biopiracy This report looks at efforts by the United Nations and governments to protect this heritage from exploitation the pressures on governments to allow the exploitation of indigenous knowledge and the effects of the General Agreement on Tariffs and Trade and the Trade Related Aspects of International Property Rights Agreement on indigenous peoples s intellectual property rights The many initiatives taken by Asian indigenous and tribal peoples to protect their heritage are also discussed and some strategies for the future are put forward in the Conclusion Women's Land Rights & Privatization in Eastern Africa Birgit Englert, Elizabeth Daley, 2008 This collection examines women s land rights in East Africa in the context of land tenure reforms and privatization **Is the Bangladesh Paradox Sustainable?** Selim Raihan, François Bourguignon, Umar Salam, 2024-01-18 Bangladesh is widely seen as a paradox Over the last quarter of a century it has maintained economic growth and has outperformed many countries on social indicators while scoring very low on the quality of governance Moreover its economic progress does not seem to indicate significant improvement in comparative institutional indicators Is the Bangladesh Paradox Sustainable thus examines whether such a paradoxical combination can be sustained in the long run if growth continues with no improvement in the quality of institutions It argues that although Bangladesh has become the second largest world exporter in the garments export diversification is needed both within and outside the garment sector if it is to maintain its development pace Based on a thorough account of the country s economic social and political development this companion volume analyzes Bangladesh s critical institution and development sensitive areas such as the garment sector banking taxation land management the judiciary and education This title is also available as Open Access on Cambridge Core *Promise, Trust and Evolution* Rucha Ghatge, Narpal Jodha, Pranab Mukhopadhyay, 2008-01-10 From land management to water rights this volume looks at the current status of Common Property Resources or CPRs in South Asia Developed countries have managed to establish well defined property rights over numerous resources and in some instances extended non exclusionary rights over privately owned resources over an extended period of time In the developing world however the share of community property is extensive either as a response to an expanding market or because the exposure to markets is still in its nascent stage This coupled with the demands of globalization has led to the co existence of both community ownership of resources as well as an evolving private property rights market This tension between public versus private ownership rights is particularly relevant in the developing countries of South Asia not only because of its shared history but also because of its resources frequently cross national boundaries This book tells the story of CPRs and the commons in a rapidly changing South Asia Including contributions from those working with natural resources in Bhutan India Nepal Pakistan and Sri Lanka the papers discuss issues such as equity in distribution efficiency and productivity of resources sustainability of resources and institutional transition and governance , **South Asia 2007** Europa Publications, 2006-11-16 A unique source of social and economic information on this increasingly important region **Towards Tradable Water Rights** Min Jiang, 2017-09-27 This book provides a first

comprehensive legal examination of water rights arrangements and water rights trading in China Although recent water reform in China has made substantial progress in policy development and practice how its legal and institutional framework facilitates or hinders the application of tradable water rights remains less addressed in the existing scholarship Against the backdrop of China's water reform and the wider international debate in water governance this book aims to provide an innovative approach to the complex issue of water governance by critically analysing the recent legal and policy developments in China towards tradable water rights It examines the deficiencies of the current systems for water rights arrangements and trading explores how China may learn from and build on the international trends in water rights trading practice mainly Australia and the US and proposes legal and policy frameworks for defining and administering tradable water rights in China that underpin sustainable water use in the face of exacerbated water scarcity variability and uncertainty All in all the book proposes pragmatic strategies for China's water law and policy reform to move towards tradable water rights which encompasses a comprehensive prescription from initialising and defining tradable water rights to administering water rights and trading By reflecting on the deepening water reforms in both China and other jurisdictions the book aims to contribute to the international water governance debate by exploring from a legal and policy perspective how China comparative to other cases around the world can find a balanced combination of water allocation mechanisms to address its water challenges It is hoped that the observations and proposed implications for China's water reform will contribute to developing a better understanding of the way in which experiences in water markets can be shared from jurisdiction to jurisdiction

*Bangladesh and International Law* Mohammad Shahabuddin, 2021-02-22 This book is the first ever comprehensive analysis of international law from Global South perspectives with specific reference to Bangladesh The book not only sheds new light on classical international law concepts such as statehood citizenship and self determination but also covers more current issues including Rohingya refugees climate change sustainable development readymade garment workers and crimes against humanity Written by area specialists the book explores how international law shaped Bangladesh state practice over the last five decades how Bangladesh in turn contributed to the development of international law and the manner in which international law is also used as a hegemonic tool for marginalising less powerful countries like Bangladesh By analysing stories of an ambivalent relationship between international law and post colonial states the book exposes the duality of international law as both a problem solving tool and as a language of hegemony Despite its focus on Bangladesh the book deals with the more general problem of post colonial states problematic relationship with international law and so will be of interest to students and scholars of international law in general as well as those interested in the Global South and South Asia in particular
