Global Transformations Reader:

The Global Transformations Reader David Held, Anthony G. McGrew, 2000 **Global Transformations Reader** David Held, Anthony McGrew, 2003-08-08

The world is changing dramatically and a vigorous public debate is under way about the nature and historical significance of these changes. At the centre of this debate lie conflicting claims about the extent, form and consequences of contemporary globalization. On the one hand there are the globalists who argue that the world is being fundamentally and irreversibly transformed by globalization. On the other hand there are the sceptics who believe that the globalists' claims are exaggerated and poorly substantiated. The sceptics contest the very idea of globalization, arguing that the power of national governments, nationalism and geopolitics remain the determining features of our age. This completely revised and fully updated edition of *The Global Transformations Reader* brings together the most original contributions from both sides of the argument and from a range of disciplines. Many new chapters have been added which incorporate the most recent developments in the debate and set these in the context of a global order that is in a constant state of flux. Organized as an accessible and comprehensive teaching text, the Reader is divided into six sections covering all the key issues in the debate: controversy over the meaning, causes and historical significance of globalization; the transformation of state power and civil society; changing patterns of national culture; the power of global markets; global inequality and its consequences; and the nature of the global order and normative aspirations for its future. The volume includes an extensive introduction by the editors reviewing, analysing and assessing the globalization debate. Short but highly informative introductions to each section situate and contextualize the individual readings. This Reader will be of immense value to all those interested in one of the most important debates of our time. It will appeal to students of politics, international relations, economics, sociology, geography, business studies and cultural studies. *The Global Transformations Reader* is part of the internationally acclaimed series on globalization which also includes *Global Transformations: Politics, Economics and Culture* and *Governing Globalization: Power, Authority and Global Governance*.

chapters **Encountering Education in the Global** Fazal Rizvi, 2014-02-03 In the World Library of Educationalists international experts compile career long collections of what they judge to be their finest pieces extracts from books key articles salient research findings major theoretical and practical contributions so the world can read them in a single manageable volume Readers will be able to follow the themes and strands and see how their work contributes to the development of the field This volume brings together the selected works of Fazal Rizvi Born in India Fazal Rizvi has lived and worked in a number of countries including Australia England and the United States Most of his educational encounters have been in the global He has developed a keen sense of the multiple and conflicting ways in which transnational ties and interactions are transforming the spaces in which identities and cultures are forged and performed and in which education takes place Much of his research has sought to examine how educational systems around the world have interpreted and responded to the challenges and opportunities of globalization In this collection of his papers written over a period of more than two decades Fazal Rizvi seeks to understand the shifting discourses and practices of globalization and education critically examining the ways in which these are reshaping our sense of identity and citizenship and our communities creating transnational systems of ties networks and exchange taken into account in the development of policies and programs of educational reform producing uneven social effects that benefit some communities more than others Fazal Rizvi's analysis shows how recent global transformations have mostly been interpreted through the conceptual prism of a neo liberal imaginary that have undermined education's democratic and cosmopolitan possibilities **Physical Culture, Power, and the Body** Patricia Vertinsky, Jennifer Hargreaves, 2006-11-28 During the past decade there has been an outpouring of books on the body in society but none has focused as specifically on physical culture that is cultural practices such as sport and dance within which the moving physical body is central Questions are raised about the character of the body specifically the relation between the natural body the constructed body and the alien or virtual body The themes of the book are wide in scope including physical culture and the fascist body sport and the racialised body sport medicine health and the culture of risk the female Muslim sporting body power and politics experiencing the disabled sporting body embodied exhibitions of striptease and sport the social logic of sparring sport girls and the neoliberal body Physical Culture Power and the Body aims to break down disciplinary boundaries in its theoretical approaches and its readership The author's multi disciplinary backgrounds demonstrate the widespread topicality of physical culture and the body **The Political Power of Global Corporations** John Mikler, 2018-02-12 We have long been told that corporations rule the world their interests seemingly taking precedence over states and their citizens Yet while states civil society and international organizations are well drawn in terms of their institutions ideologies and functions the world's global corporations are often more simply sketched as mechanisms of profit maximization In this book John Mikler re-casts global corporations as political actors with complex identities and strategies Debunking the idea of global corporations as exclusively profit driven entities he shows how they

seek not only to drive or modify the agendas of states but to govern in their own right He also explains why we need to re territorialize global corporations as political actors that reflect and project the political power of the states and regions from which they hail We know the global corporations names we know where they are headquartered and we know where they invest and operate Economic processes are increasingly produced by the control they possess the relationships they have the leverage they employ the strategic decisions they make and the discourses they create to enhance acceptance of their interests This book represents a call to study how they do so rather than making assumptions based on theoretical abstractions

Global Activism Ruth Reitan, 2012-08-21 This comprehensive study traces the transnationalization of activist networks analyzing their changing compositions and characters and examining the roles played by the World Social Forum in this process Comparing four of the largest global networks targeting the neoliberal triumvirate of the World Bank the IMF and the World Trade Organization the Jubilee anti debt campaigners Via Campesina peasant farmers Our World Is Not For Sale and the anarchistic Peoples Global Action Written by a scholar activist the book highlights that despite their diversity these collective actors follow a similar globalizing path and that networks in which solidarity is based on a shared identity perceived as threatened by neoliberal change are gaining strength Social forums are depicted as a fertile ground to strengthen networks and a common ground for cooperative action among them but also a battleground over the future of the forum process the global anti neoliberal struggle and other possible worlds in the making Global Activism will appeal to students and scholars interested in globalization international relations IPE and social movements
