Labyrinths Of Democracy Adaptations:

Labyrinths of Democracy Heinz Eulau, Kenneth Prewitt, 1973 *On Legislatures* Gerhard Loewenberg, 2015-11-17 On Legislatures looks at why people support their individual representatives but continue to criticise the legislative system at every opportunity Although legislatures exist in every political system and are meant to represent the people they are generally disparaged because they appear both unrepresentative and indecisive Gerhard Loewenberg explains this puzzling contradiction by examining what representation means and what it takes for a large number of equally representative members to reach decisions It also describes the methods for studying legislatures that have been developed in the social sciences in the last half century and shows their importance in democratic societies throughout the world On Legislatures gets to the heart of the current disconnect between legislatures and the public they are supposed to represent

Representation in Crisis David K. Ryden, David K. Ryden, 1996-01-01 Details how the Supreme Court has impoverished the constitutional standing of political parties thereby contributing to a crisis of representation **High Impact Anti-crime Program** Eleanor Chelimsky, 1976 **Handbook of Research on Urban Politics and Policy in the United States** Ronald K. Vogel, 1997-01-21 A comprehensive reference work which provides a way to access research on urban politics and policy in the United States Experts in the field guide readers through major controversies while evaluating and assessing the subfields of urban politics and policy Each chapter follows the same basic organization with topics such as methodological and theoretical issues current states of the field and directions for future research For students this work provides a starting place to guide them to the most important works in a particular subfield and a context to place their work in a larger body of knowledge For scholars it serves as a reference work for immediate familiarity with subfields of the discipline including classic studies and major research questions For urban policymakers or analysts the handbook provides a wealth of information and allows quick identification of existing academic knowledge and research relevant to the problem at hand

Cities, Politics, and Policy John P. Pelissero, 2002-10-01 Just because Milwaukee isn't Manhattan doesn't mean that those urban centers face completely unique challenges Through effective comparative analysis of key issues in urban studies how city managers share power with mayors how spending policies affect economic development and how school politics impact education policy students can clearly see how scholars discern patterns and formulate conclusions to offer theoretical and practical insights from which all cities can benefit Pelissero brings together an impressive team of contributors to explore variation among cities through case studies and cross sectional analyses Each author synthesizes the field's seminal literature while explaining how urban leaders and their constituents grapple with everything from city council politics to conflict and cooperation among minority groups Authors identify both key trends and gaps in the scholarship and help set the research agenda for the years to come Lively case material will hook your students while the accessible presentation of empirical evidence makes this reader the comprehensive and sophisticated text you demand *The Evolution of Public Policy*

Toni Marzotto, Vicky Moshier Burnor, Gordon Scott Bonham, 2000 A political scientist and two regional economists from Towson University trace the employee commute option through its stages from initial idea through enactment and implementation to evaluation and reformulation The 1990 law mandated that large companies in metropolitan areas with severe ozone pollution reduce the number of their employees who drive to work alone The analysis integrates the policy cycle model and the advocacy coalition framework Paper edition unseen 19 95 Annotation copyrighted by Book News Inc Portland OR

Blacks in Power Leonard Cole, 2017-03-14 This book examines the remarkable increase of blacks at all levels of political life and makes the first systematic comparison of black and white elected officials While observers have disagreed as to whether black politicians act differently from their white counterparts little empirical work has been done because until recently there were few blacks in office Leonard A Cole's analysis of elected officials in New Jersey has an important bearing on the controversy Originally published in 1976 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

A New Handbook of Political Science Robert E. Goodin, Hans-Dieter Klingemann, 1998 Aimed at political scientists A New Handbook of Political Science provides the definitive survey of new developments over the last 20 years assessed in the context of historical trends in the field

Presidential Campaigns in Latin America Taylor C. Boas, 2016-03-04 How do presidential candidates in new democracies choose their campaign strategies and what strategies do they adopt In contrast to the claim that campaigns around the world are becoming more similar to one another Taylor Boas argues that new democracies are likely to develop nationally specific approaches to electioneering through a process called success contagion The theory of success contagion holds that the first elected president to complete a successful term in office establishes a national model of campaign strategy that other candidates will adopt in the future He develops this argument for the cases of Chile Brazil and Peru drawing on interviews with campaign strategists and content analysis of candidates television advertising from the 1980s through 2011 The author concludes by testing the argument in ten other new democracies around the world demonstrating substantial support for the theory

Handbook of Legislative Research Gerhard Loewenberg, 1985 The Handbook of Legislative Research a comprehensive summary of the results of research on nineteenth and twentieth century legislatures is itself a landmark in the evolution of legislative studies Gathered here are surveys by leading scholars in the field each providing inventory of an important subfield an extensive bibliography and a systematic assessment of what has been accomplished and what directions future research must take

