McKenna,2018-03-15 Most livestock in America currently live in cramped and unhealthy confinement have few stable social

relationships with humans or others of their species and finish their lives by being transported and killed under stressful conditions In *Livestock* Erin McKenna allows us to see this situation and presents alternatives She interweaves stories from visits to farms interviews with producers and activists and other rich material about the current condition of livestock In addition she mixes her account with pragmatist and ecofeminist theorizing about animals drawing in particular on John Dewey s account of evolutionary history and provides substantial historical background about individual species and about human animal relations This deeply informative text reveals that the animals we commonly see as livestock have rich evolutionary histories species specific behaviors breed tendencies and individual variation just as those we respect in companion animals such as dogs cats and horses To restore a similar level of respect for livestock McKenna examines ways we can balance the needs of our livestock animals with the environmental and social impacts of raising them and she investigates new possibilities for human ways of being in relationships with animals This book thus offers us a picture of healthier more respectful relationships with livestock

Communities, Development, and Sustainability across Canada John T. Pierce, Ann Dale, 2011-11-01 What is a sustainable community The pressing need to answer this simple question is what prompted John Pierce and Ann Dale to gather the essays in this volume *Communities Development and Sustainability across Canada* is a timely synthesis of work on how Canadian communities can achieve sustainable development It bridges the gap between theory and praxis and brings together academics policy makers and community activists all of whom have argued for increased local participation in sustainable community development Communities have become the weak link in efforts to refashion relations between the environment and the economy The goal of this book is not simply to describe problems but also to suggest answers not simply to offer theory but also to promote action so that Canadian communities can better achieve sustainable development The twelve essays are organized into four sections Vision Connections Action and Assessing Progress The first and last sections discuss local sustainable development within the context of increasing globalization The second section approaches sustainable development from the perspective of social evolution and urban systems The third section the heart of the book is comprised of three community case studies an assessment of the Pacific salmon fishery and four general discussions of sustainable development The conclusion reiterates the need to make communities stronger links in sustainable development The message of *Communities Development and Sustainability across Canada* is clear it is time for communities themselves to act if they are to achieve sustainable development This provocative and persuasive book will prove to be a valuable guide to taking the first steps

Rural Inventions Sarah Farmer, 2020-02-19 At the close of the twentieth century even as globalization spurred the growth of megacities worldwide inhabiting the French countryside had become an internationally shared fantasy and practice Accounts of moving into old farmhouses were bestsellers and houses and barns built by peasants had been renovated as second homes throughout the rural hinterland Such developments Sarah Farmer argues did not simply stem from nostalgia for a rural past or a desire to invest in real estate Rather they defined new

versions of the rural that emerge in post agrarian societies In post World War II France cutting edge technological modernization and explosive economic growth uprooted rural populations and eroded the village traditions of a largely peasant nation And yet this book argues rural France did not vanish in the sweeping transformations of the 1950s and 1960s The French responded to the collapse of peasant society and threats to cherished landscapes by devising new ways of inhabiting the countryside making them the sites of change and adaptation In addition to the rise of restored peasant houses as second residences Rural Inventions explores the utopian experiments in rural communes and in going back to the land environmentalism the extraordinary success of peasant autobiographies photography and other representations through which the French revalorized rural life and landscapes The peasantry as a social class may have died out but the countryside persisted valued as a site not only for agriculture but increasingly for sport and leisure tourism social and political engagement and a natural environment worth protecting The postwar French state and the nation s rural and urban inhabitants Sarah Farmer eloquently shows remade the French countryside in relation to the city and to the world at large not only invoking traditional France but also creating a vibrant and evolving part of the France yet to come
