How It Could Be.** Anne Baffert, Sheila Tobias, 2010-06-10      **Handbook for Achieving Gender Equity Through Education** Susan S. Klein, Barbara Richardson, Dolores A. Grayson, Lynn H. Fox, Cheris Kramarae, Diane S. Pollard, Carol Anne Dwyer, 2014-05-22 First published in 1985 the Handbook for Achieving Gender Equity Through Education quickly established itself as the essential reference work concerning gender equity in education This new expanded edition provides a 20 year retrospective of the field one that has the great advantage of documenting U S national data on the gains and losses in the efforts to advance gender equality through policies such as Title IX the landmark federal law prohibiting sex discrimination in education equity programs and research Key features include Expertise Like its predecessor over 200 expert authors and reviewers provide accurate consensus research based information on the nature of gender equity challenges and what is needed to meet them at all levels of education Content Area Focus The analysis of gender equity within specific curriculum areas has been expanded from 6 to 10 chapters including mathematics science and engineering Global Diversity Focus Global gender equity is addressed in a separate chapter as well as in numerous other chapters The expanded section on gender equity strategies for diverse populations contains seven chapters on African Americans Latina os Asian and Pacific Island Americans American Indians gifted students students with disabilities and lesbian gay bisexual and transgender students Action Oriented All chapters contain practical recommendations for making education activities and outcomes more gender equitable A final chapter consolidates individual chapter recommendations for educators policymakers and researchers to achieve gender equity in and through education New Material Expanded from 25 to 31 chapters this new edition includes more emphasis on male gender equity and on sexuality issues special within population gender equity challenges race ability and disability etc coeducation and single sex education increased use of rigorous research strategies such as meta analysis showing more sex similarities and fewer sex differences and of evaluations of implementation programs technology and gender equity is now treated in three chapters women s and gender studies communication skills relating to English bilingual and foreign language learning and history and implementation of Title IX and other federal and state policies Since there is so much misleading information about gender equity and education this Handbook will be essential for anyone who wants accurate research based information on controversial gender equity issues journalists policy makers teachers Title IX coordinators equity trainers women s and gender study faculty students and parents      The Science Teacher ,1997 SCC Library has 1964 cur      **The Women of CourtWatch** Carole Bell Ford, 2010-01-01 Houston was a terrible place to divorce or seek child custody in the 1980s and early 1990s Family court judges routinely rendered verdicts that damaged the interests of women and children In some especially shocking cases they even granted custody to fathers who had been accused of molesting their own children Yet despite persistent allegations of cronyism incompetence sexism racism bribery and fraud the judges wielded such political power and influence that removing them seemed all but

impossible The family court system was clearly broken but there appeared to be no way to fix it This book recounts the inspiring and courageous story of women activists who came together to oppose Houston s family court judges and whose political action committee CourtWatch played a crucial role in defeating five of the judges in the 1994 judicial election Carole Bell Ford draws on extensive interviews with Florence Kusnetz the attorney who led the reform effort and other CourtWatch veterans as well as news accounts to provide a full history of the formation struggles and successes of a women s grassroots organization that overcame powerful political interests to improve Houston s family courts More than just a local story however this history of CourtWatch provides a model that can be used by activists in other communities in which legal and social institutions have gone astray It also honors the heroism of Florence Kusnetz whose commitment to the Jewish concept of tikkun olam repairing and improving the world brought her out of a comfortable retirement to fight for justice for women and children

Defining Digital Humanities Melissa Terras, Julianne Nyhan, Edward Vanhoutte, 2016-05-13 Digital

