Land And Society In Britain 1700 199:

Land and Society in Britain, 1700-1914 N. B. Harte, Roland E. Quinault, 1996 Ten essays by scholars who have been influenced by the specialist in the history of British landed society who retired in 1990 The topics include the rivalry between landed and other gentry the Servants Tax of 1777 attitudes toward foreign farming agricultural laborers and the third Reform Act in Suffolk the political economy of death duties the political extremism of Willoughby de Broke and Walter Long golf and Edwardian politics and mobility after the horse Distributed in the US by St Martin's Press Annotation copyright by Book News Inc Portland OR

Society and Economy in Modern Britain 1700-1850 Richard Brown, 2002-11-01 For both contemporaries and later historians the Industrial Revolution is viewed as a turning point in modern British history There is no doubt that change occurred but what was the nature of that change and how did it affect rural and urban society Beginning with an examination of the nature of history and Britain in 1700 this volume focuses on the economic and social aspects of the Industrial Revolution Unlike many previous textbooks on the same period it emphasizes British history and deals with developments in Wales Scotland and Ireland in their own right It is the emphasis on the diversity not the uniformity of experience on continuities as well as change in this crucial period of development which makes this volume distinctive In his companion title Richard Brown completes his examination of the period and looks at the changes that took place in Britain's political system and in its religious affiliations

English Landed Society in the Great War Edward Bujak, 2018-10-18 The extent to which the Great War impacted upon English landed society is most vividly recalled in the loss of young heirs to ancient estates English Landed Society in the Great War considers the impact of the war on these estates Using the archives of Country Life Edward Bujak examines the landed estate that flourished in England In doing so he explores the extent to which the wartime state penetrated into the heartlands of the landed aristocracy and gentry and the corrosive effects that the progressive and systematic militarization of the countryside had on the authority of the squire The book demonstrates how the commitment of landowners to the defence of an England of home and beauty an image also adopted in wartime propaganda ironically led to its transformation By using the landed estate to examine the transition from Edwardian England to modern Britain English Landed Society in the Great War provides a unique lens through which to consider the First World War and its impact on English society

Law and Society in England 1750-1950 William Cornish, Stephen Banks, Charles Mitchell, Paul Mitchell, Rebecca Probert, 2019-10-31 Law and Society in England 1750 1950 is an indispensable text for those wishing to study English legal history and to understand the foundations of the modern British state In this new updated edition the authors explore the complex relationship between legal and social change They consider the ways in which those in power themselves imagined and initiated reform and the ways in which they were obliged to respond to demands for change from outside the legal and political classes What emerges is a lively and critical account of the evolution of modern rights and expectations and an engaging study of the formation of contemporary social administrative and legal institutions

and ideas and the road that was travelled to create them The book is divided into eight chapters Institutions and Ideas Land Commerce and Industry Labour Relations The Family Poverty and Education Accidents and Crime This extensively referenced analysis of modern social and legal history will be invaluable to students and teachers of English law political science and social history The Gentleman's House in the British Atlantic World 1680-1780 S. Britnell,1996 The commercialisation of English society offers a major new interpretation of social and economic change in England over five centuries By 1500 English livelihoods depended more upon money and commercial transactions than ever before the institutional framework of markets had been transformed and urban development was more pronounced These changes were not however caused by any unilinear development of population output or money supply This pioneering study examines both institutional and economic transformation and the social changes that resulted and stresses the limited importance of formal trading institutions for the development of local trade Commercial transition is throughout analysed from a broader perspective that looks at the changing power relations within medieval society which might loosely be described as feudal and considers how these relations were affected by such commercial development **Transactions of the Colonial Society of**
