Global Social Movements:

Social Movements and Global Social Change Robert K. Schaeffer, 2014 Social Movements and Global Social Change teaches students not only about how social change occurs but also about how social movements can contribute to this change. The book links two concepts in sociology that are often related in real life but that can seem disconnected in traditional approaches to teaching these courses. The book examines different types of social movements including those often ignored in social change textbooks such as riots, migration, and disorganized protest. It also looks at citizens' rights and inequality in connection to social movements and change. The book features global perspectives and examples throughout. **Global**

Social Movements Continuum, 2004-11-01. Articles by Sarah Ashwin, Upendra Baxi, Jim Beckford, Cynthia Cockburn, John Forrester, Paul Havemann, Paul Lubeck, John Mattausch, Ronaldo Munck, Peter Newell, Deborah Stienstra, and Steven Yearley.

The New Global Politics Harry E. Vanden, Peter N. Funke, Gary Prevost, 2017-03-16. Over the past decade there has been an unprecedented mobilization of street protests worldwide from the demonstrations that helped bring progressive governments to power in Latin America to the Arab Spring to Occupy movements in the United States and Europe to democracy protests in China. This edited volume investigates the current status, nature, and dynamics of the new politics that characterizes social movements from around the world that are part of this revolutionary wave. Spanning case studies from Latin America, North and South Africa, the Middle East, Asia, Europe, and North America, this volume examines the varied manifestations of the current cycle of protest which emerged from the Global South and spread to the North and highlights their interconnections, the globalized nature of these social movements. Analytically converging around Sidney Tarrow's emphasis on protest cycles, political opportunity structures, and identity, the individual chapters investigate processes such as global framing, internationalization, diffusion, scale shifts, externalizations, and transnational coalition building to provide an analytic cartography of the current state of social movements as they are simultaneously globalizing while still being embedded in their respective localities. Looking at new ways of thinking and new forms of challenging power, this

comprehensive volume will be of great interest to graduates and scholars in the fields of globalization, social movements, and international politics. Social Movements in a Global Context Rod Bantjes, 2007. Social Movements in a Global Context focuses on interpreting the resurgence in popular protest for a growing audience of university students. Most of this new activity is either in response to or makes use of emerging global regimes; hence the book's emphasis on the global context as well as on strategies for trans-local mobilization. Equally important is the fact that the book adopts a Canadian perspective and highlights where possible Canadian case studies. The chapters are organized around an explanatory framework such as class analysis or a core analytical question. Some of the chapters deal with historical content but all make links to the immediate present and attempt to engage students in ongoing debates and struggles. The author makes connections between movements and the state, focusing on the dynamic of co-optation/coercion. The author also pays attention to the spatial

