Transformations in Trade Politics Silke Trommer,2014-01-23 This book examines the evolution and application of participatory trade politics in West Africa and discusses the theoretical implications for political economy and global governance approaches to trade policy making The author traces the involvement of a network of West African global justice Non Governmental Organizations NGO local NGO and movement platforms and trade unions in the negotiations for an Economic Partnership Agreement with the European

Union Building on this empirical analysis she develops a theoretical framework of trade policy formation that is not limited to conceptualizing trade as a policy field aimed exclusively at regulating exporting and importing activities in the global economy. Instead she analyzes how material and ideational spheres interact in the way in which communities set the rules that enable them to trade across long distances. Attempting to reconcile demands for inclusivity with current economic policy making the author reframes the way in which we theoretically pose questions of who makes trade policy decisions through which mechanisms and why trade policy making practices change or resist change. Transformations in Trade Politics will be of interest to students and scholars of International Political Economy, Global Governance, Social Movement Studies, International Economic Relations, International Trade Relations, African Politics, The Politics of African International Development, EU politics and EU African Relations.

The Language of Global Development Marcin Solarz, 2014-07-11 Terms such as Third World, developing countries and Global South are ubiquitous in the discipline of development studies but they are often poorly defined, ideologically weighted and misleading. Taking an intellectual history approach this book examines the most commonly used spatial terms in the language of development, tracing their origins, meanings, evolution and processes of popularisation and demonstrating how geographical, political and economic concepts were used or misused in creating these terms. The book looks at the origins and the changing nature of fundamental development divisions from prehistoric times to the present day and analyses the process of conceptualising the contemporary North-South divide, focusing especially on the start of spatial development terminology in the twentieth century. It uses detailed maps to assist the reader in visualising the geographical complexities of these spatial terms and discusses more recently developed terms such as emerging markets and BRIC which are key to understanding the modern world. This book provides a valuable resource for students and researchers in development studies, international relations, geography, sociology and anthropology as well as practitioners in the field of development.

Global Labour and the Migrant Premium Tugba Basaran, Elspeth Guild, 2018-07-04 This book provides the first systematic account of the premium costs that migrants pay to live and work abroad. Reducing the costs of international labour migration, specifically worker-paid costs for low skilled employment, has become an important item on the global agenda over the last years and is particularly pertinent for the UN's Global Compact on Safe, Orderly and Regular Migration. Recruitment costs alone amount in most migration corridors to anywhere between one and ten months of foreign earnings and many migrants may well lose between one and two years of foreign earnings if all costs are considered. This book is intended as a primer for evidence-based policy for reducing the costs of international labour mobility. The contributors include academics from law, economics,

and politics but also authors from international organizations non governmental organizations as well as the voices of migrants The hope of the editors is that this small collection sets the basis for evidence based policies that seek to reduce the costs of international migration This book will be of interest to scholars and students of migration globalization law sociology and international relations as well as practitioners and policy makers *From Multimedia Services to Network Services* Andre Danthine,1997-12-05 This book constitutes the refereed proceedings of the 4th International COST 237 Workshop held in Lisboa Portugal in December 1997 of the European COST Programme on Multimedia Telecommunication Services The 12 revised full papers presented were selected from 24 submissions The topics covered include multimedia presentation QoS Control electronic commerce CORBA and DCE real time multimedia multimedia conferenceing multicast networking heterogeneous communications environments and others *Global Responsible Intergenerational Leadership* Julia M. Puaschunder,2018-01-01 Today s grand policy dilemmas from climate change to over indebtedness to demographic shifts have momentous long term implications Future generations will be constrained by our present decisions to an extent that is without precedent in advanced capitalist democracies This book is an extensively researched and reasoned appeal in favor of intergenerational fairness the ability to provide to future generations an at least as favorable standard of living as that enjoyed today Intergenerational equity is an essential consideration in finding lasting solutions to the multifaceted crises of our time As an implicit contract and transfer between living and future generations intergenerational equity avoids discriminating against future generations The book aims to theoretically define intergenerational equity and to frame it as a natural behavioral law capturing human ethicality bounds It follows a long and distinguished tradition of scholarly discourse in turning to natural law for solutions to major social predicaments Outlining some of the causes of the current intergenerational imbalances regarding climate change and over indebtedness it sets the basis for understanding their drivers and implications A central proposition is that the natural human drive towards intergenerational fairness can be the basis for the necessary behavioral responses the human imbued moral compass of natural law can be a useful complement if not alternative to public policy This book fills an important gap Despite a resurgence of literature the economic and social dimensions of intergenerational equity remain underexplored Existing literature misses a holistic ethical framework of decision making failures that addresses intergenerational concerns Whilst evolutionary grounded intergenerational fairness has not been recognized as a natural behavioral law a human imbued drive being bound by human fallibility Practical implications and recommendations in advancing an agenda for the advancement of intergenerational equity are provided Attention is drawn to the problem of providing the required leadership to promote the idea of intergenerational equity as a guiding principle in corporate social and policy action This book contributes both theoretical and practical insights and will be of interest to economists sociologists public policy makers and corporate executives tasked with tackling the most pressing contemporary challenges of mankind *Communication Power* Manuel Castells,2013-08-29 In this wide ranging

book Castells analyses the transformation of the global media industry by the revolution in communication technologies He argues that a new communication system mass self communication has emerged power relationships have been profoundly modified by the emergence of this new communication environment
