A FOOL'S SPARK Anthony Fielding, 2014-08-13 The novel examines parallel love affairs one inside gaol where life is lived among power groups dedicated to advancing the dark side of human nature the other in straight society where life is lived inside the boundaries of ethical orthodoxy The two stories intersect both couples confront danger even death each love story poses a threat to the survival of the other both in a sense prevail for in this contingent environment there can be no necessary winner I loved the depth complexity and individuality of the characters they lived and breathed for me and the back stories were so adroitly handled that at no point was I left with any uncertainties or loose ends The story was woven and written skilfully and could be read on any number of different levels as all the best stories should be I did feel though that this was a tale that would linger long in the mind and that was because of the well drawn personalities Marilyn Messik

Latz, 2017-04-07 Photovoice is a form of participatory action research which has been gaining use and momentum since its inception in the mid 1990s Within the enactment of this methodology research participants are invited to document aspects of their lives through photography and then provide written or oral accounts of the images they create Designed to situate participants as experts on their lives and their experiences photovoice is a powerful and visceral approach to policy change efforts In this book the photovoice methodology is conceptualized as being comprised of eight steps identification invitation education documentation narration ideation presentation and confirmation Each of the steps is explained and expanded upon and

insights are drawn from the extant photovoice literature and the author's personal experience. In addition, attention is given to the history of photography and inquiry, theoretical underpinnings and aims of the methodology, ethical considerations, methods and procedures, approaches to data analysis and photovoice exhibitions. Finally, the author has attended to some aspects of photovoice that have historically been left unattended, such as building a conceptual framework for a photovoice study, viewing the photovoice exhibition as a site of inquiry and thinking through the ways in which ever-evolving photography technologies can and should impact decision making throughout the photovoice process. While many texts exist that touch on and/or address photovoice, this is the first book solely dedicated to the entirety of the photovoice methodology, from theory to exhibition. Built as a practical guide, readers will find a wealth of information, resources and advice within this book. Educators, students and academic researchers will find this an accessible and compassionate text, one that will be a trusted companion while on the photovoice project journey.

Teaching in the Terrordome Heather Kirn Lanier, 2012-10-01. Only 50 percent of kids growing up in poverty will earn a high school diploma. Just one in ten will graduate college. Compelled by these troubling statistics, Heather Kirn Lanier joined Teach For America (TFA), a program that thrusts eager but inexperienced college graduates into America's most impoverished areas to teach, asking them to do whatever is necessary to catch their disadvantaged kids up to the rest of the nation. With little more than a five-week teacher boot camp and the knowledge that David Simon referred to her future school as The Terrordome, the altruistic and naïve Lanier devoted herself to attaining the program's goals but met obstacles on all fronts. The building itself was in such poor condition that tiles fell from the ceiling at random. Kids from the halls barged into classes all day, disrupting even the most carefully planned educational activities. In the middle of one lesson, a wandering student lit her classroom door on fire. Some colleagues instantly suspicious of TFA's intentions, withheld their help and supplies. They think you're trying to save the children, one teacher said. And although high school students can be, by definition, resistant, in west Baltimore they threw eggs, slashed tires.

and threatened teachers lives Within weeks Lanier realized that the task she was charged with achieving quantifiable gains in her students learning would require something close to a miracle Superbly written and timely Teaching in the Terrordome casts an unflinching gaze on one of America s dropout factory high schools Though Teach For America often touts its most successful teacher stories in this powerful memoir Lanier illuminates a more common experience of Teaching For America with thoughtful complexity a poet s eye and an engaging voice As hard as Lanier worked to become a competent teacher she found that in The Terrordome idealism wasn t enough To persevere she had to rely on grit humility a little comedy and a willingness to look failure in the face As she adjusted to a chaotic school administration crumbling facilities burned out colleagues and students who perceived their school for the failure it was she gained perspective on the true state of the crisis TFA sets out to solve Ultimately she discovered that contrary to her intentions survival in the so called Charm City was a high expectation
