Defining Globalization

Globalization seems like a Loch Ness monster that evades a particular definition. There are descriptive definitions as well as normative and prescriptive ones; the descriptive varying according to the variation of approaches and the normative standing for or against a form of globalization.

Descriptive theories of globalisation are those that inductively define the nature of globalisation by trying to identify its essential characteristics. A few common definitions are as follows:

Globalisation can be defined as a set of economic, social, technological, political and cultural structures and processes arising from the changing character of the production, consumption and trade of goods and assets that comprise the base of the international political economy. *(UNESCO)*¹

Globalization is a transplanetary process or set of processes involving increasing *liquidity* and the growing multidirectional *flows* of people, objects, places and information as well as the structures they encounter and create that are *barriers* to, or *expedite*, those flows... *(George Ritzer)*²

Globalization can thus be defined as the intensification of worldwide social relations which link distant localities in such a way that local happenings are shaped by events occurring many miles away and vice versa. *(Anthony Giddens, Former Director of the London School of Economics)*³

The concept of globalization reflects the sense of an immense enlargement of world communication, as well as of the horizon of a world market, both of which seem far more tangible and immediate than in earlier stages of modernity." *(Fredric Jameson, Professor of Literature, Duke University)*

Globalization may be thought of as a process (or set of processes) which embodies a transformation in the spatial organization of social relations and transactions - assessed in terms of their extensity,

Globalization and Its Impact on the Church in Asia Today Benjamin Pwee, 2010

Theological Education in Asia Johan Ferreira, 2020-09-29 The book presents a theological basis for theological education based on the Great Commission Matt 28 18 20 within the context of Asia The first part of the book asserts that theological education that is sound and biblical fulfills the purpose of the Great Commission by making disciples of all nations The second part of the book considers the key text on discipleship in Matthew 16 24 emphasizing that suffering is an essential aspect of following Jesus Discipleship and a theology of suffering must feature prominently in theological education These crucial aspects of the Christian life are often missing in the teaching of pastors and churches today Therefore there is an urgent need in theological education to highlight and to remedy these deficiencies The book also contains three appendices that are valuable for theological educators a set of graduate attributes for theological students a code of professional ethics for ministers and a statement on spiritual abuse The book provides invaluable reading for theological educators church leaders elders pastors and teachers

Piety and Plurality Glenn Thomas Miller, 2014-06-09 I began studying American theological education in the 1970s and Piety and Plurality is the third of three studies In Piety and Intellect I examined the colonial and nineteenth century search for a form of theological education that was true to the church's confessional traditions and responsible to the intellectual demands of the age In Piety and Profession I described how that model was modified under the impact of the new biblical criticism and by the American belief in professionalism In this volume I have tried to bring the story up to date Unfortunately I did not find one unifying theme for the period Rather theological education seemed to move forward on a number of different levels each with its own story Here I have tried to capture some of the dynamics of this movement and to indicate how theological educators have struggled with the plurality in their midst In the process theological education has learned to live with its contradictions and problems As important as the stories are however there is also the story of the schools struggles to live in the midst of a constant financial crisis that checked development at every stage
