## **Globalization And The Environment:**

**Globalization and the Environment** Peter Christoff, Robyn Eckersley, 2013-08-08 This book by two leading scholars offers the first systematic analysis of the relationship between globalization and the environment from the early Modern period to the present Peter Christoff and Robyn Eckersley develop a broad conceptual framework for understanding the globalization of environmental problems and the highly uneven often faltering international political response The authors develop linkages between economic globalization and environmental degradation and explore a range of key global environmental problems focusing on the two most challenging of all climate change and biodiversity loss Finally they critically explore the challenges of environmental governance in a world defined by global capitalism and sovereign states Providing a normative framework for evaluating global environmental governance they suggest alternative institutional and policy responses Through a rich set of case studies this powerful book will help readers grasp the systemic causes of global environmental degradation as well as the myriad opportunities for reform of global environmental governance *Handbook of Globalization and the Environment* Khi V. Thai, Dianne Rahm, Jerrell D. Coggburn, 2017-09-25 Proponents of globalization argue that it protects the global environment from degradation and promotes worldwide sustainable economic growth while opponents argue the exact opposite Examining the local national and international impacts of globalization the Handbook of Globalization and the Environment explores strategies and solutions that support healthy economic growth protect the environment and create a more equitable world The book sets the stage with coverage of global environmental issues and policies It explores international sustainable development the evolution of global warming policy transborder air pollution desertification space and the global environment and human right to water Building on this foundation the editors discuss global environmental organizations and institutions with coverage of the UN's role in globalization the trade environment nexus the emergence of NGOs and an analysis of the state of global environmental knowledge and awareness from an international and comparative perspective Emphasizing the effects of increasingly integrated global economy on the environment and society the book examines environmental management and accountability It addresses green procurement provides an overview of U S environmental regulation and the current range of voluntary and mandatory pollution prevention mechanisms in use explores a two pronged approach to establishing a sustainable procurement model and examines a collaborative community based approach to environmental regulatory compliance The book concludes with an analysis of controversial issues such as eco terrorism North South disputes environmental justice the promotion of economic growth through globalization in less developed countries and the ability of scientists to communicate ideas so that policy makers can use science in decision making **Globalization and the Environment** Pete Newell, 2013-04-24 Globalization and the Environment critically explores the actors politics and processes that govern the relationship between globalization and the environment Taking key aspects of globalisation in turn trade production and finance the book highlights the relations of

power at work that determine whether globalization is managed in a sustainable way and on whose behalf Each chapter looks in turn at the political ecology of these central pillars of the global economy reviewing evidence of its impact on diverse ecologies and societies its governance the political structures institutions and policy making processes in place to manage this relationship and finally efforts to contest and challenge these prevailing approaches The book makes sense of the relationship between globalisation and the environment using a range of theoretical tools from different disciplines This helps to place the debate about the compatibility between globalisation and sustainability in an explicitly political and historical context in which it is possible to appreciate the nature of interests and power relations that privilege some ways of responding to environmental problems over others in a context of globalisation *Globalization and the Environment* Gabriela Kutting, 2004-01-01 Examines how globalization and the environment are connected issues Globalization, Health, and the Environment Greg Guest, 2005-09-29 Leading health scholars reveal the impact of globalization on human health as it is mediated through environmental change They explore the destabilizing impact of globalization on the planet's ecology and on the health of the human populations that are dependent on the delicate global biosphere Their timely case studies describe the cultural adaptations of indigenous populations to their changing environments evaluating their technological and global political economic processes The authors analyze local and global public health strategies examine the association between globalization and demographics and offer creative solutions for future health policies This book will be a valuable resource for professionals in international health medical anthropology sociology and geography environmental studies and globalization studies **Environmental Impacts of Globalization and Trade** Corey L. Lofdahl, 2002 The relationship between trade and the environment has become an increasingly contentious issue between economists and environmentalists Economists maintain that trade helps the natural environment because rich countries can better afford to protect their unspoiled areas Environmentalists counter that the pursuit of national wealth drives global environmental degradation and that free trade accelerates the process Instead of arguing one side or the other this book uses new analytic methods including a systems dynamics model to seek an answer to the impasse Using lateral pressure theory to account for politics within and among nations it extends the theory's initial application which was to explain the onset of war to the environment by specifying additional connections between the natural and social spheres In making explicit the complex causal connections between world trade and environmental degradation the book finds that GNP increases in the rich developed countries are linked to deforestation in the poorer developing countries It also uses insights derived from this finding to critique current trade policy prescriptions Although researchers have made significant advances in understanding the determinants and consequences of innovation until recently they have paid little attention to how innovation functions as an economic process This book examines the nature and workings of markets for intermediate technological inputs It looks first at how industry structure the nature of knowledge and intellectual property rights facilitate the development of

technology markets It then examines the impacts of these markets on firm boundaries the division of labor within the economy industry structure and economic growth Finally it examines the implications of this framework for public policy and corporate strategy Combining theoretical perspectives from economics and management with empirical analysis the book also draws on historical evidence and case studies to flesh out its research results **Globalization and the Environment**

