Land Aridization And Drought Control:

Land Aridization and Drought Control Viktor Abramovich Kovda,1980 **Drought Management on Farmland**

Joan Sydney Whitmore,2013-03-14 At last integrated management of drought on farms is dealt with in one comprehensive book Although drought is a highly variable near universal natural phenomenon which has repercussions on a country's water and food supplies and many other sectors of the economy there are many ways of avoiding resisting and mitigating the effects of drought Pro active preparedness entails using the principles of risk management to upgrade the drought resistance of a farm systematically and to have auxiliary contingency plans at the ready for use during unusually long droughts The book provides tools for these strategies as it covers the management of water soils crops rangeland fodder and livestock and many other drought related topics Audience This book will be an important source of information for university and college staff and students in agricultural sciences water and land use environmental management geography and risk management and also farmers agricultural advisors and policy makers

Dying and Dead Seas Climatic Versus Anthropic Causes Jacques C.J. Nihoul,Peter O. Zavialov,Philip P. Micklin,2012-12-06 There are incentive indications that the growth of human population the increasing use and abuse of natural resources combined with climate changes probably due to anthropic pollution to some extent exert a considerable stress on closed or semi enclosed seas and lakes In many regions of the world marine and lacustrine hydrosystems are or have been the object of severe or fatal alterations from changes in regional hydrological regimes and or modifications of the quantity or the quality of water resources associated with natural or man made land reclamation deterioration of geochemical balances increased salinity oxygen's depletion mutations of ecosystems eutrophication dramatic decrease in biological diversity to geological disturbances and to the socio economic perturbations which have been or may be in the near future the consequences of them Seas and lakes are dying all over the world and some may be regarded as already dead and there is an urgent need to try to understand how this is happening and identify the causes of the observed mutations weighing the relative effects of climatic evolution and anthropic interferences This book is the outcome of the NATO Advanced Research Workshop held in Liege in May 2003 The Workshop was organized at the University of Liege as a follow on meeting to the 35 International Liege Colloquium on Ocean Dynamics dedicated in 2003 to Dying and Dead Seas The book contains the synthesis of the lectures given by 16 main speakers during the ARW

Management of Problem Soils in Arid Ecosystems A. Monem Balba,2018-05-02 Management of Problem Soils in Arid Ecosystems examines the challenges of managing soils in arid and semiarid regions These soils contain low organic matter are not leached and accumulate lime gypsum and or soluble salts requiring special management and practices This book discusses how to identify problems reclaim the soils and then use them efficiently and economically Water management and desertification in these areas are also discussed It contains extensive references as well as 40 tables and illustrations

Desertification Monique Mainguet,2012-12-06 After UNCED United Conference on Environment and Development Rio de

Janeiro July 1992 a second edition of Desertification was necessary About 150 corrections amendments and additions take scientific progress into account The author also presents an updated chapter in which the results of UNCED are analyzed This book aims at an understanding of what is commonly called desertification a term which is proposed to be replaced by land degradation Each level of technology excessive or insufficient creates its own mismanagement This is reflected in an increase in land degradation and eventually a decrease in soil productivity The benefit to the reader is an awareness of the ecozones and a global overview of the phenomena mechanisms and existing solutions

Water Resources in the Arid Realm Clive Agnew, Ewan Anderson, 2024-04-03 Originally published in 1992 this book dispels some of the myths that surround water resource problems of arid lands and the notion that there are simple once and for all solutions Population growth industrialization environmental mismanagement and land degradation have led to droughts poverty and famine with the result that the need for space food and key natural resources such as water has become the most critical issue in global development Nowhere is this crisis more apparent than in arid lands where water resources provide the key to economic and environmental development The authors argue that as the arid land environment is highly variable the key to success is flexibility The book is divided into four sections dealing with the geography of the arid realm the water resource problems they face the methods available for enhancing water supplies and finally management of this resource The book will be of use to undergraduate and postgraduate student and for those actively engaged in the development of arid land water resources

Natural Resources And Development In Arid Regions Enrique Campos-Lopez, 2019-03-08 In this book the authors integrate various perspectives on the evaluation of natural resources in arid and semiarid zones analyze development options and discuss systems analysis tools that could be important for the management of technology

Land Management in Arid and Semi-arid Areas, 1989 **Natural and Man-Made Hazards** Mohammed I. El-Sabh, Tad S. Murty, 2012-12-06 In recent years several major natural and man made hazards have challenged scientists government officials and the public in general earthquakes major volcanic and other seismic eruptions in Mount St Helens El Chichon Mexico city Nevado del Ruiz Japan Italy Greece Cameroon and many other places on our globe Tsunami in the Pacific Ocean and deadly storm surges along the coasts of India Bangladesh and Japan Cyclones floods thunderstorms snow storms tornadoes drought desertification and other climatic catastrophes Amoco Cadiz oil spill accident France Three Mile Island U S A and Chernobyl U S S R nuclear accidents Bhopal chemical accident India acid rain Canada U S A and other technological disasters Such hazards have snuffed out millions of lives infli

