Global Futures Jan Nederveen Pieterse, 2000 This work looks beyond the problems of accelerating globalization to examine how humanity can shape it The contributors suggest a variety of perspectives changes policies and institutional reforms to strive for in our increasingly inter connected world *Civilizing Globalization* Richard Sandbrook, 2003-01-09 Discusses the many facets of globalization in easy to understand language **Globalization or Empire?** Jan Nederveen Pieterse, 2004-08-01 In this smart and concise examination of the trends driving contemporary globalization Jan Nederveen Pieterse argues that the United States pursuit of global primacy is based upon a complex melding of neoliberal economics and hegemonic politics Do alternate capitalisms offer viable alternatives to the American way Globalization or Empire looks at globalization with acuity and thoughtfulness and uncovers its underlying dramas **Globalization** Jan Aart Scholte, 2017-03-16 This highly acclaimed bestselling textbook quickly established itself as one of the leading texts on the subject worldwide in its 1st edition Now substantially revised and updated Scholte provides students with a comprehensive introduction to globalization and questions why this phenomenon has occurred to what extent it changes the world and whether it is a force for good or ill Accessibly written by a leading authority both as an academic researcher and a policy consultant this second edition draws on the author's research in more than 20 countries over 5 continents Split into 3 parts the text first outlines a critical framework for understanding globalization before exploring its impact on society and the key debates surrounding its normative impact Exploring questions such as what globalization is how it has emerged and what effect it has had on society this text is essential reading for undergraduate and postgraduate students seeking a thorough study of globalization New to this Edition A broader perspective on all the dimensions of globalization Makes use of the extensive new data and research findings since the first edition was released Draws more widely from other fields such as Business Studies Law and Economics **Making Globalisation** Robert J. Holton, 2017-03-23 This book offers a clear and concise account of the key debates in the globalization literature serving as an accessible introduction to students new to the topic It deals even handedly with all the various dimensions of globalization political economic social and cultural and particularly draws attention to the role of people in processes of globalization The book's historical dimension and its multicultural focus ensure that globalization is shown neither to be an inexorable process nor one that can be equated simply with Westernization Globalization and Geopolitics in the Middle East Anoushiravan Ehteshami, 2007-03-14 Examining globalization in the Middle East this book provides a much needed assessment of the impact of globalization in the greater Middle East including North Africa in the context of the powerful geopolitical forces at work in shaping the region today Written by a well known authority in this area this book demonstrates that unlike in other regions such as East Asia geopolitics has been a critical factor in driving globalization in the Middle East The author argues that whereas elsewhere globalisation has opened up the economy society culture and attitudes to the environment in the Middle East it has had the

opposite effect with poor state formation little interregional trade foreign and interregional investment and reassertion of traditional identities This book explores the impact of globalization on the politics economies and social environment of the greater Middle East in the context of the region's position as the central site of global geopolitical competition at the start of the twenty first century *Globalization: Global membership and participation* Roland Robertson, Kathleen E. White, 2003

Handbook of Sociology Craig Calhoun, Chris Rojek, Bryan S Turner, 2005-06-18 Sociology has evolved greatly since its inception as an academic discipline It has diverged into numerous strands often flowing in disparate directions so much so that today the notion of canonical sociology has become widely disputed The field of sociology at present approximates to one of multi paradigmatic complexity in which many approaches to theory must be distinguished and situated In addition the discipline has had to confront new challenges from globalization the shift of interest from production to consumption the rise of new social movements the challenge of bio engineering the collapse of a presently existing socialist alternative and much else besides The new SAGE Handbook of Sociology aims to address these new developments while at the same time providing an authoritative guide to theory and method the key sub disciplines and the primary debates of today To undertake this ambitious project three leading figures in the field of sociology were selected as editors to bring together the foremost exponents of the different strands that contribute towards the make up modern sociology Drawn from both sides of the

Atlantic the contributors have been commissioned to utilise the most up to date research available to provide a critical international analysis of their area of expertise The result is this essential resource collection that not just reflects upon the condition of sociology today but also looks to future developments in the discipline The Handbook is invaluable not just all sociologists but to a wide variety of students and researchers across the social sciences Click on Sample Chapters Resources to download the introduction

