Half Light:

HalfLight Gin Hollan, 2016-06-30 She just wants a normal life but as a phase shifter things are always complicated Her friends each seem to hide a secret but hers could get them all killed Dylan has a problem she is only as solid as the light around her and she doesn't know how she does it Whether by instinct or desire she seeks out the shadows and other dark places that let her disappear It helped in her job as a Night Courier delivering high value black market packages to unnamed people It made her unstoppable rare and valuable Turning to smoke or vapour would seem like a good thing when it happens in dark and dangerous places but she feared losing herself to it She enlists the help of a former police officer to help her leave the life of shadows and danger behind Unaware of her true identity he changes Dylan's name to Simone and assigns her a babysitting job watching over a cafe owner name Carol As Simone she works as a waitress hoping to keep her own secret while helping those around her and finding a semblance of a normal life As she discovers more mysteries around her she wonders if anyone truly has a normal life When she meets a man with the ability to negate her mutation she is intrigued but he seems to be more of a complication than friend He can track her and finds ways to interfere with what she's doing She can't tell if it's intentional or why and how he finds her Now Dylan has more secrets than she knows what to do with and her past has tracked her down

Radioisotopic Methods in Hydrobiology Yuri I. Sorokin, 2012-12-06. Aquatic environments, marine and freshwater basins are increasingly subject to anthropogenic stresses. Likewise there is an increasing demand for better and more reliable methods for the monitoring and assessment of these large and important ecosystems and the interrelations between the physical and chemical features of water bodies. The use of radioisotopic techniques offers a wide range of methodological possibilities because all biologically active compounds contain long living radioisotopes which make the analytical field and laboratory work possible without the precautions involved in direct radiation health hazards.
