Families in the U.S. Karen V. Hansen, Anita Iltis Garey, 1998. Attempts to do justice to the complexity of contemporary families and to situate them in their economic, political, and cultural contexts. This book explores the ways in which family life is gendered and reflects on the work of maintaining family and kin relationships, especially as social and family power structures change over time.

Negotiated Care Margaret Nelson, 2010-03-29. Weaving together numerous richly detailed interviews and surveys with recent feminist literature on the role of caregiving in women's lives and investigations of women's involvement in home-based work, this book explores the daily lives of family day care providers. Margaret K. Nelson uncovers the dilemmas providers face in their relationships with parents who bring children to them, with the children themselves, with the providers' family members, and with representatives of the state's regulatory system. She links these dilemmas to the contradiction between an increasing demand for personalized, cheap, informal child care services and a public policy that subjects child care providers to public scrutiny while giving them limited material and ideological support. Nelson's discussions with day care providers reveal considerable tensions that emerge over issues of control and intimacy. The dual motivation of business and family gives rise to problems such as how to maintain enough distance from the parents to set limits on hours while providing personal service in a family setting. Family day care providers often enter this occupation as a way to engage in paid work and meet their own child care responsibilities. This book looks at how they manage to negotiate a setting that simultaneously involves money, trust, and caring. Family day care represents one of the most prevalent sources of child care for working parents. It is an especially common form of care for very young children, yet it remains little studied. In the popular press, stereotypes, many of them negative, prevail. This book substitutes a thorough, detailed examination of this child care setting from a perspective that has generally been ignored: that of the caregiver. While providing useful insights into the role of caregiving in women's lives and the phenomenon of home-based work, it contributes to the ongoing policy debates about child care. In the series *Women in the*

Paradoxes of Gender Judith Lorber, 1994-01-01 In this pathbreaking book a well known feminist and sociologist who is also the Founding Editor of Gender why transvestites transsexuals and hermaphrodites do not affect the conceptualization of two genders and two sexes in Western societies why most of our cultural images of women are the way men see them and not the way women see themselves why all women in modern society are expected to have children and be the primary caretaker why domestic work is almost always the sole responsibility of wives even when they earn more than half the family income why there are so few women in positions of authority when women can be found in substantial numbers in many occupations and professions why women have not benefited from major social revolutions Lorber argues that the whole point of the gender system today is to maintain structured gender inequality to produce a subordinate class women that can be exploited as workers sexual partners childbearers and emotional nurturers Calling into question the inevitability and necessity of gender she envisions a society structured for equality where no gender racial ethnic or social class group is allowed to monopolize economic educational and cultural resources or the positions of power

Handling the Sick Tom Craig Olson, Eileen Walsh, 2004 Handling the Sick is the story of 838 women who entered St Luke s Hospital Training School for Nurses St Paul Minnesota from 1892 1937 Their story addresses a fundamental question about nursing that has yet to be answered is nursing a craft or a profession It also addresses the colliding visions of nursing factions that for more than a century have disagreed on the inherent traits and formal preparation a nurse has needed The women of St Luke s were engaged in the most practical of all occupations open to women a rare one in which their strength experience and skill were prized above all else They firmly believed that the key to success in nursing was apprenticeship training Apprenticeship not schooling was the cornerstone on which all else rested This study unites the opposing visions of those who led nursing toward professional status and those who saw it as a craft Physicality strength of will an abiding emphasis on practicality and a hierarchy based on a deep pride in craft skills have been essential elements of nursing Nursing can look to its complex history to develop an integrated model of nursing one drawing on both academic training and the immediate realities involved in handling the sick BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved

Women, the Family, and Policy Esther Ngan-ling Chow, Catherine White Berheide, 1994-06-07 The authors highlight how structural circumstances in countries with various degrees of industrialization are associated with specific policies The analyses of women's experiences reveal the variety of ways in which private patriarchy in families combines with public patriarchy in economies and states to create a system of domination which subordinates women The authors detail how gender is constructed under specific political economic and cultural circumstances and seek to understand how state policies with differing sensitivities to women's issues have produced mixed outcomes for women and their families in the process of economic development
