Global Trade And European Workers:

Global Trade and European Workers Paul Brenton, Jacques Pelkmans, 2016-01-03 Are jobs and wages particularly those of the low skilled undermined by trade and investment with Asian and other emerging economies This book presents contributions on this issue which place the analytical and policy debate into context and survey the relevant economic literature together with a range of empirically oriented papers The focus is upon Europe which unlike the US has received little attention in the debate on the impact of world trade The book shows that simple one line messages on the impact of trade on jobs and wages have no sound analytical foundations

Core Labour Standards and International Trade

Kofi Addo, 2014-11-24 This book examines the labour standards provisions in a number of Regional and Bilateral Trade Agreements and assesses the potential of using the relevant clauses in these trade agreements as a benchmark for a multilateral approach Based on the lessons learned from the Regional model the book proposes a Global Labour and Trade

Framework Agreement GLTFA combined with a joint ILO WTO enforcement mechanism to resolve the contentious issue of the link between the CLS and international trade The history of the linkage between the Core Labour Standards CLS and international trade dates back roughly 150 years and has recently become one of the most vexing issues facing policy makers At the heart of the debate is the question whether or not trade sanctions should be imposed on countries that do not respect the CLS as embodied in multilateral conventions administered by the International Labour Organization ILO Concretely this would entail inserting a social clause in the World Trade Organization WTO rules and would trigger the imposition of sanctions on those countries that do not adhere to the CLS

Globalisation and the Labour Market Robert Anderton,Paul Brenton,John Whalley,2004-03-01 Incorporating new empirical data and using a wide variety of methods such as econometrics general equilibrium and case studies this detailed volume provides a thorough investigation into the causes of the deterioration in the relative economic fortunes of less skilled workers across various countries with a focus on the role of globalization It reveals how in the past thirty years the decline in the wages and employment of less skilled workers relative to skilled workers in Europe and North America has coincided with an acceleration in globalization The latter s rapid pace is indicated by the strong growth in both world trade and foreign direct investment which in turn have been stimulated by various factors such as reductions in trade barriers a drastic decline in the costs of communication and transportation and the internationalization of production Although it is now widely held that the main cause of this rise in inequality seems to be a shift in demand towards higher skilled workers this book aims to shed light on whether it is trade or technology that is primarily responsible for this demand shift Importantly the studies in this book describe how globalisation and technological change are interacting rather than separate forces Topical and timely this significant book will be a valuable read for academic researchers analysts and professional economists in the policy making community

Free Trade Agreements and Global Labour Governance Adrian Smith,James Harrison,Liam Campling,Ben Richardson,Mirela Barbu,2020-09-07 Exploring the contentious relationship between trade and labour this book looks at the impact of the EU s new generation free trade agreements on workers Drawing upon extensive original research including over 200 interviews with key actors across the EU and its trading partners it considers the effectiveness of the trade labour linkage in an era of global value chains The EU believes trade can work for all claiming that labour provisions in its free trade agreements ensure

that economic growth and high labour standards go hand in hand Yet whether these actually make a difference to workers is strongly contested This book explains why labour provisions have been profoundly limited in the EU s agreements with the CARIFORUM group South Korea and Moldova It also shows how the provisions were mismatched with the most pressing workplace concerns in the key export industries of sugar automobiles and clothing and how these concerns were exacerbated by the agreements commercial provisions This pioneering approach to studying the trade labour linkage provides insights into key debates on the role of civil society in trade governance the relationship between public and private labour regulation and the progressive possibilities for trade policy in the twenty first century This book will appeal to research scholars post graduate students trade policy practitioners policy researchers allied to labour movements and informed activists

