Globalization Jürgen Osterhammel, Niels P. Petersson, 2005 In this work Jürgen Osterhammel and Niels Petersson make the case that globalization is not so new after all Arguing that the world did not turn global overnight the book traces the emergence of globalization over the past seven or eight centuries In fact the authors write the phenomenon can be traced back to early modern large scale trading for example the silk trade between China and the Mediterranean region the shipping routes between the Arabian Peninsula and India and the more frequently travelled caravan routes of the Near East and North Africa all conduits for people goods coins artwork and ideas *Globalization* Jürgen Osterhammel, Niels P. Petersson, 2021-07-13 Globalization has become a popular buzzword for explaining today's world The expression achieved terminological stardom in the 1990s and was soon embraced by the general public and integrated into numerous languages But is this much discussed phenomenon really an invention of modern times In this work Jürgen Osterhammel and Niels Petersson make the case that globalization is not so new after all Arguing that the world did not turn global overnight the book traces the emergence of globalization over the past seven or eight centuries In fact the authors write the phenomenon can be traced back to early modern large scale trading for example the silk trade between China and the Mediterranean region the shipping routes between the Arabian Peninsula and India and the more frequently traveled caravan routes of the Near East and North Africa all conduits for people goods coins artwork and ideas Osterhammel and Petersson argue that the period from 1750 to 1880 an era characterized by the development of free trade and the long distance impact of the industrial revolution represented an important phase in the globalization phenomenon Moreover they demonstrate how globalization in the mid twentieth century opened up the prospect of global destruction though nuclear war and ecological catastrophe In the end the authors write today's globalization is part of a long running transformation and has not ushered in a global age radically different from anything that came before This book will appeal to historians economists and anyone in the social sciences who is interested in the historical emergence of globalization *Globalization* W. Globalizations and the Ancient World Justin Jennings, 2010-11-08 In this book Justin Jennings argues that globalization is not just a phenomenon limited to modern times Instead he contends that the globalization of today is just the latest in a series of globalizing movements in human history Using the Uruk Mississippian and Wari civilizations as case studies Jennings examines how the growth of the world's first great cities radically transformed their respective areas The cities required unprecedented exchange networks creating long distance flows of ideas people and goods These flows created cascades of interregional interaction that eroded local behavioral norms and social structures New hybrid cultures emerged within these globalized regions Although these networks did not span the whole globe people in these areas developed

globalized cultures as they interacted with one another Jennings explores how understanding globalization as a recurring event can help in the understanding of both the past and the present **Globalization in World History** Peter N. Stearns, 2023-11-03 In this fully revised fourth edition this book treats globalization from several vantage points showing how these help grasp the nature of globalization both in the past and today The revisions include greater attention to the complications of racism after 1500 and nationalism after 1850 further analysis of reactions against globalization after World War I and in the 21st century more discussion of student exchanges and fuller treatment of developments since 2008 including the role of the Covid 19 pandemic in contemporary globalization Four major chronological phases are explored in the centuries after 1000 CE after 1500 after 1850 and since the mid 20th century Discussion of each phase includes relevant debates over the nature and extent of the innovations involved particularly in terms of transportation communications technologies and trade patterns The phase approach also facilitates analysis of the range of interactions enmeshed in globalization beyond trade and migration including disease exchange impacts on culture and consumer tastes and for the modern periods policy coordination and international organizations Finally the book deals with different regional positions and reactions in each of the major phases This includes not only imbalances of power and economic benefit but also regional styles in dealing with the range of global relationships This volume is essential reading for undergraduate and postgraduate students of world history economic history and political economy **Thinking History Globally** Diego Olstein, 2014-11-04 The book brings together many recent trends in writing history under a common framework thinking history globally By thinking history globally the book explains applies and exemplifies the four basic strategies of analysis the big C s comparing connecting conceptualizing and contextualizing using twelve different branches of history Mission as Globalization David W. Scott, 2016-07-26 Through an examination of Methodist mission to Southeast Asia at the turn of the twentieth century this broad ranging book unites the history of globalization with the history of Christian mission and the history of Southeast Asia The book explores the international connections forged by the Methodist Episcopal Church s Malaysia Mission between 1885 and 1915 putting them in the context of a wave of globalization that was sweeping the world at that time including significant developments in Southeast Asia To establish intellectual connections between the study of globalization and this historical setting the book suggests six metaphors for understanding the mission Each metaphor is based on some aspect of secular globalization the Methodist connection as a migratory network mission agencies as multinational corporations the Malaysia Mission as a franchise system the Methodist Episcopal Church as a media conglomerate mission institutions as civil society organizations and Methodist mission as a global vision In chapters exploring each metaphor separately the book reviews how each form of secular globalization functions to create transnational connections before examining the details of how the Malaysia Mission functioned in a similar fashion Along the way the book investigates the lives of all involved in the mission missionaries church members of the mission and mission supporters Although Southeast Asia including the Straits

Settlements Federated Malay States Sarawak and Netherlands Indies and the United States are important geographic foci for the book India China Britain Sri Lanka Sweden Germany Australia and Canada all have parts to play In exploring these metaphors the book draws on several scholarly fields including migration studies business history media studies political theory and cultural history blending them together into a social history of the mission By so doing it identifies both ways in which the effects of Christian mission paralleled other globalizing forces and unique contributions Christian mission made to turn of the twentieth century globalization
