Tribes Without Rulers John Middleton, David Tait, 2013-11-05 Recent research in Africa has shown a wide range of political systems from small societies of wandering hunters to large states of several million people comparable with mediaeval European feudal kingdoms In between are many societies in which a central government is lacking the political system is based upon a balance of power between many small groups which with their lack of classes or specialized political offices have been called ordered anarchies First published in 1958 *Why Humans Fight* Siniša Malešević, 2022-10-06 Malešević offers a novel sociological answer to the age old question Why do humans fight Instead of focusing on the motivations of

solitary individuals he emphasises the centrality of the social and historical contexts that make fighting possible He argues that fighting is not an individual attribute but a social phenomenon shaped by one's relationships with other people Drawing on recent scholarship across a variety of academic disciplines as well as his own interviews with the former combatants Malevi shows that one's willingness to fight is a contextual phenomenon shaped by specific ideological and organisational logic This book explores the role biology psychology economics ideology and coercion play in one's experience of fighting emphasising the cultural and historical variability of combativeness By drawing from numerous historical and contemporary examples from all over the world Malevi demonstrates how social pugnacity is a relational and contextual phenomenon that possesses autonomous features

How Fighting Ends Holger Afflerbach,Hew Strachan,2012-07-26 There are many histories of how wars have begun but very few which discuss how they have ended This book fills that gap Beginning with the Stone Age and ending with globalized terrorism it addresses the specific issue of surrender rather than the subsequent establishment of peace At its heart is the individual warrior or soldier and his or her decision to lay down arms In the ancient world surrender led in most cases to slavery but a slave still lived rather than died In the modern world international law gives the soldiers rights as prisoners of war and those rights include the prospect of their eventual return home But individuals can surrender at any point in a war and without having such an effect that they end the war The termination of hostilities depends on a collective act for its consequences to be decisive It also requires the enemy to accept the offer to surrender in the midst of combat In other words like so much else in war surrender depends on reciprocity on the readiness of one side to stop fighting and of the other to accept that readiness This volume argues that surrender is the single biggest contributor to the containment of violence in warfare offering the vanquished the opportunity to survive and the victor the chance to show moderation and magnanimity Since the rules of surrender have developed over time they form a key element in understanding the cultural history of warfare

Every War Must End Fred Charles Iklé,2005 Every War Must End analyzes the many critical obstacles to ending a war an aspect of military strategy that is frequently and tragically overlooked Ikli considers a variety of examples from twentieth century history and examines specific strategies that effectively won the peace In the new preface Ikli explains how U S political decisions and military strategy and tactics in Iraq have delayed and indeed jeopardized a successful end to hostilities
