**The Land Grabbers** Fred Pearce, 2012-05-29 Raises complex and urgent issues Booklist starred review How Wall Street Chinese billionaires oil sheiks and agribusiness are buying up huge tracts of land in a hungry crowded world An unprecedented land grab is taking place around the world Fearing future food shortages or eager to profit from them the world s wealthiest and most acquisitive countries corporations and individuals have been buying and leasing vast tracts of land around the world The scale is astounding parcels the size of small countries are being gobbled up across the plains of Africa the paddy fields of Southeast Asia the jungles of South America and the prairies of Eastern Europe Veteran science writer Fred Pearce spent a year circling the globe to find out who was doing the buying whose land was being taken over and what the effect of these massive land deals seems to be The Land Grabbers is a first of its kind expos that reveals the scale and the human costs of the land grab one of the most profound ethical environmental and economic issues facing the globalized world in the twenty first century The corporations speculators and governments scooping up land cheap in the developing world claim that industrial scale farming will help local economies But Pearce s research reveals a far more troubling reality While some mega farms are ethically run all too often poor farmers and cattle herders are evicted from ancestral lands or cut off from water sources The good jobs promised by foreign capitalists and home governments alike fail to materialize Hungry nations are being forced to export their food to the wealthy and corporate potentates run fiefdoms oblivious to the country beyond their fences Pearce s story is populated with larger than life characters from financier George Soros and industry tycoon Richard Branson to Gulf state sheikhs Russian oligarchs British barons and Burmese generals We discover why Goldman Sachs is buying up the Chinese poultry industry what Lord Rothschild and a legendary 1970s asset stripper are doing in the backwoods of Brazil and what plans a Saudi oil billionaire has for Ethiopia Along the way Pearce introduces us to the people who actually live on and live off of the supposedly empty land that is being grabbed from Cambodian peasants victimized first by the Khmer Rouge and now by crony capitalism to African pastoralists confined to ever smaller tracts Over the next few decades land grabbing may matter more to more of the planet s people than even climate change It will affect who eats and who does not who gets richer and who gets poorer and whether agrarian societies can exist outside corporate control It is the new battle over who owns the planet [The Land Grabbers](#) Frank Tanner, 1919

*The Land Grabbers* Lee Davis Willoughby, 1981-02      **The Global Land Grab** Annelies Zoomers, Mayke Kaag, 2014-02-13 The last two years have seen a huge amount of academic policy making and media interest in the increasingly contentious issue of land grabbing the large scale acquisition of land in the global South It is a phenomenon against which locals seem defenceless and one about which multilateral organizations such as the World Bank as well as civil society organizations and action NGOs have become increasingly vocal This in depth and empirically diverse volume taking in case studies from across Africa Asia and Latin America takes a step back from the hype to explore a number of key questions

Does the global land grab actually exist If so what is new about it And what beyond the immediately visible dynamics and practices are the real problems A comprehensive and much needed intervention on one of the most hotly contested but little understood issues facing countries of the South today Land Grabbing and Global Governance Matias E. Margulis,Nora McKeon,Saturnino Borras Jr.,2016-05-23 Land grabbing per se is not a new phenomenon given its historical precedents in the eras of imperialism However the character scale pace orientation and key drivers of the recent wave of land grabs is a distinct historical event closely tied to the changing dynamics of the global agri food feed and fuel complex Land grabbing is facilitated by ever greater flows of capital goods and ideas across borders and these flows occur through axes of power that are far more polycentric than the North South imperialist tradition Land grabs occur in the context of changes in the character of the global food regime formerly anchored by North Atlantic empires the integrated food energy complex seems to be headed towards multiple centres of power especially with the rise of the BRICS and the proliferation of middle income countries participating in many of the land transactions Land Grabbing and Global Governance offers insights from leading scholars and experts on contemporary land grabs This volume examines land grabs in direct relation to a global economy undergoing profound change and the role of new configurations of actors and power in governance institutions and practices This book was published as a special issue of Globalizations *The Great African Land Grab?* Lorenzo Cotula,2013-07-11 Over the past few years large scale land acquisitions in Africa have stoked controversy making headlines in media reports across the world Land that only a short time ago seemed of little outside interest is now being sought by international investors to the tune of hundreds of thousands of hectares Private sector expectations of higher world food and commodity prices and government concerns about longer term national food and energy security have both made land a more attractive asset Dubbed land grabs in the media large scale land acquisitions have become one of the most talked about and contentious topics amongst those studying working in or writing about Africa Some commentators have welcomed this trend as a bearer of new livelihood opportunities Others have countered by pointing to negative social impacts including loss of local land rights threats to local food security and the risk that large scale investments may marginalize family farming Lorenzo Cotula a leading expert in the field casts a critical eye over the most reliable evidence on this hotly contested topic examining the implications of land deals in Africa both for its people and for world agriculture and food security **Global Land Grabbing and Political Reactions 'from Below'** Marc Edelman,Ruth Hall,Saturnino M. Borras Jr.,Ian Scoones,Ben White,Wendy Wolford,2017-08-15 When the 2007 2008 food and financial crises triggered a global wave of land grabbing scholars activists and policy practitioners assumed that this would be met with massive peasant resistance As empirical evidence accumulated however it became clear that political reactions from below to land grabbing were quite varied and complex Violent resistance outright expulsions everyday weapons of the weak and demands for better terms of incorporation into land deals were among the outcomes that emerged Readers of this collection will encounter a multinational group of

