Globalization And The Margins:

Globalization and the Margins R. Grant, J. Short, 2002-09-06 Globalization has become one of the dominant ideas of recent times However is the debate on globalization as global as it ought to be In this book Grant and Rennie Short have brought together prominent experts in the field to consider how globalization affects marginalized countries and groups A variety of case studies provide a unique assessment of the issue of globalization and offer a new look at the relationship between the global and the local

Globalization on the Margins Iveta Silova, 2011-01-01 The essays in *Globalization on the Margins* explore the continuities and changes in Central Asian education development since the collapse of the Soviet Union in 1991 Reflecting on two decades of post socialist transformations they reveal that education systems in Central Asia responded to the rapidly changing political economic and social environment in profoundly new and unique ways Some countries moved towards Western models others went backwards and still others followed entirely new trajectories Yet elements of the old system remain Rather than viewing these post Soviet transformations in isolation *Globalization on the Margins* places its analyses within the global context by reflecting on the interaction between Soviet legacies and global education reform pressures in the Central Asian countries of Kazakhstan Kyrgyzstan Tajikistan Turkmenistan and Uzbekistan Instead of portraying the transition process as the influx of Western ideas into the region the authors provide new lenses to critically examine the multidirectional flow of ideas concepts and reform models within Central Asia Notwithstanding the variety of theoretical perspectives methodological approaches and conceptual lenses the authors have one thing in common both individually and collectively they reveal the complexity and uncertainty of the post Soviet transformations By highlighting the political nature of the transformation processes and the uniqueness of historical political social and cultural contexts of each particular country *Globalization on the Margins* portrays post Soviet education transformations as complex multidimensional and uncertain processes

Language and Culture on the Margins Sjaak Kroon, Jos Swanenberg, 2018-10-03 This collection of thirteen essays examines sociolinguistic phenomena in a wide variety of marginal environments providing both an overview of globalization on the margins and a foundation for an expanded understanding of the processes of linguistic and cultural changes at work in these settings Taking an expansive conceptual view of margins the volume is organized in three parts looking at examples of marginal spaces in the nation state in online environments and in the peripheries of urban locations globally to call attention to new and changing discursive genres patterns practices and identities emerging in these spaces as a result of contemporary mobilities the evolving global economy and socio political changes With previous research previously confined to the study of globalization in urban areas this volume opens the door for further research on the complex sociolinguistic processes resulting from globalization on the margins making this an ideal resource for students and scholars in sociolinguistics globalization and heritage studies new media anthropology and cultural studies The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution

CC BY **The SAGE Companion to the City** Tim Hall, Phil Hubbard, John Rennie Short, 2008-05-21 This book pulls together an exceptional range of literature in addressing the complexity of contemporary patterns and processes of urbanization. It offers a rich array of concepts and theories and is studded with fascinating examples that illustrate the changing nature of cities and urban life. Paul Knox, Virginia Tech University. The SAGE Companion to the City is a tour de force of contemporary urban studies. At once a stocktake showcase and springboard for scholarly approaches to cities and city life, the editors have assembled a cohesive and convincing set of lucid, insightful and critical essays of great quality. Eschewing grand theory and deadening encyclopaedism, the contributors refresh both longstanding concerns and explore new themes in ways both brilliantly accessible to newcomers and satisfying to the cognoscenti. Robert Freestone, University of New South Wales. Organized in four sections, The SAGE Companion to the City provides a systematic A-Z to understanding the city that explains the interrelations between society, culture and economy. *Histories* explores power, religion, science and technology, modernity and the landscape of the city. *Economies and Inequalities* explores work and leisure, globalisation, innovation and the role of the state. *Communities* explores migration and settlement, segregation and division, civility, housing and homelessness. *Order and Disorder* explores politics and policy, planning and conflict, law and order, surveillance and terror. An accessible guide to all areas of urban studies, the text offers both a contemporary cutting edge reflection and measured historical and geographical reflection on urban studies. It will be essential reading for students of any discipline interested in the city as an object of study. Urban Theory John Rennie Short, 2017-08-24 This wide-ranging and state-of-the-art new edition reviews the classic contributions to understanding modern and post-modern cities and is comprehensively updated to take account of the issues and concepts at stake in 21st-century urban theory. **Transnationalism** Eliezer Ben Rafael, Yitzhak Sternberg, 2009 This book deals with transnationalism and captures its singularity as a generalized phenomenon. The profusion of transnational communities is a factor of fluidity in social orders and represents confrontations between contingencies and basic socio-cultural drives. It has created a new era different from the past at essential respects. This is an age of enriching cultural diversity fraught with threatening risks inextricably linked to contemporary globalization. National sovereignty is eroded from above by global processes, from below by aspirations of sub-national groups and from the sides by transnational allegiances. This is the backdrop against which this book delves into the fundamental issues relating to the nature, scope and overall significance of transnationalism. **Preaching in an Age of Globalization** Eunjo Mary Kim, 2010-01-01 There are many books on the market that address how culture, race, gender or economic status affect the way preachers preach and congregations hear sermons. This is the first book to address preaching that promotes solidarity across these differences. Preaching needs to be targeted to specific contexts. But how can a preacher handle specific contexts when we live in a globalized world? What does local context mean and who defines it? Kim develops the concept of trans-contextual preaching to show how preachers can respect diversity and global connections. She develops a new theology of preaching.