Advances in Soil Science, 2012-12-06 Soil degradation is clearly one of the most pressing problems facing man kind A continuation of soil degradation will eventually lead to a loss in crop productivity even though fertilizers and other inputs often result in increased yields in the short term Soil degradation also leads to environmental pollution A decrease in soil quality invariably leads to a decrease in water quality and often in air quality While there is a clear consensus that soil degradation is a major problem the literature on this subject leaves numerous

baffling questions If statistics on land degradation are correct there is a definite cause for concern and present a mammoth challenge for agricultural scientists There are those that say the scientific community has over dramatized this issue and created a credibility problem Consequently Volume 11 of *Advances in Soil Science* was organized by Dr Rattan Lal who is recognized as a leading authority on the subject The objective of Volume 11 was to assess the types and processes of soil degradation and establish some of the major cause effect relationships Volume II documented the seriousness of soil degradation in many parts of the world Therefore it seemed immediately important to devote a volume to the principles and technologies for restoring degraded soils to a productive status While the land resources are limited world population is rapidly increasing particularly in developing countries Dr **Eurasian Environments** Nicholas Breyfogle, 2018-11-06 Through a series of essays *Eurasian Environments* prompts us to rethink our understanding of tsarist and Soviet history by placing the human experience within the larger environmental context of flora fauna geology and climate This book is a broad look at the environmental history of Eurasia specifically examining steppe environments hydraulic engineering soil and forestry water pollution fishing and the interaction of the environment and disease vectors Throughout the authors place the history of Imperial Russia and the Soviet Union in a trans chronological comparative context seamlessly linking the local and the global The chapters are rooted in the ecological and geological specificities of place and community while unveiling the broad patterns of human nature relationships across the planet *Eurasian Environments* brings together an international group of scholars working on issues of tsarist Soviet environmental history in an effort to showcase the wave of fascinating and field changing research currently being written *Physics of desertification* F. El-Baz, M.H.A. Hassan, 2012-12-06 Deserts are parts of the Earth that receive little or no rain 25 cm or less per year The physical processes that act upon these parched lands are vastly different from those that shape the more humid parts of the terrestrial landmasses In the desert wind is a major agent of erosion and transportation As the results of recent space missions have indicated this is also true in the case of the planet Mars Thus our understanding of desert processes sheds light on fundamental planetary processes that may apply on any planetary body that is enveloped by a windy atmosphere An understanding of the physical layout of arid lands and the nature of processes that initiate changes therein is also fundamental to thoughtful utilization of these lands for the benefit of mankind It is with this in mind that we prepared this book for publication We believe that the collection of articles in this book will be useful to scientists who are interested in desert landforms and processes and to planners of economic development of arid lands The book also serves as a guide for students as to the state of our knowledge in this field as well as to the topics that require additional research **Biological Soil Crusts: Structure, Function, and Management** Jayne Belnap, Otto L. Lange, 2013-12-01 In arid lands where vegetation is sparse or absent the open ground is not bare but generally covered by a community of small highly specialized organisms Cyanobacteria algae microfungi lichens and bryophytes aggregate soil particles to form a coherent skin the biological soil crust It stabilizes and protects the soil surface

from erosion by wind and water influences water runoff and infiltration and contributes nitrogen and carbon to desert soils Soil surface disturbance such as heavy livestock grazing human trampling or off road vehicles breaks up the fragile soil crust thus compromising its stability structure and productivity This book is the first synthesis of the biology of soil crusts and their importance as an ecosystem component Composition and functioning of different soil crust types are discussed and case studies are used to show the impact of crusts on landscape hydrology soil stability nutrient cycles and land management

Water Resources and Agricultural Development in the Tropics Christopher J. Barrow, 2016-07-01 First published in 1988 There are many excellent texts on water supply and irrigation engineering irrigation economics agricultural development and the problems which often plague such efforts Few syntheses of such writings have been made despite a clear need for them from people interested in water resources and agricultural development students of geography economics development studies and agricultural management administrators planners and aid agency staff This book attempts to provide a broad interdisciplinary introduction for such people

other resources Subsequent chapters discuss water use in agriculture the mechanization of agriculture and food production the principles and practices that can make agriculture environmentally and economically sound and sustainable and the impact of population growth on the environment and food supply **Public Utility Rate Making In An Energy-Conscious Environment** Werner Sichel,2019-09-16 This collection of papers by some of America s most respected scholars and practitioners in the field of public utility regulation provides an up to date analysis of urgent problems and proposed remedies concerning the electricity and natural gas industries The authors two academic economists a professor of law a practicing attorney and consume **Bioremediation of Emerging Contaminants from Soils** Prasann Kumar,Veena Chaudhary,Eric D. van Hullebusch,Rosa Busquets,Arun Lal Srivastav,2024-05-09 Bioremediation of Emerging Contaminants from Soils Soil Health Conservation Along with Food Security deals with current challenges of sustainable soil health using eco friendly approaches This book provides ways of reducing the chemicals burden on the soil by maintaining balance in terms of society environment and economy which are considered basic pillars of sustainability Designed to highlight soil health best practices for both environmental and agricultural sustainability these approaches are also considered important for improving global food security by ensuring safe growing conditions for crops for food and feed Presented in two parts the book first highlights emerging contaminants and their sources The second part explores a variety of steps and tools for addressing contaminated soils including bio and phytoremediation options Case studies in each part provide real world insights for practical application This book will be unique in the specified area of sustainability using the principles of bioremediation Moreover scientists researchers and policymakers will receive insights to develop and explore innovate approaches to achieve sustainable development goals Contains the latest practical and theoretical aspects of the soil health crisis and its management Presents collective information to ensure the remediation of soil from emerging contaminants Serves as baseline information for environmental issues in agriculture along with their alternative eco friendly solutions
