Glossary Of Meteorology:

Glossary of Meteorology Ralph E. Huschke, 1959 *Glossary of Meteorology* Todd S. Glickman, American Meteorological Society, 2000 This electronic version of the 2nd Edition of the Glossary of Meteorology is meant to be a living document to be periodically updated as terms in our field evolve Has over 12 000 meteorological terms [Glossary of Weather and Climate](#) Ira W. Geer, 1996 **Glossary of Meteorology** Ralph E. Hirschke, 1959 **A Comprehensive Glossary of Weather Terms for Storm Spotters** Michael L. Branick, 1993-05 **Meteorological Glossary** Great Britain. Meteorological Office, 1972 PREFACE TO THE FIFTH EDITION When in 1967 the Meteorological glossary came under consideration for reprinting it was decided to ask Dr McIntosh to undertake a revised edition with cooperation from within the Meteorological Office The opportunity has been taken in this edition to delete some terms which are considered no longer appropriate and to include various new entries and revisions which stem from recent advances and practice Units of the Systeme International have been adopted in this edition In some cases however the traditional British or metric units are also included because of existing World Meteorological Organization recommendations and for the convenience of user interests during the period before complete national and international adoption of SI units Meteorological Office 1970 PREFACE TO THE FOURTH EDITION In 1916 during the directorship of Sir Napier Shaw the Meteorological Office published two pocket size companion volumes the Weather map to explain how weather maps were prepared and used by the forecasters and the Meteorological glossary to explain the technical meteorological terms then employed With the advance of the science and the elaboration of its techniques the publications have been in continuous demand many times reprinted and on several occasions completely revised The second edition was in 1930 the third in 1938 39 and soon after World War II it was obvious that radical revision was necessary once again In 1956 the fourth edition of the Weather map was issued but for the first time in forty years it was not found possible to prepare simultaneously a new edition of the Meteorological glossary which had become very much out of date and in need of a complete remodeling For earlier editions the task had been shared amongst the professional staff of the Office and the result was an interesting and up to date volume containing much useful information although the freedom allowed to the many contributors had led to a unique volume of quite uneven character with articles varying from brief dictionary definitions to encyclopedic essays For the fourth edition the number of new entries was to be larger than ever before and it was decided that the need was now for a more systematic reference work containing a brief definition of all the terms in ordinary use rather than for a compilation of miscellaneous articles giving information which would more properly be looked for in one of the many modern textbooks For this purpose a single author assisted if need be by expert referees would it seemed be advantageous and the Office was fortunate in finding in Dr D H McIntosh of the University of Edinburgh a physicist and meteorologist of wide experience willing to undertake the major task Before being passed for printing every article has been read critically by more than one member of the scientific staff of the Office

and Dr McIntosh has shown a remarkable readiness to compromise In this way it is hoped that the excellence of the author s original draft has been fully retained while providing a work which will adequately meet the needs of the official service It would however be too much to hope that no further improvement will be possible and the Office will be pleased to receive from any source criticisms and suggestions calculated to increase the value of the work not only for the professional meteorologist but for interested people everywhere Meteorological Office 1962 **Glossary of Meteorology** American Meteorological Society, Todd S.
