

FIGURATIVE LANGUAGE

Simile

A simile is a type of figurative language which is used to compare one thing against another. Similes compare the likeness of two things and often feature the words 'like' or 'as': "As strong as an ox/ As brave as a lion."

Metaphor

A metaphor is a phrase describing something as something it is not in reality. It is used to compare two things symbolically. A metaphor literally describes something as something it is not. "Love is a battlefield"

Oxymoron

An oxymoron is a term which features two words which appear to contradict each other but make sense of the situation overall.

- For example: That woman is pretty ugly.

Hyperbole

A hyperbole is a figure of speech which exaggerates the meaning of a sentence.

- For example: My granddad is as old as time.

Idiom

An idiom is a phrase which bears no literal meaning to the situation it is describing but it implies the facts or story behind it.

- For example: There is a silver lining in every cloud.

Personification

Personification is a type of figurative language. It is used to give an inanimate object or item a sense of being alive. The speaker would talk to the object as if it could understand and was intelligent.

- For example: Why are you so heavy, suitcase?

Symbolism

Symbolism is another form of figurative language which is used to express an abstract idea using an item or words.

- For example: We had to put out a red alert.

Alliteration

- For example: A horse is a very stable animal.

Irony

A form of figurative speech is irony. This is when a statement made is directly contradictory to the reality. It is also used to convey a style of sarcasm.

Figurative Language

Albert N. Katz

Figurative Language:

"Fire I' the Blood" Richard E. Mezo, 1999 There are great differences between the oral use of figurative language and its written use Nevertheless the only separately published textbook for figurative language is almost entirely concerned with oral figurative language offering such examples as you have a heart of stone or you make my blood boil Much if not most oral language consists of long repetitious portions of cliché and platitude and not surprisingly the figurative language used follows the same pattern Writing teachers generally ask their students not to use clichés and platitudes even though they may mistakenly I think advise students to write like you speak

Figurative Language Barbara Dancygier, Eve Sweetser, 2014-03-06 This lively comprehensive and practical book offers a new integrated and linguistically sound understanding of what figurative language is

Understanding Figurative Language Sam Glucksberg, 2001-07-26 This book examines how people understand utterances that are intended figuratively Traditionally figurative language such as metaphors and idioms has been considered derivative from more complex than ostensibly straightforward literal language Glucksberg argues that figurative language involves the same kinds of linguistic and pragmatic operations that are used for ordinary literal language Glucksberg's research in this book is concerned with ordinary language expressions that are used in daily life including conversations about everyday matters newspaper and magazine articles and the media Metaphor is the major focus of the book Idioms however are also treated comprehensively as is the theory of conceptual metaphor in the context of how people understand both conventional and novel figurative expressions A new theory of metaphor comprehension is put forward and evaluated with respect to competing theories in linguistics and in psychology The central tenet of the theory is that ordinary conversational metaphors are used to create new concepts and categories This process is spontaneous and automatic Metaphor is special only in the sense that these categories get their names from the best examples of the things they represent and that these categories get their names from the best examples of those categories Thus the literal shark can be a metaphor for any vicious and predatory being from unscrupulous salespeople to a murderous character in *The Threepenny Opera* Because the same term e.g. shark is used both for its literal referent and for the metaphorical category as in *My lawyer is a shark* we call it the dual reference theory The theory is then extended to two other domains idioms and conceptual metaphors The book presents the first comprehensive account of how people use and understand metaphors in everyday life

Figurative Language, Genre and Register Alice Deignan, Jeannette Littlemore, Elena Semino, 2013-03-07 This volume combines diverse research scenarios to present a solid framework for analysis of figurative language *Figurative Language Genre and Register* brings together discourse analysis and corpus linguistics in a cutting edge study of figurative language in spoken and written discourse The authors explore a diverse range of communities from chronic pain sufferers to nursery staff to present a detailed framework for the analysis of figurative language The reader is shown how figurative language is used between members of these communities to construct their

own world view and how this can change with a shift in perspective Figurative language is shown to be pervasive and inescapable but it is also suggested that it varies significantly across genres *Interpreting Figurative Meaning* Raymond W. Gibbs, Jr., Herbert L. Colston, 2012-04-16 *Interpreting Figurative Meaning* critically evaluates the recent empirical work from psycholinguistics and neuroscience examining the successes and difficulties associated with interpreting figurative language There is now a huge often contradictory literature on how people understand figures of speech Gibbs and Colston argue that there may not be a single theory or model that adequately explains both the processes and products of figurative meaning experience Experimental research may ultimately be unable to simply adjudicate between current models in psychology linguistics and philosophy of how figurative meaning is interpreted Alternatively the authors advance a broad theoretical framework motivated by ideas from dynamical systems theory that describes the multiple interacting influences which shape people's experiences of figurative meaning in discourse This book details past research and theory offers a critical assessment of this work and sets the stage for a new vision of figurative experience in human life **Figurative**