examines the modes of biblical interpretation appropriate for trans contextual preaching and explores designs for sermons Sample sermons from the author provide excellent illustrations Spatial Turns Jaimey Fisher, Barbara Caroline Mennel, 2010 The phrase spatial turns signals the growing importance of space as an analytical as well as representational category for culture The volume addresses such emerging modes of inquiry by bringing together for the first time essays that engage with spatial turns spatiality and the theoretical implications of both in the context of German culture history and theory Migrating from fields like geography urban studies and architecture the new centrality of space has transformed social science fields as diverse as sociology philosophy and psychology In cultural studies productive analyses of space increasingly cut across the studies of literature film popular culture and the visual arts Spatial Turns brings together essays that apply a spatial analysis to German literature and other media and engages with specifically German theorizations of space by such figures as Siegfried Kracauer and Walter Benjamin The volume is organized in four sections Mapping Spaces addresses cartography in all forms and in its intersection with culture Spaces of the Urban takes up one of the key sites of spatial studies the city Spaces of Encounter considers how Germany has become a contact zone for multiple ethnicities and Visualized Spaces concerns the theorization of space in film and new media studies **Anthropologica**, 1997

Globalization and Urban Development Harry W. Richardson, Chang-Hee C. Bae, 2005-07-06 Most research on globalization has focused on macroeconomic and economy wide consequences This book explores an under researched area the impacts of globalization on cities and national urban hierarchies especially but not solely in developing countries Most of the globalization urban research has concentrated on the global cities e g New York London Paris Tokyo that influence what happens in the rest of the world In contrast this research looks at the cities at the receiving end of the forces of globalization The general finding is that large cities on balance benefit from globalization although in some cases at the expense of widening spatial inequities *Trade Investment and Development in the Contemporary Caribbean* Bhoendradatt Tewarie, Roger Hosein, 2007 Small open economies like those making up the countries of the Caribbean region share a number of fundamental problems of economic management which ultimately affect the entire development process Co authors Bhoendradatt Tewarie and Roger Hosein use Trinidad and Tobago and the management of its energy resources as a case study to examine some of the development challenges that face countries of the region They make the point that in spite of that country's abundant energy resources which has allowed it to grow at a comparatively rapid rate Trinidad and Tobago like lesser endowed CARICOM partners has had to cope with challenges such as diversification human development managerial capacity and institutional weakness all of which contributed to seven consecutive years of decline between 1983 and 1990 Not only is the availability of resources no guarantee for economic success it also creates unique problems and in the case of Trinidad and Tobago this is manifested in uneven development in the energy sector compared to other sectors of the economy and society While the volume focuses on Trinidad and Tobago there is ample discussion of a range of issues that

affect the entire region extending from trade within CARICOM to globalization open regionalism relations with the United States human capital formation and the role of education systems and educational policy in the development process Tewarie and Hosein combine their talents and research in the areas of economics culture education literature trade and investment and development generally to produce a volume that is rich in data and insights into the development process

Varieties of Capitalism Thomas Palley, Esteban Pérez Caldentey, Matías Vernengo, 2023-01-17 Over the past twenty years there has emerged a compelling new discourse on varieties of capitalism That discourse has an appealing common sense which challenges the view there is no alternative to free market capitalism The initial view had a microeconomic focus that made firms the fulcrum of analysis It distinguished between liberal market and coordinated market economies Subsequently there has emerged a second generation literature which adopts a macroeconomic perspective that emphasizes differences in drivers of growth This book provides a collection of essays that engage those second generation concerns and questions

