us not only to transfer the thought within our mind but also to others Also by calling it a car we have differentiated the object from a train or a bike both being other modes of transportation Abstractions are part of our mental girds that help us by chopping reality into fragments so that we may organize it and put it into our grasp of understanding Something such as the temperature cannot be measured because it is infinitely variable It is just our environment reduced to numbers so that we can conceive it in our minds Again our world is divided into pieces so the human mind can understand it bit by bit From seeing a car to measuring the temperature language offers an explanation to our experience and it is a powerful tool to help us think