Humanities is becoming an increasingly popular focus of academic endeavour There are now hundreds of Digital Humanities centres worldwide and the subject is taught at both postgraduate and undergraduate level Yet the term Digital Humanities is much debated This reader brings together for the first time in one core volume the essential readings that have emerged in Digital Humanities We provide a historical overview of how the term Humanities Computing developed into the term Digital Humanities and highlight core readings which explore the meaning scope and implementation of the field To contextualize and frame each included reading the editors and authors provide a commentary on the original piece There is also an annotated bibliography of other material not included in the text to provide an essential list of reading in the discipline This text will be required reading for scholars and students who want to discover the history of Digital Humanities through its core writings and for those who wish to understand the many possibilities that exist when trying to define Digital Humanities

*Are Schools Really Like This?* J. Gary Lilyquist, 2013-11-21 J Gary Lilyquist synthesizes such innovative concepts as systems thinking mental models effective school research and Deming s theories of management to propose the new Balance Alignment Model a wide ranging approach for fostering school improvement Three case studies demonstrate why schools are not improving and how Lilyquist s model can facilitate student learning

Peer-Led Team Learning: Evaluation, Dissemination, and Institutionalization of a College Level Initiative Leo Gafney, Pratibha Varma-Nelson, 2008-06-24 There seems to be no end to the flood of conferences workshops panel discussions reports and research studies calling for change in the introductory science courses in our colleges and universities But there comes a time to move from criticism to action In 1993 the Division of Undergraduate Education of the National Science Foundation called for proposals for systemic initiatives to change the way introductory chemistry is taught One of the five awards was to design develop and implement the peer led Workshop a new structure to help students learn science This book is a study of 15 years of work by the Peer Led Team Learning PLTL project a national consortium of faculty learning specialists and students The authors have been in the

thick of the action as project evaluator Gafney and co principle investigator Varma Nelson Readers of this book will find a story of successful change in educational practice a story that continues today as new institutions faculty and disciplines adopt the PLTL model They will learn the model in theory and in practice and the supporting data that encourage others to adopt and adapt PLTL to new situations Although the project has long since lost count of the number of implementations of the model conservative estimates are that more than 100 community and four year colleges and a range of universities have adopted the PLTL model to advance student learning for more than 20 000 students in a variety of STEM disciplines

**Unforgettable** W. Michael Gray, 2016-10-12 We have an uneasy relationship with the relentless deluge of information gushing out of academia and our media outlets To turn it off is escapist but to attempt to cognitively grapple with it is overwhelming In *Unforgettable Enabling Deep and Durable Learning* a nationally recognized master teacher gives professors and their students the means to chart a clear path through this information explosion Humans crave explanatory patterns and this book enables teachers to think deeply about their academic disciplines to find and articulate their core explanatory principles and to engage their students in a compelling way of thinking An alternative title for this book could be *Why the Best College Teachers Do What They Do* because the author articulates a compelling rationale that will equip faculty to create and deliver transformative courses Students in transformative courses grapple with essential questions and gain mental muscle that equips them for real world challenges *International Journal of Infrared and Millimeter Waves*, 1999

*Journal of Geoscience Education*, 1996 **Internet Links for Science Education** Karen C. Cohen, 2012-12-06 Science teachers come in many varieties but they share a common goal to nurture learners Over the past decade we have learned a great deal about how to do this effectively Of all this new and some not so new knowledge what strikes me as most important is that learning occurs best within a context Still as obvious as that may seem it is relatively rare in our high school science classrooms The problem of course is that it is not easy to create a learning experience with hands on relevance to the science under discussion Science teachers in addition to not having the time for the most part do not have the expertise or readily available resources The solution lies in finding ways to bring scientists into the teaching learning equation Scientists teamed with teachers and their students represent a very real and rich opportunity to involve students in real science as practiced Imagine a research book that gives examples of honest science research experiences for science oriented students What's more imagine a book that includes examples where students are collaborating with scientists from all over the world on research projects in person or via the Internet *Internet Links for Science Education* does just that It explores the role of the Internet and technology in working student scientist partnerships **The Hidden Curriculum-Faculty-Made Tests in Science** Sheila Tobias, Jacqueline Raphael, 2014-01-15 *The British National Bibliography* Arthur James Wells, 1998