Illicit Trade and the Global Economy Cláudia Costa Storti, Paul de Grauwe, 2012 Economists explore the relationship between expanding international trade and the parallel growth in illicit trade including illegal drugs smuggling and organized crime As international trade has expanded dramatically in the postwar period an expansion accelerated by the opening of China Russia India and Eastern Europe illicit international trade has grown in tandem with it This volume uses the economist's toolkit to examine the economic political and social problems resulting from such illicit activities as illegal drug trade smuggling and organized crime The contributors consider several aspects of the illegal drug market including the sometimes puzzling relationships among purity price and risk the effect of globalization on the heroin and cocaine markets examined both through mathematical models and with empirical data from the U K the spread of khat a psychoactive drug imported legally to the U K as a vegetable and the economic effect of the war on drugs on producer and consumer countries Other chapters examine the hidden financial flows of organized crime patterns of smuggling in international trade Iran's illicit trading activity and the impact of mafia like crime on foreign direct investment in Italy

Turkey and the Global Economy Ziya Onis, Fikret Senses, 2009-10 Since the financial crisis of 2000 and 2001 the Turkish economy has undergone considerable change and some improvement This book gives a detailed examination of the neo liberal restructuring that has taken place and the challenges the economy still faces providing a comparative perspective on recent reforms and the position of Turkey in the global economy This book examines all major aspects of the post crisis economic performance of the Turkish economy Major sectors of the economy such as agriculture and manufacturing along with key issues such as privatization export growth developments in the labour market poverty and social exclusion are analysed in detail The authors consider Turkish performance from a comparative perspective drawing attention to its similarities with the experience of other emerging markets Providing an insight into the major difficulties of post crisis adjustment sustainability of the gains achieved so far and the challenges that lie ahead this book will be of interest to academics and scholars in the

fields of International Political Economy and Globalization Studies Middle East Studies and Development Studies as well as having significance for practitioners in emerging markets

The European Community and the Globalization of Technology and the Economy Riccardo Petrella, Massimo G. Colombo, 1994

Meeting Globalization's Challenges Luís Catão, Maurice Obstfeld, 2019-11-05

In the US in Europe and throughout the world globalization in tandem with technological progress has left a massive number of people behind feeling dispossessed disenfranchised and angry Leading the charge of hyperglobalization during the second half of the last century and enforcing the Western framework of austerity in the developing world has been the International Monetary Fund Along with the World Bank and WTO many consider the IMF one of the most consequential institutions to have pushed the world economy blindly towards excessive globalization while not adequately considering its powerful negative consequences In October 2017 however the IMF convened with some of the world's most celebrated economists and experts on trade and globalization to have an honest discussion on the most pressing concerns the world faces today as a result of globalization and how to address the extensive challenges it has created Edited by chief economist Maurice Obstfeld and senior economist Luis Catao of the IMF the book brings together a team of respected senior economists with the most promising younger scholars to address five major themes how globalization affects economic growth and social welfare potential political implications of an honest discussion of globalization and that free trade may not be politically viable free trade's role in global inequality how workers adjust or not when they are dislocated by globalization and how trade policy influences the way countries develop their economies and societies The book could represent a historic milestone at which the world's top economists and policymakers have an unprecedented honest debate about the real costs and consequences of globalization

A Handbook of Primary Commodities in the Global Economy Marian Radetzki, Linda Wårell, 2020-11-26

The dramatic price falls of 2014-2015 marked the end of the most powerful and enduring commodity boom since the Second World War Now in its third edition this book acts as a guide to the ins and outs of the primary commodity universe Updates to this edition reflect on the consequences of both China's economic slowdown as its industrialization enters a new less commodity demanding phase and changes in the USA's trade policy under the Trump administration Additionally this edition takes into account recent developments in world oil markets and examines the effects of increased climate concerns The authors introduce and explain pertinent issues surrounding international commodity markets such as the global geography of raw materials price formation price trends the role of commodity exchanges the threat of depletion cartel action state ownership emerging commodity nationalism and more

Journeys at the Margin Jung Young Lee, 1999

Being an immigrant is both being in between two cultures that of the immigrant and that of the dominant group and being in both of these cultures It ultimately means being in beyond the two cultures together In this book a group of prominent Asian American Christian theologians reflect in an autobiographical form on how being an Asian and a North American has shaped the way they understand the Christian story As the United States becomes

increasingly multiethnic and multicultural this book offers useful suggestions on how to meet the challenge of cultural diversity in both Church and society
