

LESSONS LEARNED FROM THE LAND, OIL, AND WATER

As a girl raised in northern Nigeria, I grew up around diversity. I was so aware that we are very different and yet similar. Fortunately, it has informed a lot of my decisions in life.

However, I didn't notice that this vital lesson was also evident in Nigeria's land geography - in her natural resources.

There are major lessons one can learn from these elements. Each one is powerful in itself. Capable of sustaining life as much as it is capable of taking it. We can not choose one element and ignore the rest. Nigeria's diversity and uniqueness are as much a blessing as they are a burden.

They are ours to master.

Land Oil And Education:

Land, Oil, and Education Berte Rolfe Haigh, Millicent Seay Huff, 1986 Oil in Texas Diana Davids Hinton, Roger M. Olien, 2002-03-15 The dramatic story of the oil boom that transformed the history of a state drawn from archives and first person accounts As the twentieth century began oil in Texas was easy to find but the quantities were too small to attract industrial capital and production Then on January 10 1901 the Spindletop gusher blew in Over the next fifty years oil transformed Texas creating a booming economy that built cities attracted out of state workers and companies funded schools and universities and generated wealth that raised the overall standard of living even for blue collar workers No other twentieth century development had a more profound effect upon the state This book chronicles the explosive growth of the Texas oil industry from the first commercial production at Corsicana in the 1890s through the vital role of Texas oil in World War II Using both archival records and oral histories they follow the wildcatters and the gushers as the oil industry spread into almost every region of the state The authors trace the development of many branches of the petroleum industry pipelines refining petrochemicals and natural gas They also explore how overproduction and volatile prices led to increasing regulation and gave broad regulatory powers to the Texas Railroad Commission Higher Education in Texas Charles R. Matthews, 2018-02-15 Higher Education in Texas is the first book to tell the history defining events and critical participants in the development of higher education in Texas from approximately 1838 to 1970 Charles Matthews Chancellor Emeritus of the Texas State University System begins the story with the land grant policies of the Spanish Mexicans Republic of Texas and the State of Texas that led to the growth of Texas Religious organizations supplied the first of many colleges years before the Texas Legislature began to fund and support public colleges and universities Matthews devotes a chapter to the junior community colleges and their impact on providing a low cost education alternative for local students These community colleges also played a major role in economic development in their communities Further chapters explore the access and equity in educating women African Americans and Hispanics **Capitalism and Agrarian Change** Muchtar Habibi, 2022-11-17 Small scale agricultural producers in the peripheral world are often condescendingly assumed to be a single social class the peasantry to be pitted against the state or corporation This book challenges this rather idealistic view by demonstrating that under current capitalist social relations competition efficiency and productivity and profit maximisation these agricultural producers have been differentiated into different agrarian classes by exploitation By comparing two different contexts of local agrarian change in Indonesia rice cultivation in Java and oil palm in Sumatra this book exposes the different class locations of the agrarian classes among petty agricultural producers and the class relations between them These are often inextricably linked to gender clanship and generational issues The power of class dynamics crucially shapes how agricultural production in both rice and oil palm is organised The share received by different agrarian classes from the production site then prominently shapes the different nature of class reproduction for each agrarian class

This analysis demonstrates that the different agrarian classes possess different capacities and responses in their relation to the state or corporations. Any real emancipation attempt in the Indonesian countryside and beyond must start from a proper understanding of these class dynamics. This book marks a significant contribution to the literature on agrarian change, the political economy of development, rural development, and Marxist political economy. *Resources in Education*, 1976. *The Goslings* Upton Sinclair, 1924. Modern science has shown that within the child's soul lies magically locked up all the past of our race; also it is evident that within it lies all the future of our race. What our children are now being made is what America will be. Upton Sinclair. *The Goslings*. In *The Goslings: A Study of American Schools*, 1924. Upton Sinclair examines how American industry influences public schools, asserting that an invisible government of big business has taken over the charge of your children. The book describes the influence of industry with examples from schools of several major cities. Also included are sections that examine what and how a variety of forces shape education. It is one in a series of six books the author wrote analyzing American institutions from a socialist perspective. Other books in this muckraking Dead Hand collection include *The Profits of Religion* (religion, 1917), *The Brass Check* (journalism, 1919), *The Goose Step* (education, 1923), *Mammonart* (art, 1925), and *Money Writes* (literature, 1927), all available from Cosimo Classics.

Everyday Knowledge, Education and Sustainable Futures Margaret Robertson, Po Keung Eric Tsang, 2016-06-01. Everyday knowledge offers opportunities for better understanding of significant issues of our times. Reflecting these themes, this book places emphasis on community wisdom. The underpinning argument is that our instinctive urge for survival may not be enough if we do not share our collective knowledge and learn more about the everyday habits, beliefs, and actions of communities spread across the region. Contributions from researchers active within local communities help build knowledge capacity and support for collaborative research.

Hyman, 2008-08-01. Since the first shots rang out at Lexington and Concord, signaling the beginning of open war between the colonies and England, America has been credited with a singular conviction: a concern for military veterans and others' economic and political rights. The idea of America as a promised land of economic opportunity, social mobility, and political freedom has not always flourished. Historians have both given it reality and shaken its substance as they exposed an undercurrent of greed, class

conflict and corruption In this book Harold Hyman explores the question of American singularity using the Northwest Ordinance the Homestead and Morrill acts and the G I Bill to measure individual access to land education and law The Northwest Ordinance enacted in 1787 to encourage settlement of the nation s untamed territories mandated the establishment of public schools and stable property rights in newly settled lands specific terms which enshrined the basic liberties secured by the Revolutionary War Hyman shows that through the Homestead and Morrill acts of 1862 legislators sought to preserve the values of the Union and to prepare for the entrance of the black man into citizenship Equal access to public lands in the West and to state land grant universities countered the economic and social injustices blacks and poor whites would face after the Civil War Finally Hyman asserts that the G I Bill preserved beneficial social programs forged during the depression carrying into post World War II America a widespread concern for education and housing opportunities Examining the legislation that emerged from three periods of conflict in American history Hyman reveals a consistent pattern favoring equal access to land education and law a progression of singular if sometimes flawed attempts to embody in our statutes the values and aspirations that sparked our major wars **Western Journal of Education** ,1929
