**Patterns of Inter-ethnic Relations with the Roma in the Carpathian Basin** József Kotics, 2023-10-30 Almost three decades of anthropological fieldwork on ethnic coexistence situations completed by the author of the present volume have revealed that in the multi ethnic local communities of the Carpathian Basin Roma non Roma coexistence practices are always based on opposition regardless of whether the latter are Romanians Saxons Slovaks Ukrainians or Hungarians After presenting the theoretical methodological framework and historical processes this book presents patterns of Roma non Roma coexistence that emerge through case studies which can be directly applied in the fight against the exclusion and stigmatisation of the Roma today Thus the book discusses two applied anthropology projects where research results have been used in urban regeneration and development projects It interprets cannibalism charges against Gypsies as a typical type of chimerical prejudice Through the case studies it contributes to existing research by interpreting the coexistence of different ethnicities in the local socio historical context in the local embeddedness of inter ethnic relations as a constantly evolving and changing phenomenon focusing on the performativity dynamic interaction and functional role of relations

**'The Damned Fraternitie': Constructing Gypsy Identity in Early Modern England, 1500-1700** Frances Timbers, 2016-04-20 The Damned Fraternitie Constructing Gypsy Identity in Early Modern England 1500 1700 examines the construction of gypsy identity in England between the early sixteenth century and the end of the seventeenth century Drawing upon previous historiography a wealth of printed primary sources including government documents pamphlets rogue literature and plays and archival material quarter sessions and assize cases parish records and constables s accounts the book argues that the construction of gypsy identity was part of a wider discourse concerning the increasing vagabond population and was further informed by the religious reformations and political insecurities of the time The developing narrative of a fraternity of dangerous vagrants resulted in the gypsy population being designated as a special category of rogues and vagabonds by both the state and popular culture The alleged Egyptian origin of the group and the practice of fortune telling by palmistry contributed elements of the exotic which

contributed to the concept of the mysterious alien However as this book reveals a close examination of the first gypsies that are known by name shows that they were more likely Scottish and English vagrants employing the ambiguous and mysterious reputation of the newly emerging category of gypsy This challenges the theory that sixteenth century gypsies were migrants from India and or early predecessors to the later Roma population as proposed by nineteenth century gypsiologists The book argues that the fluid identity of gypsies whose origins and ethnicity were and still are ambiguous allowed for the group to become a prime candidate for the other thus a useful tool for reinforcing the parameters of orthodox social behaviour

Encyclopedia of the World's Minorities Carl Skutsch,2013-11-07 This study of minorities involves the difficult issues of rights justice equality dignity identity autonomy political liberties and cultural freedoms The A Z Encyclopedia presents the facts arguments and areas of contention in over 560 entries in a clear objective manner For a full list of entries contributors and more visit the Encyclopedia of the World s Minorities website *Gypsy and Traveller Ethnicity* Brian A

Belton,2004-08-02 The book explores the notion of Gypsy and Traveller ethnicity and provides a critique of the conceptual basis of racial and ethnic categorisation An analysis of the post war housing situation is given in order to illustrate a connection between social and economic conditions legislation affecting gypsies and travellers and the visibility and general consciousness of the gypsy and traveller population The originality of the book lies in its argument that the position of gypsies and travellers largely arises out of social conditions and interaction rather than political biological or ideological determinants It puts forward the notion of an ethnic narrative of traveller identity and illustrates how variations of this have been defensively deployed by some travellers and elaborated on by theorists Belton focuses on the social generation of travellers as a cultural ethnic and racial categorization offering a rational explanation of the development of an itinerant population that is less ambiguous and more informative in terms of the social nature of the gypsy and traveller position than interpretations based on blood breed stock ethnicity or race that dominate the literature *Inward Looking* Aleksandar G.

Marinov,2019-10-03 At present Roma are an integral part of Europe though they face structural and social inequalities and different forms of exclusion and discrimination Inward Looking seeks to understand the relationship between Romani identity performance and migration Particularly it studies the idea of Romanipe through the prism of the personal accounts of Romani migrants It also seeks to understand the relationships between the Romani groups in Europe due to their increased travel and convergence and predict the effects of migration on new Romani consciousness The findings are based on qualitative data gathered from Romani migrants from three towns in Bulgaria The Roma and the Holocaust María Sierra,2024-04-18

Half a million European Roma were exterminated by the Nazi regime many more were subjected to a policy of racial discrimination similar to that suffered by the Jewish people However the persecution and torment of Roma in Hitler s Europe has little presence in the history books The Roma and the Holocaust places the Roma genocide in the context of the widespread violence of the Second World War while offering an explanation that places it within a broader trajectory of anti

Roma persecution in modern societies The book explores the separation and destruction of families the sterilisation of adults and children the plunder of property and deprivation of livelihoods slave labour medical experiments the horror of extermination camps and the mass murder that the Romani people were subjected to Mar a Sierra uses the first section of the book to provide a much needed critical overview and synthesis of the fragmented research and scholarship in the area that has been conducted in various languages In the second section Sierra shines a light the autobiographical accounts of several Roma survivors of the Nazi genocide in order for the voices of the victims who have claimed recognition and rights for the Roma people to be heard This journey through the memories of Philomena Franz Ceija Stojka Lily Van Angeren Otto Rosenberg Walter Winter and Ewald Hanstein in addition to other testimonies is contextualized within the framework of other Holocaust survivors memoirs and has been approached from a history of emotions perspective With the Romani people having been denied recognition as victims of Nazism after the end of the war this book crucially helps to bring about agency for the survivors supporting their struggle for the right to memory in the process

**Transnational Spanish Studies** Catherine Davies, Rory O'Bryen, 2020-06-17 The focus of this book is two fold First it traces the expansive geographical spread of the language commonly referred to as Spanish This has given rise to multiple hybrid formations over time emerging in the clash of multiple cultures languages and religions within and between great empires Roman Islamic Hispano Catholic each with expansionist policies leading to wars huge territorial gains and population movements This long history makes Hispanophone culture itself a supranational trans imperial one long before we witness its various national cultures being refashioned as a result of the transnational processes associated with globalization today Indeed the Spanish language we recognise today was transnational long before it was ever the foundation of a single nation state Secondly it approaches the more recent post national translingual and inter subjective border crossings that characterise the global world today with an eye to their unfolding within this long trans imperial history of the Hispanophone world In doing so it maps out some of the contemporary post colonial decolonial and trans Atlantic inflections of this trans imperial history as manifest in literature cinema music and digital cultures Contributors Christopher J Pountain L P Harvey James T Monroe Rosaleen Howard Mark Thurner Alexander Samson Andrew Ginger Samuel Llano Philip Swanson Claire Taylor Emily Baker Elzbieta Slodowska Francisco J Hernandez Adri n Henriette Partzsch Helen Melling Conrad James and Benjamin Quarshie
