International Relations Theory for the Twenty-First Century Martin Griffiths, 2007-10-24 Written by an international team of experts in the field this is the first comprehensive textbook to provide an overview of all the most important theories within international relations **Rethinking International Relations Theory** Martin Griffiths, 2011-03-02 International Relations IR theory has seen a proliferation of competing and increasingly trenchant worldviews with no consensus on how to evaluate their relative strengths and weakness This innovative new text provides an original interpretation of how best to navigate the clash of perspectives in contemporary IR theory The book provides a systematic overview of the main worldviews such as realism liberalism and constructivism and their associated theoretical underpinnings Placing liberal internationalism at the heart of the debate it argues that the main division in IR theory is between liberal internationalism and its critics Griffiths examines both the strengths and weaknesses of liberal internationalism as a worldview and also explores the competing worldviews that have been generated by the perceived flaws of this perspective Examination of crucial policy issues is incorporated throughout the text restoring the

relevance of theory for those who wish to understand those policy issues Moreover this book revitalises the raison d'être of contemporary IR theory and shows the role it can play in making sense of the twenty first century *History of International Relations Theory* Torbjørn L. Knutsen, Torbjørn L. Knutsen, 1997-06-15 Introduces ideas on international relations expressed by thinkers from High Middle Ages to the present day **Globalization** Eleonore Kofman, Gillian Youngs, 1996-01-01 Globalization and the related issues of power and identity are central concerns in international studies whether viewed from a political economic spatial or human perspective The fully updated second edition of this major collection brings together a multi disciplinary group of international scholars to interrogate globalization in theory and practice Gender identity citizenship migration issues related to the state and economic and technological change are analyzed in depth Several of the authors have revised their chapters from the earlier edition and others have provided completely new contributions in key areas such as the internet social movements environmental security and world cities Two new introductory chapters written by the editors outline the theory and practice of international relations and political geography at the dawn of the twenty first century Several further chapters highlight different aspects of inequality which have become central to the globalization debate Book jacket *The Globalization of Security* B. Mabee, 2009-05-21 The Globalization of Security is an important rethinking of the connections between globalization and security focusing on a conceptual examination of the role of the state combined with key case studies The book provides a novel historical sociological approach advancing both the understanding of security and the theory of state power **European Approaches to International Relations Theory** Jörg Friedrichs, 2004-03 Jorg Friedrichs presents an important new introduction to the existence and relevance of European approaches to IR theory and sets an agenda for the progressive development of a Eurodiscipline of IR studies International Relations Theory and Regional Transformation T. V. Paul, 2012-02-23 Regional transformation has emerged as a major topic of research during the past few decades much of it seeking to understand how a region changes into a zone of conflict or cooperation and how and why some regions remain in perpetual conflict Although the leading theoretical paradigms of international relations have something to say about regional order a comprehensive treatment of this subject is missing from the literature This book suggests that cross paradigmatic engagement on regional orders can be valuable if it can generate theoretically innovative testable propositions and policy relevant ideas The book brings together scholars from the dominant IR perspectives aiming to explain the regional order issue through multidimensional and multi causal pathways and seeking meeting points between them Using insights from IR theory the contributors offer policy relevant ideas which may benefit conflict ridden regions of the world