dimensions of movement formation and tactics which are particularly relevant in the present era of globalization Global Movement Ruth Reitan,2013-10-18 Critical research and theorizing on the Anti or Alter Globalization Movement has exploded over the last two decades This volume provides a platform for scholar activists themselves to share insights from engaged research and to critically reflect on movement histories and internal dynamics It also highlights ways in which activists are reaching beyond their geographical and issue boundaries to link with others in struggle to construct a broader global movement of the left and beyond Case studies span the social movement spectrum from more traditional concerns with class the primacy of the labor movement economic redistribution and justice through the so called new movements of identity and post materialist issues of peace the environment gender and indigenous struggles to the newest currents in post autonomy post anarchism and de or anti coloniality Together these studies show that what began in Chiapas with the Zapatista cry of basta ya as an anti globalization movement morphed for a time into alter globalization and global peace and justice and may now be emerging as a counter hegemonic project of and for global democratization This book was published as a special issue of Globalizations Local/global Social Movements Sandra Angeleri,2001 **Intending the World** Ralph Pettman,2008-03-15 How we look at the world is informed mainly by our assumptions and the ways in which we rationalise them Seldom do we rely or allow ourselves to rely on gut thinking or intuition Intending the World shows how rationalism which is our primary approach in thinking about world affairs is in crisis By studying the world rationally we objectify it and we look at it as detached from ourselves But in doing so we cease to see that we are using a perspective that limits as well as enlightens In a disciplinary first Ralph Pettman provides an account of twenty first century international relations in terms of phenomenology one of the main philosophical attempts to compensate for these limits He explores how this re embedded use of reason can successfully describe and explain world affairs in ways unused by rationalists Intending the World follows the lead of the German philosopher Edmund Husserl It looks at the world not only in terms of things in themselves but also in terms of why it is we keep willing the world the way we do Global Activism Reader Luc Reydam,2011-01-13 Suitable for undergraduate students this title combines essays on actual causes and issues that mobilize activists with theory and concepts of social mobilization It introduces the various causes actors and organization of transnational mobilization to provide a survey of cases and theory *Globalization from Below* Donatella Della Porta, Presenting the first systematic empirical research on the global justice movement Globalization from Below analyzes a movement from the viewpoints of the activists organizers and demonstrators themselves The authors traveled to Genoa with anti G8 protesters and collected data from more than 800 participants They examine the interactions between challengers and elites and discuss how new models of activism fit into current social movement work **Global Justice Movement** Donatella Della Porta,Massimiliano Andretta,Angel Calle,Helene Combes,Nina Eggert,Marco G. International Communism and Transnational Solidarity: Radical Networks, Mass Movements and Global Politics, 1919-1939 ,2016-11-21 This book provides an analysis of the articulation and organisation of radical international solidarity by organisations that were either connected to or had been established by the Communist International Comintern such as the International Red Aid the International Workers Relief the League Against Imperialism the International of Seamen and Harbour Workers and the International Trade Union Committee of Negro Workers The guiding light of these organisations was a radical interpretation of international solidarity usually in combination with concepts and visions of gender race and class as well as anti capitalism anti imperialism anti colonialism and anti fascism All of these new transnational networks form a controversial part of the contemporary history of international organisations Like the Comintern these international organisations had an ambiguous character that does not fit nicely into the traditional typologies of international organisations as they were neither international governmental organisations nor international non governmental organisations They constituted a radical continuation of the pre First World War Left and exemplified an attempt to implement the ideas and movements of a new type of radical international solidarity not only in Europe but on a global scale Contributors are Gleb J Albert Bernhard H Bayerlein Kasper Brask n Fredrik Petersson Holger Weiss **Social Movements for Global Democracy** Jackie Smith,2008-02-04 Honorable Mention 2010 Book Award Global Division Society for the Study of Social Problems Honorable Mention 2010 PEWS Book Award Political Economy of the World System section of the American Sociological Association This groundbreaking study sheds new light on the struggle to define the course of globalization Synthesizing extensive research on transnational activism Social Movements for Global Democracy shows how

transnational networks of social movement activists democratic globalizers have worked to promote human rights and ecological sustainability over the predominant neoliberal system of economic integration Using case studies of recent and ongoing campaigns for global justice Jackie Smith provides valuable insight into whether and how these activists are succeeding She argues that democratic globalizers could be more effective if they presented a united front organized around a global vision that places human rights and ecological stability foremost and if they were to directly engage governments and the United Nations Illuminating the deep seated struggles between two visions of globalization Smith reveals a network of activists who have long been working to democratize the global political system The New Transnational Activism Sidney Tarrow,2005-08 The New Transnational Activism shows how even the most prosaic activities like immigrants bringing remittances back to their families can assume broader political meanings when they provide ordinary people with the experience of crossing transnational space This means that we cannot be satisfied with defining transnational activists through the ways they think The defining feature of transnationalism in this book is relational and not cognitive This emphasis on activism s relational structure means that even as they make transnational claims transnational activists draw on the resources the networks and the opportunities in which they are embedded and only then if at all on more distant transnational links Contending Perspectives on Global Governance Alice D. Ba,Matthew J. Hoffmann,2006-05-17 Global governance is fast becoming a ubiquitous phrase succeeding globalization as the latest buzz term But exactly what does it mean For many scholars and policymakers the term captures important aspects of world politics This unique volume delivers and compares the key perspectives of the leading thinkers in the area equipping the reader with an excellent understanding of the debate now defining and mapping the future of this term This comparative approach is underpinned by a lucid theoretical framework which guides the reader towards building a clear sense of the debate and its complexities A wide range of empirical issues are covered including those of Security International Political Economy Environment Human Rights Social Movements and Regulation Including theorists of social constructivism liberal imperialism and realism this is an essential book for students and scholars which stimulates discussion and presents a fully rounded picture of global governance Global Civil Society and Transversal Hegemony Karen M. Buckley,2013-05-29 There has been clear recognition of tendencies towards uncritically celebrating resistance and the need for critical appraisal within the literature on globalization and contestation This book provides a conceptual history of global civil society and a critical examination of the politics of resistance in the global political economy It uses a dialectical method of analysis to illustrate the conceptual stasis of mainstream approaches to questions of globalization and contestation while demonstrating the potential of a Gramscian approach to reconstitute hegemony as a key analytical and explanatory tool Buckley offers insight to the movements of transversal hegemony and existent and anticipated modes of social relation through the case studies of the World Social Forum and the World People s Conference on Climate Change Offering a more comprehensive understanding of