scholars who use the tools of social movements theory and critical agrarian studies to examine cases from Argentina Mexico Guatemala Nicaragua Colombia Ethiopia Madagascar Mozambique Uganda Mali Ukraine India and Laos as well as the Rio 20 Sustainable Development Conference Initiatives from below in response to land deals have involved local and transnational alliances and the use of legal and extra legal methods and have brought victories and defeats This book was first published as a special issue of The Journal of Peasant Studies *Biofuels, Land Grabbing and Food Security in Africa* Atakilte Beyene, Prosper B. Matondi, Kjell Havnevik, 2011-06-09 The issue of biofuels has already been much debated but the focus to date has largely been on Latin America and deforestation this highly original work breaks fresh ground in looking at the African perspective Most African governments see biofuels as having the potential to increase agricultural productivity and export incomes and thus strengthen their national economies improving energy balances and rural employment At the same time climate change may be addressed through reduction of green house gas emissions There are however a number of uncertainties mounting that challenge this scenario Using cutting edge empirical case studies this knowledge gap is addressed in a variety of chapters examining the effects of large scale biofuel production on African agriculture In particular land grabbing and food security issues are scrutinised both of which have become vital topics in regard to the environmental and developmental governance of African countries A revealing book for anyone wishing to understand the startling impact of biofuels and land grabbing on Africa Land Grabbing and Home Country Development Ariane Goetz, 2019-05-13 Since 2008 foreign land acquisitions have attracted international attention under the term land grabbing Illustrated by rich and nuanced empirical accounts of forty Chinese and British investment projects in Sub Saharan Africa Ariane Goetz explains the phenomenon of land grabbing from the perspective of two investor countries She reflects on Chinese and British public policy state society relations national developmental contexts ideologies and international relations and thereby gives insights into the political economies that enable these investments as well as the development ambitions and institutionalized paradigms of which they form a part Land Grabbing in Africa Fasil Demissie, 2017-10-02 The sign that Africa is on Sale has been appearing with regular frequency in major newspaper accounts across the world indicating that large amounts expanses of Africa s rich farmlands are being sold to transnational investors usually on long term leases at a rate not seen in decades indeed not since the colonial period Transnational and national economic actors from various business sectors oil and auto mining and forestry food and chemical bioenergy etc are eagerly acquiring or declaring their intention to acquire large areas of land on which to build maintain or extend large scale extractive and agro industrial enterprises to help secure their own food and energy needs into the future This book provides a critical appraisal of the growing phenomenon of land grabbing in Africa Far from being a technical issue associated good governance the problem of land grabbing by transnational corporation and states is a serious threat for the food security of millions of Africans and is undoubtedly one of the great challenges of our time for development on the continent The case studies illustrate that African states are also

complicit in the massive land grabbing by actively participating in isolated development while excluding the local communities. The case studies reveal key features that characterize how the global land grab plays out in specific localities in Africa. This book was published as a special issue of *African Identities*. *Encountering Land Grab* Abhijit Guha, 2022-04-27

