militant new labour movements are emerging Drawing upon insights in anti determinist Marxian perspectives Verity Burgmann shows how working class resistance is not futile as protagonists of globalization often claim She identifies eight characteristics of globalization harmful to workers and describes and analyses how they have responded collectively to these problems since 1990 and especially this century With case studies from around the world including Greece since 2008 she pays particular attention to new types of labour movement organization and mobilization that are not simply defensive reactions but are offensive and innovative responses that compel corporations or political institutions to change Aging and less agile manifestations of the labour movement decline while new expressions of working class organization and mobilization arise to better battle with corporate globalization This book will be of interest to students and scholars of labour studies globalization political economy Marxism and sociology of work Unions and Globalization Peter Fairbrother, John O'Brien, Anne Junor, Michael O'Donnell, Glynne Williams, 2011-09-06 Innovative and offering a sociological analysis of trade unionism in the globalized era this book provides a robust and coherent comparative analysis of the debate surrounding trade unions and their renewal Globalization and Labor Dimitris Stevis, Terry Boswell, 2008 Unions have long been a central force in the democratization of national and global governance and this timely book examines the role of labor in fighting for a more democratic and equitable world In a clear and compelling narrative Dimitris Stevis and Terry Boswell explore the past accomplishments and the formidable challenges still facing global union politics The authors consider whether global union politics has become more active and more influential or has failed to rise to the challenge of global capitalism All readers interested in global organizations governance and social movements will find this deeply informed work an essential resource **Globalisation contested** Louise Amoore, 2013-07-19 This electronic version has been made available under a Creative Commons BY NC ND open access license This exciting book provides an illuminating account of contemporary globalisation that is grounded in actual transformations in the areas of production and the workplace It reveals the social and political contests that give global its meaning by examining the contested nature of globalisation as it is expressed in the restructuring of work Rejecting conventional explanations of globalisation as a process that automatically leads to transformations in working lives or as a project that is strategically designed to bring about lean and flexible forms of production this book advances an understanding of the social practices that constitute global change Through case studies that span from the labour flexibility debates in Britain and Germany to the strategies and tactics of corporations and workers the author examines how globalisation is interpreted and experienced in everyday life Contestation she argues is about more than just direct protests and resistances It has become a central feature of the practices that enable or confound global restructuring This book offers students and scholars of international political economy sociology and industrial relations an innovative framework for the analysis of globalisation and the restructuring of work *Globalisation and Labour* Ronaldo Munck, 2002-07 Intellectual fashion likes to see us as consumers but the world of production and services still needs workers

Globalization has been driven by the transnational corporations search for cheap labour but little attention has been paid to the consequent changes in the world of work Ronaldo Munck argues that the national period in labour history is decisively over *Globalization, Social Movements, and the New Internationalism* Peter Waterman, 2010-06-15 In a political climate where loose talk of a third way passes for political idealism Waterman's passionate book examines the possibilities for a new style global solidarity suited to complex capitalist modernity The author examines the past internationalism of Labour and socialists and the present one of radical democratic social movements discussing how the Left might build on this experience to recover a humanist and emancipatory tradition of internationalism which would address our multiple global social problems

Work and Employment in the High Performance Workplace Giles Anthony, Jacques Belanger, Paul-Andre Lapointe, Gregor Murray, 2013-10-11 There is a general consensus that deep seated changes are reshaping the way production and work are organized the way employees employers and their representatives deal with each other and the way governments seek to shape society In this work a group of leading scholars take stock of the evidence and implications of the new workplace Drawing on examples from a variety of national contexts they seek to characterize the nature of contemporary workplace change and assess its implications for the organization of work for workers for employment relations and for public policy

Vocational Training Gerhard Bosch, Jean Charest, 2009-09-10 The last decade has given rise to a strong public discourse in most highly industrialized economies about the importance of a skilled workforce as a key response to the competitive dynamic fostered by economic globalisation The challenge for different training regimes is twofold attracting young people into the vocational training system while continuing to train workers already in employment Yet on the whole most countries and their training systems have failed to reach those goals How can we explain this contradiction Why is vocational training seen to be an old institution Why does vocational training not seem to be easily adapted to the realities of the 21st century This book seeks to respond to these important questions It does so through an in depth comparative analysis of the vocational training systems in ten different countries Australia Canada Denmark France Germany Korea Mexico Morocco the United Kingdom and the USA

Industrial Relations in Education Bob Carter, Howard Stevenson, 2009-12-30 All phases of education from pre school to post compulsory in virtually all parts of the world have experienced unprecedented reform and restructuring in recent years Restructuring has largely been driven by a global agenda that has promoted the development of human capital as the key to economic competitiveness in the global market This book adopts an inter disciplinary approach drawing not

only on education research but also from the fields of industrial sociology management studies and labour process theory to locate the reform agenda within a wider picture relating to teachers their professional identities and their experience of work In doing so the book draws on critical perspectives that seek to challenge orthodox policy discourses relating to remodelling Illustrating of how education policy is shaped by discourses within the wider socio political environment and how unionization and inter organizational bargaining between unions exerts a decisive but often ignored influence on policy development at both a State and institutional level this book is a must read for anyone researching or studying employment relations