Custodians of Place Paul George Lewis, Max Neiman, 2009 Custodians of Place provides a new theoretical framework that accounts for how different types of cities arrive at decisions

about residential growth and economic development Lewis and Neiman surveyed officials in hundreds of California cities of all sizes and socioeconomic characteristics to account for differences in local development policies This book shows city governments at the center of the action in shaping their destinies frequently acting as far sighted trustees of their communities They explain how city governments often can insulate themselves for the better from short term political pressures and craft policy that builds on past growth experiences and future vision Findings also include how conditions on the ground local commute times housing affordability composition of the local labor force play an important role in determining the approach a city takes toward growth and land use What types of cities tend to aggressively pursue industrial or retail firms What types of cities tend to favor housing over business development What motivates cities to try to slow residential growth Custodians of Place answers these and many other questions *Landmark Briefs and Arguments of the Supreme Court of the United States* United States. Supreme Court,2014 **Running in the Red** Irene S. Rubin,1983-06-30 This case study of a politically reformed middle sized Midwestern city provides a model of fiscal stress that contrasts sharply with that of America s vast metropolitan centers Dr Rubin examines the interaction of social political and economic causes of the city s predicament She then goes on to analyze the specific factors that solved the city s problems over a six year period Finally she offers a self correcting mechanism that would allow a city to save itself from financial trouble without direct state or federal assistance This study suggests that local political factors were even more important than national factors in contributing to the city s fiscal stress It also brings into question the theory that generosity to the poor creates urban fiscal stress and that giving less to the poor will solve urban financial problems USIA Private Sector Committees Annual Report United States Information Agency. Office of Private Sector Committees,1985 *Political Science* William J. Crotty,1991 In this volume the study of legislatures has traditionally been a central preoccupation of political scientists Legislatures provide good laboratories for testing theories and methodologies of significance in the discipline and more broadly for contributing to an understanding of how representative government works **Separate Destinations** James G. Gimpel,2010-05-25 Natives who change residence do not settle in the same places as immigrants Separate Destinations argues that these distinct mobility patterns coupled with record levels of immigration from impoverished third world nations are balkanizing the American electorate James G Gimpel examines the consequences of different patterns of movement and settlement on the politics of the communities in which these different groups settle Newer immigrants are con strained by a lack of education money English literacy and information and frequently by discrimination to live in areas of coethnic settlement Domestic native born migrants predominantly Caucasian free of discrimination and possessing more money and information move where they wish often to communities where immigrants are not welcome or cannot afford to live Strong evidence suggests that spatially isolated immigrants are slower to naturalize and get involved in politics than domestic migrants Gimpel looks closely at states with very different patterns of migration and immigration California Colorado Kansas Kentucky Florida

Pennsylvania and New York In these states Gimpel shows the impact of population mobility on party registration party votes and voter turnout and asks whether population changes have changed the dominant party in a state or produced a political reaction from natives Separate Destinations contains a number of thematic maps detailing the settlement patterns of internal migrants and immigrants for both counties and census tracts Blending insights from a number of social science disciplines including economics demography sociology political science and anthropology this book will be of interest to a wide and diverse readership of scholars students and policymakers James G Gimpel is Associate Professor of Government University of Maryland

Political Science in America Michael A. Baer, Malcolm E. Jewell, Lee Sigelman, 2021-03-17 Few academic disciplines have recorded their own origins and development in an organized way The American Political Science Association in cooperation with Pi Sigma Alpha the political science honor society and the University of Kentucky have undertaken an extensive oral history project the aim of which is to trace and record the growth of the discipline The program has made it possible to amass hours of interviews with women and men who have influenced the study of political science Political Science in America contains interviews with fifteen major figures who speak frankly about the intellectual and institutional roots of political science and trace its evolution Through their words we learn what it was like to be a part of the earliest Ph D programs and to work with early leaders We discover how these leaders became interested in political science what roles they played in building departments and research organizations and what they learned from participation in government and politics They discuss their own contributions and offer opinions on some of the major conflicts that have divided the discipline Particularly enlightening are their varied perspectives on the growth of the behavioral movement in political science over the past fifty years This book is of interest to all political scientists as a historical perspective on their discipline

An Assessment of Sample Surveys as Feedback Mechanisms for Guiding Local Decision Making Peter Jeffrey May, 1979

Australian Local Government Brian Dollery, Neil Marshall, 1997 The last few years have seen unprecedented change taking place in the Australian local government arena In all states the functions and responsibilities of local authorities have been subjected to extensive reform New legislation has redefined the role of councillors Local governments have been required to introduce more efficient and effective management practices and become more open and responsive to their constituencies The scope of traditional regulatory practices has been altered and councils forced to develop a competitive environment for the provision of services The place of local authorities in the intergovernmental landscape has also changed Different forms of interaction between Commonwealth state and local government are evolving along with the emergence of new funding strategies to encourage a regional focus This is the first book to offer a detailed discussion of the reforms that have taken place and at the same time provide an informative and readable analysis for practitioners and students of government politics and public sector management
