## **Globalisation Of Finance A Citizens Guide:**

**The Globalisation of Finance** Kavaljit Singh, 1999 Globalisation of finance has now surpassed the globalisation of production and taken on a life of its own No longer associated with flows of real resources international trade or productive investment but merely attracted by short term speculative gains these volatile financial flows make it difficult for governments to pursue independent economic policies that are inconsistent with the interests of global finance capital This book argues that the global economy itself has become highly vulnerable What is now needed are effective regulatory mechanisms backed up by citizen action to exercise social control over global finance capital Taming Global Financial Flows Kavaljit Singh, 2000-10 The author enunciates certain guiding principles in order to create a more stable international financial architecture and recommends a series of concrete measures This most timely and useful follow up to his very successful previous book *The Globalization of Finance A Citizen s Guide* contributes greatly to the public understanding of the intricacies of global finance and to the possibilities of effective action by peoples movements campaigning for a more just and sound financial system Jacket Globalization Gernot Kohler, Emilio José Chaves, 2003 The majority of people around the world are experiencing oppressive and destructive forces which manifest themselves in starvation income polarisation joblessness stress violence and so on What is the nature of these forces If we call them globalisation can there be good globalisation as well as bad globalisation Is this a new phenomenon or just a continuation of history as it has always been This book brings together a wide range of expertise addressing these problems from a world systems perspective **Aníbal Quijano** Aníbal Quijano, 2024-03-01 The essays in this volume encompass nearly thirty years of influential Peruvian sociologist An bal Quijano s work on coloniality coloniality of power and colonial matrix of power bringing it to an English reading audience for the first time **Globalization** Justin Ervin, Zachary A. Smith, 2008-08-07 This extensive yet concise introduction to the phenomenon of globalization looks at its economic environmental and security dimensions as interpreted from different political points of view *Globalization A Reference Handbook* goes beyond the typical focus on multinational corporations and the wired world to explore the full scope of a process that actually began well before the dawn of the Digital Age This timely highly informative resource describes the development of globalization especially in the era from World War II to the present covering not only its economic aspects but crucial interrelated environmental and security issues as well Rather than limit itself to one interpretation the book offers an unbiased review of the definitions and assessments of globalization from various points of view serving readers as an authoritative introduction to what scholars and activists across the political spectrum think about the central phenomenon of our time The World of Consumption Ben Fine, 2016-10-14 Consumption has become one of the leading topics across the social sciences and vocational disciplines such as marketing and business studies In this comprehensively updated and revised new edition traditional approaches as well as the most recent literature are fully addressed and incorporated with wide reference to theoretical and empirical work Fine s

refreshing and authoritative text includes a critical examination of such themes as economics imperialism and globalization the world of commodities systems of provision and culture the consumer society public consumption This book presents an updated analysis of the cluttered landscape of studies of consumption that will make it required reading for students from a wide range of backgrounds including political economy history and social science courses generally **Globalisation and Labour** Ronaldo Munck,2002-07 Intellectual fashion likes to see us as consumers but the world of production and services still needs workers Globalization has been driven by the transnational corporations search for cheap labour but little attention has been paid to the consequent changes in the world of work Ronaldo Munck argues that the national period in labour history is decisively over Democratising Globalisation Heikki Patomaki,2001-08 Propounded by James Tobin in the 1970s the Tobin tax would have levied a small amount from all currency transactions globally This would have the effect of moderating speculation It didn't take off but the author believes there is a way to make it work *Complex Systems Theory and Development Practice* Samir Rihani,2002 Ranging over a wide terrain of social political and economic thinking and specific country experiences the author explains the key concepts in complex systems theory and their possible applications in development practice He examines various development issues and institutions in the light of what he sees as the limitations of rigid linear thinking in an essentially fluid non linear world Little wonder he concludes that the results of half a century of development effort have been so disappointing **BOOK JACKET** *Virtual Migration* A. Aneesh,2006-04-24 DIVA very creative study of the different kinds of task integration and management found in virtual migration and body shopping throughout the global software industry in general and between India and the US in particular *Empire of Knowledge* Vinay Lal,2002-10-20 During the media frenzy over the Millennium celebrations there was hardly any mention of the fact that for the majority of the world there was no Millennium at all This linear understanding of time is a specifically Western and Christian concept This is just one of many examples that Vinay Lal uses to demonstrate that nearly every idea which we take for granted in the west is part of a politics of ideas Oppression is usually associated with class struggle and other forms of economic monopoly Lal looks beyond this deconstructing the cultural assumptions that have emerged alongside capitalism to offer a devastating critique of the politics of knowledge at the heart of all powerbroking Other topics examined are the concept of development which has provided a mandate for surreptitious colonisation and the idea of the nation state something we have lived with for no more than two centuries yet is accepted without question Linking this to the emergence of international governance through the United Nations the US and imperial economic bodies such as the IMF and WTO Lal explains how such universalism came to dominate the trajectory of Western thought The Cuban Revolution in the 21st Century George Lambie,2010-10-05 Politics in Cuba have long been analysed as a socialist experiment from the perspective of internal dynamics or international relations but what if the revolutionary process is part of a counter current against neoliberal globalisation Rather than presenting Cuba as a socialist survivor whose performance must be measured against

the standards set by the international community George Lambie judges Cuban socialism on the goals that the revolution sets for itself He shows that despite Cuba's isolation in the New World Order and the enormous pressures it has faced to conform its faith in an alternative socialist project has continued and grown After the 2008 financial crash we have seen neoliberalism's fallibility first hand conversely Cuba's promotion of socialist values has a renewed relevance Lambie argues that Cuba is again becoming a symbol and practical example of socialism in action

**Global Futures** Jan Nederveen Pieterse, 2000 This work looks beyond the problems of accelerating globalization to examine how humanity can shape it The contributors suggest a variety of perspectives changes policies and institutional reforms to strive for in our increasingly inter connected world

Neo-liberalism Or Democracy? Arthur MacEwan, 1999 Explores some central tenets of modern economics subjecting them to trenchant examination including the case for free trade and the inevitability of ever more grotesque income inequalities The book argues that there is a feasible alternative in a democratically controlled economic strategy

**Postcolonialism** Robert Young, 2003-06-26 An innovative and lively account of both the history and key debates in postcolonialism Robert Young situates it in a wide cultural context discussing its importance as an historical condition and as a means of changing the way that we think about the world

**Participation** Bill Cooke, Uma Kothari, 2001-02 This book shows how participatory government can lead to the unjust and illegitimate exercise of power It addresses the gulf between the almost universally fashionable rhetoric of participation promising empowerment and appropriate development Looking at what actually happens when consultants and activists promote and practice participatory development this book offers a sharp challenge to the advocates of participatory development Some contributors look at particular examples of failed participatory practice others present more conceptually oriented analyses Together they provide a new rigorous and provocative understanding of participatory development

**Corporate Power and Social Policy in a Global Economy** Kevin Farnsworth, 2004-01-28 This groundbreaking book investigates and documents corporate influence on social policies at global regional national and local levels It argues that we cannot understand the recent history and present direction of the welfare state unless we focus on the role that business has played in its development

Questioning Globalization Kavaljit Singh, 2005-10 This volume offers a clear presentation of the big questions about globalization

The Limits of Capitalism Wim Dierckxsens, 2000 What is to be done That is the issue political movements social thinkers economists and governments all over the world must now confront Without trying to propose specific policies the author puts forward a highly suggestive set of principles and ideas