Taking possession of private land for public purpose by the eminent domain of the state is a global phenomenon but it displaces and marginalizes the people at the local level. The researchers have mainly dealt with this phenomenon either from the field or from the archive. In this book, the author has studied the observable fact of land grab or acquisition for industries in a particular locale of the West Bengal State by combining the field and archive in a unique mode through a multi-sited ethnographic journey. Unlike the traditional anthropological ethnographies consisting of single tribes or multi-caste villages, this vertical ethnographic voyage of the author led him to come across a group of dispossessed peasants in the villages, a bunch of files in the district land acquisition department, a rich text of proceedings in the West Bengal Assembly Library, the growing global literature on land grab, and also to reflect on his dialogues with the elected members of the parliamentary standing committee at New Delhi. Ethnography for the author was the road map which guided his journey in these apparently separate existential domains of land acquisition and throws new light on how development policies are made and how they failed and what were the lessons learnt. Please note: Taylor Francis does not sell or distribute the Hardback in India, Pakistan, Nepal, Bhutan, Bangladesh, and Sri Lanka. *Gender and the Global Land Grab* Andrea M. Collins, 2024-06-15

Since the year 2000, millions of hectares of land in the Global South have been acquired by foreign investors for large-scale agricultural projects, displacing and disrupting rural communities. Women are especially disadvantaged by the global land grab; they are less likely to inherit control or make decisions over land but often need land to support themselves, their families, and their communities. While international organizations have developed global guidelines to improve land governance, tensions still run high as the current policies fall short. *Gender and the Global Land Grab* introduces a feminist conceptual framework to analyze land governance policy around the world. Andrea Collins shows how gender norms, biases, and expectations shape land politics at different levels of governance. Drawing on examples from sub-Saharan Africa and with an in-depth case study of land politics in Tanzania, the book assesses guidelines developed by institutions such as the Food and Agriculture Organization of the United Nations and the World Bank to highlight essential considerations for developing and implementing gender-sensitive policy. Illustrating how gender shapes resource policy across all levels of political activity, *Gender and the Global Land Grab* provides valuable tools for transforming global policymaking. *De-centring Land Grabbing* Peter Vandergeest, Laura Schoenberger, 2019-10-23

Southeast Asia has been portrayed as a key site in the global land grab. Featuring leading scholars in the field, this collection critically examines the nature and extent of land grabbing in Southeast Asia and seeks to locate this phenomena in broader agrarian and environmental transitions. AET. The individual contributions suggest that there is little evidence of a global land grab in Southeast Asia but that over the last ten years, the

surge of plantations and processes of land grabbing has been a key feature in the region The collection considers how broader AET processes may be brought more clearly into focus by decentring land grabbing including consideration of its absence as well presence The diversity of cases in this collection coalesces around the productive tension in land grab studies between global capitalist processes on the one hand and context specificity and contingent motivations fuelling the expansion of large scale plantations for oil palm rubber cassava and other cash crops on the other hand The contributors further broaden the entry points to consider cross sectoral AET processes such as enclosures for mining conservation and hydropower and explore the contingencies that help to maintain smallholder production The chapters originally published as a special issue in The Journal of Peasant Studies

**Beyond the Global Land Grab** Gustavo de L. T. Oliveira, Juan Liu, Ben M. McKay, 2021-11-17 The conjunction of climate food and financial crises in the late 2000s triggered renewed interest in farmland and agribusiness investments around the world This phenomenon became known as the global land grab and sparked vibrant debates among social movements NGOs international development agencies and various government agencies and academics worldwide This book addresses four key areas that are moving the debate beyond land grabs These include the role of contract farming and differentiation among farm workers in the consolidation of farmland the broader forms of dispossession and mechanisms of control and value grabbing beyond classic land grabs for agricultural production discourses about and responses to Chinese agribusiness investments abroad and the relationship between financialization and land grabbing The chapters in this edited volume propose new directions to deepen and even transform the research agenda on land struggles and agro industrial restructuring around the world This book will be of great interest to scholars and researchers interested in development studies agrarian changes and land struggles The chapters in this book were originally published as a special issue of the journal Globalizations

**The Divide** Jason Hickel, 2017-05-04 There s no understanding global inequality without understanding its history In The Divide Jason Hickel brilliantly lays it out layer upon layer until you are left reeling with the outrage of it all Kate Raworth author of Doughnut Economics The richest eight people control more wealth than the poorest half of the world combined Today 60 per cent of the world s population lives on less than 5 a day Though global real GDP has nearly tripled since 1980 1 1 billion more people are now living in poverty For decades we have been told a story that development is working that poverty is a natural phenomenon and will be eradicated through aid by 2030 But just because it is a comforting tale doesn t make it true Poor countries are poor because they are integrated into the global economic system on unequal terms and aid only helps to hide this Drawing on pioneering research and years of first hand experience The Divide tracks the evolution of global inequality from the expeditions of Christopher Columbus to the present day offering revelatory answers to some of humanity s greatest problems It is a provocative urgent and ultimately uplifting account of how the world works and how it can change for the better