Towards a just Europe João Labareda,2021-01-26 This highly original book constitutes one of the first attempts to examine the problem of distributive justice in the European Union in a systematic manner Jo o Labareda argues that the set of shared political institutions at EU level including the European Parliament and the Court of Justice of the EU generate democratic duties of redistribution among EU citizens Furthermore the economic structure of the EU comprising a common market a common currency and a

free movement area triggers duties of reciprocity among member states The responsibilities to fulfil these duties Labareda argues should be shared by the local national and supranational levels of government Not only should the EU act as a safety net to the national welfare systems applying the principle of subsidiarity but common market and Eurozone regulations should balance their efficiency targets with fair cooperation terms The concrete policy proposals presented in this book include a threshold of basic goods for all EU citizens an EU labour code a minimum EU corporate tax rate and an EU fund for competitiveness Labarada argues that his proposals match the political culture of the member states are economically feasible can be translated into functioning institutions and policies and are consistent with the limited degree of social solidarity in Europe This book is a major contribution to the understanding of what a just Europe would look like and what it might take to get us there

The United States, the European Union, and the Globalization of World Trade Thomas C. Fischer, 2000-04-30 Professor Fischer presents a comprehensive overview of global trade at the start of a new century from a national regional and international viewpoint He looks closely at the four dominant and competing economic systems the United States the European Union Japan and China and argues that the traditional we win you lose national trade paradigm has been replaced by one that is more collaborative one that is leaning toward de facto world governance He compares foreigners attitudes toward trade and markets with our own using four economic models that typify world trade today He examines the interface between national regional and international trading systems and between business and government then at the prospect of global trade management in different trade sectors under the GATT WTO and other organizations The result is a provocative discussion of global trade today Professor Fischer makes it clear that the United States needs allies Though its influence in the world trade arena will continue America s hegemony has ended The European Union is America s most obvious ally but it has many problems and ambitions of its own The North American Free Trade Agreement has solidified the North American market but it may isolate and lose South America while Japan China Russia and others are left to develop alliances of their own All these factors raise important global questions among them Can American capitalism prevail Should the United States proceed unilaterally as it has so often Or are regional and multinational arrangements preferable If there is further globalization as seems inevitable and if American influence is on the wane what group or organization will lead To explore these questions and provide the beginnings of answers Professor Fischer uses his four

competing economic systems and handicaps the process country by country sector by sector with particular attention to transatlantic relations

Trade and Jobs in Europe Mathias Dewatripont, André Sapir, Khalid Sekkat, 1999 In the last 25 years Europe has experienced a reduction in growth and an explosion in unemployment At a time when this and the continuing existence of the welfare state are top of the European agenda it has become increasingly popular to blame the globalization of the world economy for current problems This book provides the first comprehensive set of studies on the impact of trade with developing countries on the European labour market It argues that the evidence does not point to trade with developing countries as a major cause of European unemployment Instead technological change and domestic policy choices are the main causal factors As a result the contributors argue against protectionist trade policies whose benefits to employment would be limited at best but whose risk to world growth due to trade wars is immense The next ten years are a critical period for European integration and expansion Trade and Jobs in Europe will be of crucial importance to all those at the heart of the current debate advisers policy makers and researchers alike

World Trade and Local Public Interest Csongor István Nagy, 2020-07-15 Trade liberalization has shaped international economic relations since the conclusion of the GATT 1947 The last few decades have seen a significant shift in the focus of this process multilateralism seems to have reached its limits giving way to regionalism and the focus of trade liberalization has shifted to non tariff barriers While these developments have attracted considerable attention exploring them from comparative perspectives has been largely neglected Trading systems the WTO regional economic integrations and federal systems are all based on the same dichotomy of free trade and local public interest they generally prohibit the constituent parties states from restricting trade but exempt them from this limitation if the restriction is warranted by a legitimate local end The purpose of this volume is to contribute to filling the above mentioned research gap by exploring central issues in regional economic integrations from a comparative perspective It provides a general economic analysis of the costs and benefits of trade liberalization and the role and function of normative values in commercial policy This is followed by a comparative analysis of the approaches

used in various regional economic integrations in North America Europe and Latin America and federal markets the United States Australia and India regarding the balance between free trade and local public interest Key issues in investment law one of the most contentious elements of next generation free trade agreements are also addressed