,2006-06-01 What is missing in the mounting literature on globalization is a focused theoretical foundation with parallel empirical examinations of global structures and their environmental consequences The articles in this volume examine how the world economy and related non economic forms of global structuring impact the natural environment and the living conditions of human populations living across the globe Environmental dynamics in areas as diverse as Ancient Egypt and the Modern Amazon are presented for readers who are new to the world systems approach and for others interested in recent efforts to link environmental outcomes and antecedents to global processes **Worlds Apart** James Gustave

Speth,2003-04-18 Worlds Apart presents a cohesive set of essays by leading thinkers on the subject of globalization offering a thoughtful overview of the major environmental issues related to globalization in a clear reasoned style Framed by Gus Speth's introduction and conclusion essays range from Jane Lubchenco's discussion of the scientific indicators of global environmental change to Robert Kates examination of the prospect that our growing global interconnectedness could lead a transition to a more sustainable world to Vandana Shiva's impassioned plea for a new living democracy that counters the degrading dehumanizing tendencies of the global economy Other contributors include Maurice Strong on the Rio Earth Summit and the future course of environmentalism Jos Goldemberg on energy Jerry Mander on the inherent destructiveness of the global economic system Stephan Schmidheiny on the forestry industry and Daniel Esty and Maria Ivanova on global environmental governance Edited by one of the world's leading experts on international environmental issues the book brings together the most respected thinkers and actors on the world stage to offer a compelling set of perspectives and a solid introduction to the social and environmental dimensions of globalization *Sociology, Environmentalism, Globalization*

Steven Yearley,1996-04-28 This authoritative book brings together the sociologies of globalization and the environment in one volume Steven Yearley argues that environmental issues have received scant attention in the general debate on globalization even though environmentalists have been very successful in capturing the language and imagery of the globe

**The Globalization and Environment Reader** Pete Newell,J. Timmons Roberts,2016-06-13 The Globalization and Environment Reader features a collection of classic and cutting edge readings that explore whether and how globalization can be made compatible with sustainable development Offers a comprehensive collection of nearly 30 classic and cutting edge readings spanning a broad range of perspectives within this increasingly important field Addresses the question of whether economic globalization is the prime cause of the destruction of the global environment or if some forms of globalization could help to address global environmental problems Features carefully edited extracts selected both for their

importance and their accessibility Covers a variety of topics such as the marketization of nature debates about managing and governing the relationship between globalization and the environment and discussions about whether or not globalization should be greened Systematically captures the breadth and diversity of the field without assuming prior knowledge Offers a timely and necessary insight into the future of our fragile planet in the 21st century **Globalisation and the**

**Environment Perspectives from OECD and Dynamic Non-Member Economies** OECD,1998-03-25 Globalisation is changing the context of environmental management at national regional and global levels and is creating new challenges to and opportunities for the public and private sectors in the transition to sustainable development This volume presents papers on these subjects *The Globalization of Environmental Crisis* Jan Oosthoek,Barry K. Gills,2013-10-31 Previously published as a special issue of Globalizations this collection of essays addresses what is arguably the most pressing and urgent issue of our day the continuing development of global environmental crises and the need for new and urgent responses to them by the world community The contributors include social scientists environmental historians anthropologists and science policy researchers and together they give an overview of the history of the globalization of environmental crisis over the past several decades both in terms of the science of measurement and the types of policy and public responses that have emerged to date The specific issue areas addressed in the book cover a wide range of topics including international environmental governance North South inequalities climate change global warming tropical forests air pollution economic and paradigm shifts sustainability indigenous peoples and eco conservation EU environmental policy the United States and politicized climate science and more The Globalization of Environmental Crisis will be of particular interest to all those concerned with the on going debate over the state of the global environment and what to do about it **Globalization, Political**

**Institutions and the Environment in Developing Countries** Gabriele Spilker,2013-01-04 Though industrialized countries are usually the ones indicted when environmental pollution is discussed over the few last years the rate of emissions in developing countries has increased by a startling amount The fallout from this increase is evidenced by the struggle of cities like Beijing to improve their air quality Yet there also exist developing countries such as Thailand that have managed to limit their emissions to more tolerable levels raising the question why are some developing countries more willing or able to take care of their environment than others In this volume Gabriele Spilker proposes two factors for the differences in developing countries environmental performance integration into the international system and domestic political institutions Focusing on developing countries generally but also closely examining important global powers such as China and India Spilker employs a rigorous quantitative analysis to demonstrate the importance of considering various aspects of the international system in order to draw more comprehensive conclusions about how globalization affects environmental performance She asserts that democratic political institutions can shield developing countries from the negative consequences of either trade or foreign direct investment But at the same time developing countries by avoiding demanding commitments are more likely

to use environmental treaties as a cover than as a real plan of action Adding a new dimension to the existing body of research on environmental quality and commitment Spilker convincingly demonstrates how international and domestic political factors interact to shape developing countries ability and willingness to care for their natural environment **World in Motion**

