Pattanaik, 2004 This collection of papers discusses critical issues that have often been at the center of social debates in recent years Economists and philosophers discuss such issues as the limitations of markets as an instrument of decision making in a society globalization and culture the foundational principles for public policy the criteria for the allocation of human organs and the paradox of scarcity despite affluence in modern societies *The Routledge Handbook of Commodification* Elodie Bertrand, Vida Panitch, 2023-12-04 Some goods are freely traded as commodities without question or controversy For other goods their commodification their being made available in exchange for money or their being subject to market valuation and exchange is hotly contested Contested commodities range from labour and land to votes healthcare and education to human organs gametes and intimate services to parks and emissions But in the context of a market economy what distinguishes these goods as non commodifiable or what defines them as contestable commodities And why should their status as such justify restricting the market choices of rationally consenting parties to otherwise voluntary exchanges This volume draws together wide ranging interdisciplinary research on the legitimate scope of markets and the kinds of goods that should be exempt therefrom In bringing diverse answers to this question together for the first time it finally identifies commodification studies as a unique field of scholarly research in its own right In so doing it fosters interdisciplinary dialogue advances scholarship and enhances education in this controversial important and growing field of research Contemporary theorists who examine this question do so from across the disciplinary spectrum and ground their answers in diverse scholarly literature and divergent methodological approaches Their arguments will be of interest to scholars and students of philosophy economics law political science sociology policy feminist theory and ecology among others The contributors to this volume take diverse and divergent positions on the benefits of markets in general and on the possible harms of specific contested markets in particular While some favour free markets and others regulation or prohibition and while some engage in more normative and others in more empirical analysis the contributors all advance nuanced and thoughtful arguments that engage deeply with the complex set of moral and empirical questions at the heart of commodification studies This volume collects their new and provocative work together for the first time *Fourth International Handbook of Globalisation, Education and Policy Research* Joseph Zajda, 2024-12-04 This handbook provides a global synthesis of on going research in education and policy change during the last decade It examines discourses of

globalisation from the perspectives of the global North and global South Major theories of globalisation and education policy reforms employed in the handbook are classified into two broad categories structuralist and post structuralist The handbook while examining the impact of global trends in different societies cultures and educational settings attempts to synthesise different meta theories of globalisation and their impact on societies and educational systems It discusses the continued interaction of global national and local forces and influences especially the importance of standards and quality driven education reforms the need to overcome inequality of access to quality schools and aims at providing quality education for all students In addition the impact of neo liberal ideology on education is examined in terms of its impact on ongoing standards driven education reforms globally The handbook analyses neo liberalism in education and its focus on increasing global competitiveness accountability efficiency quality standards driven policy reforms and educational stratification The impact of globalisation on education policy and reforms is a strategically significant issue for us all The unifying conceptual framework used in the handbook to critique strategic significance of globalisation is grounded in discourse CDA and critical theory The work offers the latest findings concerning major issues in education and policy directions such as global social and economic inequality neo liberal standard driven education and policy reforms performing schools in the performing culture education for human rights and social justice new perspectives on education for sustainability dominant and effective models of values education in schools and the ubiquitous impact of ICTs on education systems

Suspicious of Markets Donald Rutherford,2016-10-06 In this work

Rutherford reviews why Adam Smith Hayek Mises and others praised economic markets with a view to understanding in contrast historical attacks on markets dating as far back as Aristotle The market has long been criticized as an inappropriate method of allocation encouraging market participants to misbehave for the sake of personal gain and creating an impersonal new market culture This book traces how such attacks have become more vociferous in recent centuries especially with the rise of socialism Most recently the critique has broadened to include toxic markets and the excessive marketization of activities hitherto external to the market Analysing these major criticisms as well as the value of regulation utopias and virtue ethics as a means of avoiding future suspicions of markets the author lays the groundwork for the reader's own assessment of the arguments and concludes by posing suggestions of how best we might cope with flawed markets in the future

Buying Freedom Kwame Anthony Appiah, Martin Bunzl, 2018-06-05 If slavery is defined broadly to include bonded child labor and forced prostitution there are upward of 25 million slaves in the world today Individuals and groups are freeing some slaves by buying them from their enslavers But slave redemption is as controversial today as it was in pre Civil War America In *Buying Freedom* Kwame Anthony Appiah and Martin Bunzl bring together economists anthropologists historians and philosophers for the first comprehensive examination of the practical and

