Haralson, 2014-01-21 The Encyclopedia of American Poetry The Twentieth Century contains over 400 entries that treat a broad range of individual poets and poems along with many articles devoted to topics schools or periods of American verse in the century Entries fall into three main categories poet entries which provide biographical and cultural contexts for the author s career entries on individual works which offer closer explication of the most resonant poems in the 20th century canon and topical entries which offer analyses of a given period of literary production school thematically constructed category or other verse tradition that historically has been in dialogue with the poetry of the United States

The Impossible Mark Jago, 2014-04-24 Mark Jago presents an original philosophical account of meaningful thought in particular how it is meaningful to think about things that are impossible We think about impossible things all the time We can think about alchemists trying to turn base metal to gold and about unfortunate mathematicians trying to square the circle We may ponder whether god exists and philosophers frequently debate whether properties numbers sets moral and aesthetic qualities and qualia exist In many philosophical or mathematical debates when one side of the argument gets things wrong it necessarily gets them wrong As we consider both sides of one of these philosophical arguments we will at some point think about something that s impossible Yet most philosophical accounts of meaning and content hold that we can t meaningfully think or reason about the impossible In The Impossible Jago argues that we often gain new information new beliefs and sometimes fresh knowledge through logic mathematics and philosophy That is why logic mathematics and philosophy are useful We therefore require accounts of knowledge and belief of information and content and of meaning which allow space for the impossible Jago s aim in this book is to provide such accounts He gives a detailed analysis of the concept of hyperintensionality whereby logically equivalent contents may be distinct and develops a theory in terms of possible and impossible worlds Along the way he provides a theory of what those worlds are and how they feature in our analysis of normative epistemic concepts knowledge belief information and content

Moving Beyond Fear Charles Derber,Yale R. Magrass,2018-12-07 While security stories often point to real threats the narratives of leaders are as much about legitimating the power of rulers and the political and economic system that brought them to power Derber and Magrass offer a penetrating examination of this phenomenon across history and types of societies Their analysis reveals the great irony about security stories they historically increase insecurity imperiling citizens and nation In the US today the contradiction is especially acute as security stories told by Trump divide US citizens against one another The book builds from an analysis of the extreme dangers of the prevailing security stories to a new paradigm of true security The authors develop new approaches as our best hope for avoiding catastrophe and creating a socially just society based on real security for a nation and for humans across the planet

explores the process of economic transformation using Senegal as an example Sound macroeconomic and fiscal policies are prerequisites for achieving this kind of transformation but these policies need to include the appropriate industrial policies and good economic governance which provide incentives to help small and medium sized enterprises emerge from the informal sector and for foreign direct investment to use the country as a platform for globally competitive production In many low income countries extensive rent seeking and patronage have generated stability at the expense of inclusive growth and held back development Although policymakers know what is needed to address these problems and achieve economic transformation and diversification how to do it remains a challenge This book shows how the political economy of reform may be navigated to achieve transformation For example the use of special economic zones may solve the problem if good global governance is emphasized along with linking the zones to the global economy

Derrida's Marrano Passover Agata Bielik-Robson, 2022-12-15 In this first ever monograph on Jacques Derrida s Toledo confession where he portrayed himself as sort of a Marrano of the French Catholic culture Agata Bielik Robson shows Derrida s marranismo to be a literary experiment of auto fiction She looks at all possible aspects of Derrida s Marrano identification in order to demonstrate that it ultimately constitutes a trope of non identitarian evasion that permeates all his works just as Marranos cannot be characterized as either Jewish or Christian so is Derrida s universal Marranism an invitation to think philosophically politically and last but not least metaphysically without rigid categories of identity and belonging By concentrating on Derrida s deliberate choice of marranismo Bielik Robson shows that it penetrates deep into the very core of his late thinking constantly drawing on the literary works of Kafka Celan Joyce Cixous and Val ry and throws a new light on his early works most of all *Of Grammatology* *Dissemination* and *Diff rance* She also offers a completely new interpretation of many of Derrida s works only seemingly non related to the Marrano issue

like Glas Given Time Counterfeit Money Death Penalty Seminar and Specters of Marx In these new readings this book demonstrates that the Marrano Derrida is not a marginal auto biographical figure overshadowed by Derrida the Philosopher it is one and the same thinker who discovered marranismo as a literary trope of openness offering up a new genre of philosophical story telling which centers around Derrida s Marrano auto fable *OECD-FAO Agricultural Outlook 2015*
