory of sustainable development must take into account economic social and environmental dimensions Until recently the question What is development was often answered predominantly from the economist s perspective with high priority being assigned

to expansion of economic output Social political institutional and ethical aspects have often been neglected But now that sustainable development has become a broadly accepted concept it is impossible to maintain a narrowly economic view of development For this reason the varied perspectives offered by the contributors to this volume are crucial to understanding the process of development as it relates to environmental sustainability and human well being The selection of articles is meant to be stimulating and provocative rather than comprehensive They are roughly divided between those dealing with broad theoretical issues concerning the economic political and social aspects of development Part I and those presenting more applied analysis Part II The common thread is a concern for examining which factors contribute to making development socially just and environmentally sound Rethinking Sustainability will be of interest to economists and social scientists development professionals and instructors seeking to offer their students a broad perspective on development issues Jonathan Harris is Senior Research Associate Global Development and Environment Institute at Tufts University as well as Adjunct Associate Professor of International Economics at Tufts University Fletcher School of Law

The Environment and Development in Africa Moses K. Tesi, 2000-01-01 The premise of *The Environment and Development in Africa* is that current environmental problems in sub Saharan Africa are an outcome of the continent's development activities Whether these activities have generated economic growth and raised living standards or have led to growth without overall increases in living standards or have even contributed to a decline in people's well being developments in that region have produced effects that have degraded Africa's environment in many ways This book presents a comprehensive and systematic analysis of the context of the environmental issues facing sub Saharan African states Contributors discuss the problems associated with generating the capacity to manage Africa's environmental concerns assess the impact of economic development efforts on the region's environment and examine various societal and policy responses to environmental problems and to development problems linked to ecological decay This is an important book for scholars and policy advisors concerned with African studies and global environmental issues

Food Security for Rural Africa Terry Leahy, 2018-09-03 At least fifty years of projects aimed at the rural poor in Africa have had very little impact Up to half of the children of these countries are still suffering from stunting and malnutrition Soil degradation and poor crop yields are ubiquitous Projects are almost always aimed at helping local people to solve their problems by growing for the market In some countries projects link poor villagers into cooperatives to produce a commercial output In other countries projects target more competent entrepreneurial villagers Almost all these projects fail after several years Even those that are successful make few inroads into the problems While the slogan feeding the farmers first comes from the Philippines it is particularly applicable to much of Africa where household food security can come from household production This book explains how projects can be designed that increase food security through subsistence production Focusing on particular people and projects it gives a sociological analysis of why this is so difficult to manage This book challenges the models promoted by academics in the field of development studies and argues against the strategies adopted by most donor organizations and government bodies It explains why commercial projects have been so ubiquitous even

though they rarely work It gives practical tips on how to set up villages and farms to achieve sustainable solutions that also provide plenty of nutritious food The book is written to be accessible and engaging For anyone planning to work in the rural areas of Africa this book is required reading