Edutopias ,2006-01-01 Education has always been part of the search for the ideal society and therefore an important part of the utopian tradition in Western culture politics and literature Education has often served to define the ideal society or to provide the principal means of creating it This unique collection of essays by well known scholars from around the world examines the role of edutopias in the utopian tradition examining its sources and sites as a means for understanding the aims and purposes of education for realizing its societal value and for criticizing its present economic technological and organizational modes These essays will stimulate new thinking in ways that impinge on both theoretical and practical questions as well as offering the reader a series of reminders of the ethical and political dimensions of education and its place in helping to build good and just societies The collection is aimed at an audience of teachers and graduate students although it will also be of interest to administrators policy makers and the general public interested in utopian thinking and its relation to education

Women's Activism, Feminism, and Social Justice Margaret A. McLaren,2019 A wide range of issues besieges women globally including economic exploitation sexist oppression racial ethnic and caste oppression and cultural imperialism This book builds a feminist social justice framework from practices of women s activism in India to understand and work to overcome these injustices The feminist social justice framework provides an alternative to mainstream philosophical frameworks that

promote global gender justice for example universal human rights economic projects such as microfinance and cosmopolitanism McLaren demonstrates that these frameworks are bound by a commitment to individualism and an abstract sense of universalism that belies their root neo liberalism Arguing that these frameworks emphasize individualism over interdependence similarity over diversity and individual success over collective capacity McLaren draws on the work of Rabindranath Tagore to develop the concept of relational cosmopolitanism Relational cosmopolitanism prioritizes our connections while crucially acknowledging the reality of power differences Extending Iris Young s theory of political responsibility McLaren shows how Fair Trade connects to the economic solidarity movement The Self Employed Women s Association and MarketPlace India empower women through access to livelihoods as well as fostering leadership capabilities that allow them to challenge structural injustice through political and social activism Their struggles to resist economic exploitation and gender oppression through collective action show the vital importance of challenging individualist approaches to achieving gender justice The book is a rallying call for a shift in our thinking and practice towards re imagining the possibilities for justice from a relational framework from independence to interdependence from identity to intersectionality and from interest to socio political imagination

The Future Jennifer M. Gidley, 2017-03-13 From the beginning of time humans have been driven by both a fear of the unknown and a curiosity to know We have always yearned to know what lies ahead whether threat or safety scarcity or abundance Throughout human history our forebears tried to create certainty in the unknown by seeking to influence outcomes with sacrifices to gods preparing for the unexpected with advice from oracles and by reading the stars through astrology As scientific methods improve and computer technology develops we become ever more confident of our capacity to predict and quantify the future by accumulating and interpreting patterns from the past yet the truth is there is still no certainty to be had In this Very Short Introduction Jennifer Gidley considers some of our most burning questions What is the future Is the future a time yet to come Or is it a utopian place Does the future have a history Is there only one future or are there many possible futures She asks if the future can ever be truly predicted or if we create our own futures both hoped for and feared by our thoughts feelings and actions and concludes by analysing how we can learn to study the future

[Europe and Asia beyond East and West](#) Gerard Delanty, 2006-10-03 This major new book tackles key questions on Europe in the context of shifting parameters of East and West The contributors sociologists anthropologists philosophers and historians show from a variety of different perspectives that the conventional equation of Europe with the West must be questioned Featuring four thematically organized chapters the book looks at a post Western world Asia in Europe encounters in history between Europe and Asia otherness in Europe and Asia Exploring new expressions of European self understanding in a way that challenges recent ideological notions of the clash of civilizations this outstanding work draws on recent scholarship that shows how Europe and Asia were mutually linked in history and in contemporary perspective It argues that as a result of current developments and the changing geopolitical context both Europe and Asia have much in common and that it is possible to speak of cosmopolitan links rather

than clashes This book will be of great value to students and researchers in the fields of sociology European politics and history and cultural theory **Globalism** Manfred B. Steger,2002 Globalism The New Market Ideology rejects the notion that we find ourselves at the end of ideology and that democracy has won Instead Steger argues that the opening decade of the 21st century will constitute a teeming battlefield of clashing ideologies The chief protagonist is the dominant neoliberal market ideology Steger calls globalism After identifying and evaluating the five central claims of globalism including assertions that globalization is inevitable nobody is in charge of globalization and globalization benefits everyone Steger offers an overview of the counterclaims made by anti globalist forces Visit our website for sample chapters
