**Blood in the Fields** Matthew Philipp Whelan, 2020-02-14 On March 24 1980 a sniper shot and killed Archbishop Oscar Romero as he celebrated mass Today nearly four decades after his death the world continues to wrestle with the meaning of his witness Blood in the Fields Oscar Romero Catholic Social Teaching and Land Reform treats Romero's role in one of the central conflicts that seized El Salvador during his time as archbishop and that plunged the country into civil war immediately after his death the conflict over the concentration of agricultural land and the exclusion of the majority from access to land to farm Drawing extensively on historical and archival sources Blood in the Fields examines how and why Romero advocated for justice in the distribution of land and the cost he faced in doing so In contrast to his critics who understood Romero's calls for land reform as a communist inspired assault on private property Blood in the Fields shows how Romero relied upon what Catholic Social Teaching calls the common destination of created goods drawing out its implications for what property is and what possessing it entails For Romero the pursuit of land reform became part of a more comprehensive politics of common use prioritizing access of all peoples to God's gift of creation In this way Blood in the Fields reveals how close consideration of this conflict over land opened up into a much more expansive moral and theological landscape in which the struggle for justice in the distribution of land also became a struggle over what it meant to be human to live in society with others and even to be a follower of Christ Understanding this conflict and its theological stakes helps clarify the meaning of Romero's witness and the way God's work to restore creation in Christ is cruciform

and political realities      *Collective Empowerment in Latin America* Gerardo Otero,Efe Can Gürcan,2024-06-20 This book develops a theory of collective empowerment that looks for change both from the bottom up in civil society and from the top down from state interventions responding to such pressure Reflecting on the advancement of Indigenous and peasant movements in Latin America since the neoliberal reformation of capitalism in the 1980s the book outlines a path for progressive social action in which bottom up pressure by social movements can help progressive parties to gain state power The book considers how Indigenous and peasant movements in Argentina Bolivia Brazil Ecuador and Mexico have tried to reshape crucial structures of society from the bottom up While this mobilization from below is critical and necessary the book argues that these movements must be supplemented by top down change from progressive state interventions as happened mostly in Bolivia and Brazil The authors conclude that progressive societal action can have massive impact in transforming some of the main socioeconomic structures that determine humans relation to the extraction of natural resources income and wealth inequality and even the location of a nation s insertion in world capitalism This book will be an important resource for social movement activists and for researchers working in political sociology sociological theory political studies development studies social movements and Latin American Studies      **State-Society Relations in Guatemala** Omar

**Social Movement Dynamics** Federico M. Rossi, Marisa von Bülow, 2016-03-03 This book presents an

overview of new approaches to the study of social movements emerging out of Latin America based on original and innovative analyses of the recent changes in collective action across the region Over the past decade new repertoires of contention have emerged in parallel to changes in the configuration of actors in previously established patterns of relationship between social movements and political institutions and in the shapes of collaborative networks both domestic and transnational The authors analyze a broad set of countries and social movements while focusing on three key theoretical debates the interactions between routine and contentious politics the relationship between protest and context and the organizational configurations of social movements The research agenda put forward by this book is neither defined nor restricted by geographical boundaries even though the chapters are based on field research undertaken in Latin America In doing so this volume contributes to a still underdeveloped dialogue in theory building in social movement studies among scholars from the South and from the North as well as among scholars specialized in different regions