Gary M. Kroll,Richard H. Robbins,2008-12-16 The essays collected in World in Motion all address the same issue The global paradox that modern prosperity has entailed extreme environmental degradation Gary M Kroll and Richard H Robbins present readings covering all principal viewpoints on this matter from the neoliberal belief that environmental and social problems can be fixed through a growing economy to the critics of globalization who equate growth with environmental degradation This book asks an important question Can we simply accelerate growth under the assumption that increased prosperity and new technologies will allow us to reverse environmental damage Or do we need to transform our modes of living radically to maintain the health of the world around us **Globalization and the Environment of China** Maoliang

Bu,Boqiong Yang,2014-11-20 Volume 14 focusses on the environmental influence of globalization and China environmental impact of foreign direct investment FDI on host countries international openness and a variety of topics relating to environmental regulation and impact productivity data and climate change *The Globalization and Environment Reader*

Paolo Davide Farah,Kirk W. Junker,2023 Globalization is a word with many meanings Some people say globalization is responsible for having lifted millions of people out of poverty over the past decades Other people say that globalization is neocolonialism All will agree that the processes that accompany globalization have had tremendous impacts on the environment Commodification of the environment along with environmental degradation have led to an almost universal awareness of the negative effects of such crises as disrupted climate The conservation and restoration of the environment as well as the protection of biodiversity are essential for human life including its economic components The international community has responded to the challenge by shifting away from the Brundtland Commission s

intergenerational concept of development which meets the needs of current generations without compromising the ability of future generations to meet their own needs to equating development with economic development under the New York Convention and reserving a third and separate pillar for economics over and against social concern and the environment. However, promising the concepts sustainable development and sustainability may have been they have become overused and meaningless. Like worn out coins they became just placeholders. To re-inscribe meaning in the metal of sustainable development the authors in this book examine environmental problems caused, facilitated or exacerbated by globalization as seen from the perspectives of the Global South and emerging economies. Investments, trade and technological advances are key driving forces of transition in these countries. The economic development component also known as green growth policies may be preferred by globalizing forces which also regard it as most suitable to cope with climate disruption for example. With the globalization of economics comes some aspects of the globalization of law. The globalization of environmental law that is currently under formation in the Global South addresses the integration of the ecological and economic components by analyzing the contribution of emerging and developing economies. Sometimes environmental law is part of the solutions, sometimes environmental law is part of the problems. In this book the terms Global South and emerging economies are included as alternative conceptualizations to the developed and developing countries. But this alternative conceptualization itself is a divide that enables globalization. In the chapters of this book the perspectives of the Global South and emerging economies are presented by lawyers from Brazil, Ethiopia, India, Mongolia, Nigeria and St Vincent and the Grenadines as well as from the European states of France, Georgia, Germany and Slovakia. The authors are natives of either emerging economies or of the Global South or work extensively in those regions. All of the book's themes are mentioned in the title: globalization, environmental law, sustainable development, the Global South, implementation and challenges.

**Globalization, Environment, and Development** Mr. Rohit Manglik, 2023-08-23. Globalization's impact on environment and development. Includes sustainability, resource management and policy addressing global environmental challenges.

**Globalization, Environmental Law, and Sustainable Development in the Global South** Kirk W. Junker, Paolo Davide Farah, 2021-11-29. This volume examines the impact of globalization on international environmental law and the implementation of sustainable development in the Global South. Comprising contributions from lawyers from the Global South or who have experience in the Global South, this volume is organized into three parts with a thematic inquiry woven through every chapter to ask how law can enable economies that can be sustained given the limited carrying capacity of the earth. Part I describes and characterizes the status quo of environmental and economic problems in the Global South during the process of globalization. Some of those problems include redistribution of environmental burden on the public through over-reliance on the state in emerging economies and the transition to public-private partnerships as well as extreme uncontrolled economic expansion. Building on Part I, Part II takes an international perspective by presenting some tools that are in place during the process of

globalization that lead to friction and interfaces between developed and developing economies in environmental law Recognizing the impossibility of a globalized Northern economy the authors in Part III present some alternatives through framework ideas of human and civil rights environmental rights and indigenous persons rights as well as concrete and specific legal tools to strengthen justice and rule of law institutions The book gives new perspectives to familiar approaches through concrete examples by professional practitioners and theoretical discourse by academic researchers and can thereby form the basis for changes in practices as well as further discussions and comparisons This book will be of great interest to students and scholars of environmental law sustainable development and globalization and international relations as well as legal professionals and practitioners

**Globalization and Environmental Challenges** Hans Günter Brauch, Úrsula Oswald Spring, Czesław Mesjasz, John Grin, Pál Dunay, Navnita Chadha Behera, Béchir Chourou, Patricia Kameri-Mbote, P. H. Liotta, 2008-01-23 Put quite simply the twin impacts of globalization and environmental degradation pose new security dangers and concerns In this new work on global security thinking 91 authors from five continents and many disciplines from science and practice assess the worldwide reassessment of the meaning of security triggered by the end of the Cold War and globalization as well as the multifarious impacts of global environmental change in the early 21st century