ethical implications of slave redemption While recognizing the obvious virtue of the desire to buy the freedom of slaves the contributors ask difficult and troubling questions Does redeeming slaves actually increase the demand for and so the number of slaves And what about cases where it is far from clear that redemption will improve the material condition or increase the real freedom of a slave Buying Freedom includes essays by the editors and by Dean Karlan and Alan Krueger Carol Ann Rogers and Kenneth Swinnerton Arnab Basu and Nancy Chau Stanley Engerman Jonathan Conning and Michael Kevane Jok Madut Jok Ann McDougall Lisa Cook Margaret Kellow John Stauffer and Howard McGary **Beyond the Invisible Hand** Kaushik Basu, 2016-08-02 Why economics needs to focus on fairness and not just efficiency One of the central tenets of mainstream economics is Adam Smith's proposition that given certain conditions self-interested behavior by individuals leads them to the social good almost as if orchestrated by an invisible hand This deep insight has over the past two centuries been taken out of context contorted and used as the cornerstone of free market orthodoxy In *Beyond the Invisible Hand* Kaushik Basu argues that mainstream economics and its conservative popularizers have misrepresented Smith's insight and hampered our understanding of how economies function why some economies fail and some succeed and what the nature and role of state intervention might be Comparing this view of the invisible hand with the vision described by Kafka in which individuals pursuing their atomistic interests devoid of moral compunction end up creating a world that is mean and miserable Basu argues for collective action and the need to shift our focus from the efficient society to one that is also fair Using analytic tools from mainstream economics the book challenges some of the precepts and propositions of mainstream economics It maintains that by ignoring the role of culture and custom traditional economics promotes the view that the current system is the only viable one thereby serving the interests of those who do well by this system *Beyond the Invisible Hand* challenges readers to fundamentally rethink the assumptions underlying modern economic thought and proves that a more equitable society is both possible and sustainable and hence worth striving for By scrutinizing Adam Smith's theory this impassioned critique of contemporary mainstream economics debunks traditional beliefs regarding best economic practices self-interest and the social good **Liberalism: Old and New: Volume 24, Part 1** Ellen Frankel Paul, Fred D. Miller, Jeffrey Paul, 2007-02-12 In this collection thirteen prominent philosophers and political scientists address the nature of liberalism its origins and its meaning and proper interpretation Some essays examine the writings of liberalism's earliest defenders like John Locke and Adam Smith or the influence of classical liberalism on the American founders Some focus on the Progressive movement and the rise of the administrative state while others defend particular conceptions of liberalism or examine liberal theories of justice including those of John Rawls and Robert Nozick Several essays discuss the U.S. Constitution seeking to determine whether it is best viewed as empowering the federal government to achieve certain ends or as strictly limiting its power to ensure the broadest freedom for individuals to pursue their own ends Other essays address the limits of economic freedom or focus on the nature and extent of property rights and the government's power of eminent domain *Bioethics*

Helga Kuhse,Udo Schüklenk,Peter Singer,2015-10-19 Now fully revised and updated Bioethics An Anthology 3rd edition contains a wealth of new material reflecting the latest developments This definitive text brings together writings on an unparalleled range of key ethical issues compellingly presented by internationally renowned scholars The latest edition of this definitive one volume collection now updated to reflect the latest developments in the field Includes several new additions including important historical readings and new contemporary material published since the release of the last edition in 2006 Thematically organized around an unparalleled range of issues including discussion of the moral status of embryos and fetuses new genetics neuroethics life and death resource allocation organ donations public health AIDS human and animal experimentation genetic screening and issues facing nurses Subjects are clearly and captivatingly discussed by globally distinguished bioethicists A detailed index allows the reader to find terms and topics not listed in the titles of the essays themselves *Economics, Culture and Development* Eiman O. Zein-Elabdin,2017-09-19 This book examines the treatment of culture and development in the discipline of economics thereby filling a conspicuous gap in current literature Economics has come a long way to join the cultural turn that has swept the humanities and social sciences in the last half century This volume identifies some of the issues that major philosophies of economics must address to better grasp the cultural complexity of contemporary economies This book is an extensive survey of the place of culture and development in four theoretical economic perspectives Neoclassical Marxian Institutional and Feminist Organized in nine chapters with three appendices and a compendium of over 50 interpretations of culture by economists this book covers vast grounds from classical political economy to contemporary economic thought The literatures reviewed include original and new institutionalism cultural economics postmodern Marxism economic feminism and the current culture and development discourse on subjects such as economic growth in East Asia businesswomen entrepreneurs in West Africa and comparative development in different parts of Europe Zein Elabdin carries the project further by borrowing some of the insights from postcolonial theory to call for a more profound rethinking of the place of culture and of currently devalued cultures in economic theory This book is of great interest for those who study Economic development International relations feminist economics and Economic geography *Panjab University Research Journal* ,2010 **Ethical Theory and Business** Denis G. Arnold,Tom L. Beauchamp,Norman E. Bowie,2020 Ethical Theory and Business is the authoritative guide to business ethics and CSR with cutting edge theoretical readings and cases Neo-Abolitionism David Ellerman,2021-02-17 This book argues for the abolition of the employment system in favor of workplace democracy and thus escapes the usual capitalism versus socialism binary choice by reframing the basic issue as the employment contract not private property or a market economy The author repositions the political and economic debate in the lineage of abolitionism against the owning of other people which in its modern version of neo abolitionism would also abolish the renting or hiring employing or leasing of other people The overall argument is based on three recovered theories each one of which is sufficient to yield the neo abolitionist

conclusion These three rights based theories are developed throughout the book The three theories are 1 inalienable rights theory 2 the natural rights or labor theory of property and 3 democratic theory as based on a democratic constitution that only delegates governance rights versus a non democratic constitution that alienates governance rights The book therefore is a must read for everybody interested in a better understanding of the political economy workplace democracy rights based theories and the employment system **Arguing About Political Philosophy** Matt Zwolinski, Mario I.
