**Trinity, Freedom and Love** Piotr Malysz,2012-08-02 By critically engaging Eberhard J ngel s doctrine of the Trinity this volume makes a broader constructive contribution to contemporary trinitarian thought The argument centers on the question posed by the inconsistencies uncovered in J ngel s doctrine of God of how one can assert both divine freedom and the inter subjectivity of God s trinitarian self determination Can one maintain God s freedom in the interest of divine spontaneity and creativity while remaining committed to inter subjective vulnerability which the Cross entails as an event of divine love Malysz suggests that

a resolution to this problem lies in a logic of divine freedom which next to the trinitarian logic of love constitutes a different and simultaneous mode of trinitarian relationality To develop this logic Malysz draws on J ngel s understanding of human freedom as rooted in the elemental interruption of the self securing subject Malysz thus not only brings J ngel s view of divine freedom into correspondence with the anthropological effects that J ngel ascribes to it but above all offers an imaginative new way of closely integrating the doctrine of God and theological anthropology

**Exile** James M. Scott,1997 The exiles of Israel and Judah cast a long shadow over the biblical text and the whole subsequent history of Judaism Scholars have long recognized the importance of the theme of exile for the Hebrew Bible Indeed critical study of the Old Testament has at least since Wellhausen been dominated by the Babylonian exile of Judah In 586 BC several factors including the destruction of Jerusalem the cessation of the sacrificial cult and of the monarchy and the experience of the exile began to cause a transformation of Israelite religion which supplied the contours of the larger Judaic framework within which the various forms of Judaism including the early Christian movement developed Given the importance of the exile to the development of Judaism and Christianity even to the present day this volume delves into the conceptions of exile which contributed to that development during the formative period

**The 'Jewish Question' in German Literature, 1749-1939** Ritchie

Robertson,2001-10-18 The Jewish Question in German Literature 1749 1939 is an erudite and searching literary study of the uneasy position of the Jews in Germany and Austria from the first pleas for Jewish emancipation during the Enlightenment to the eve of the Holocaust Trying to avoid hindsight and drawing on a wide range of literary texts Ritchie Robertson offers a close examination of attempts to construct a Jewish identity suitable for an increasingly secular world He examines both literary portrayals of Jews by Gentile writers whether antisemitic friendly or ambivalent and efforts to reinvent Jewish identities by the Jews themselves in response to antisemitism culminating in Zionism No other study by a single author deals with German Jewish relations so comprehensively and over such a long period of literary history Robertson s new work will prove stimulating for anyone interested in the modern Jewish experience as well as for scholars and students of German fiction prose and political culture

*Philosophical Faith and the Future of Humanity* Helmut Wautischer,Alan M.

Olson,Gregory J. Walters,2012-01-02 Karl Jaspers who died in 1969 had a profound impact on 20th century theology and philosophy His central thesis called for among other things a de centering of philosophy from its Eurocentric roots and a renewal of its dialogue with other traditions especially Asian ones This collection of essays includes unpublished work by Jaspers himself as well as testimonies to his life and career by colleagues associates and translators some of who knew Jaspers personally Readers will also find commentary and interpretation by researchers who have explored Jaspers work for decades and a biographical account of Jaspers student Leonard Ehrlich who handled much of Jaspers English translation The book interrogates Jaspers conceptions of philosophical faith his philosophy of communication and the prospects for world philosophy in the future Focusing on philosophical faith it assesses Jaspers interpretations of key philosophers such as Kant

Hegel Schelling Kierkegaard Nietzsche and Rosenzweig as well as examining his personal relationships with Bultmann and Heidegger Contributors also look at Jaspers philosophies of religion and history his hypothesis of the axial age Achsenzeit and his contributions to metaphysics periechontology and economics Finally chapters cover Jaspers philosophy of communication and world history The latter are informed by a burgeoning interest in Kantian Freiheitphilosophie that influenced Jaspers as well as concerns over the future of humanity These concerns in part account for Jaspers growing popularity in the Middle East Eastern Europe Central South America and Asia Also included are lucid clarifications of the difference between religious and philosophical faith and the relevance of certainty trust and communication for a future of mankind Trained as a psychiatrist Jaspers practiced this profession before becoming a philosopher and thus had a keen insight into the workings of the human mind even as he challenged the philosophical establishment of his time It is perhaps this depth to his background that adds to the contemporary relevance of his work

*The Transformation of Foreign Policy* Gunther Hellmann, Andreas Fahrmeir, Miloš Vec, 2016-07-14 The study of foreign policy is usually concerned with the interaction of states and thus with governance structures which emerged either with the so called Westphalian system or in the course of the 18th century diplomacy and international law As a result examining foreign policy in earlier periods involves conceptual and terminological difficulties which echo current debates on post national foreign policy actors like the European Union or global cities This volume argues that a novel understanding of what constitutes foreign policy may offer a way out of this problem It considers foreign policy as the outcome of processes that make some boundaries different from others and set those that separate communities in an internal space apart from those that mark foreignness The creation of such boundaries which can be observed at all times designates specific actors which can be but do not have to be states as capable of engaging in foreign policy As such boundaries are likely to be contested they are unlikely to provide either a single or a simple distinction between insides and outsides In this view multiple layers of foreign policy actors with different characteristics appear less as a modern development and more as a perennial aspect of foreign policy In a broad perspective stretching from early Greek polities to present day global cities the volume offers a theoretical and empirical presentation of this concept by political scientists jurists and historians

Fisher, Justin R. Garcia, Rosemarie Sokol Chang, 2013-01-30

Over the last decade there has been increasing debate as to whether feminism and evolutionary psychology can co exist Such debates often conclude with a resounding no often on the grounds that the former is a political movement while the latter is a field of scientific inquiry In the midst of these debates there has been growing dissatisfaction within the field of evolutionary psychology about the way the discipline and others have repeatedly shown women to be in passive roles when it comes to survival and reproduction Evolutionary behavioral research has made significant strides in the past few decades but continues to take for granted many theoretical assumption that are perhaps in light of the most recent evidence misguided As a result the research community has missed important areas of research and in some cases will likely come to inaccurate conclusions based on existing dogma rather than rigorous theoretically driven research Bias in the field of evolutionary psychology echoes the complaints against the political movement attached to academic feminisms This is an intellectual squabble where much is at stake including a fundamental understanding of the evolutionary significance of women s roles in culture mothering reproductive health and physiology mating female alliances female aggression and female intrasexual competition Evolution s Empress identifies women as active agents within the evolutionary process The chapters in this volume focus on topics as diverse as female social interactions mate competition and mating strategies motherhood women s health sex differences in communication and motivation sex discrimination and women in literature The volume editors bring together a diverse range of perspectives to demonstrate ways in which evolutionary approaches to human behavior have thus far been too limited By reconsidering the role of women in evolution this volume furthers the goal of generating dialogue between the realms of women s studies and evolutionary psychology **Catalog of Copyright Entries.
