Selling Yellowstone Mark Daniel Barringer, 2002 For as long as they have existed the national parks have been the scene of some of the most intensive commercial activity in the American West *Selling Yellowstone* recounts the story of such activities in our oldest park from the 1870s through the 1960s It is the first book to examine critically the role of business in the development of America's national parks demonstrating how profit driven entrepreneurs shaped the physical landscape of what is generally perceived as unaltered wilderness Jacket *Voice of the Marketplace* Joseph A. Pratt, William H. Becker, William M. McClenahan, 2002 The National Petroleum Council NPC emerged out of the close cooperation between the petroleum industry and the federal government during World War II An industry financed advisory committee designed to work closely with the Department of the Interior it enjoyed a remarkable independence from political or financial pressures Including representatives of all phases of the petroleum business the NPC could reach deep within the industry for information on vital issues In the last fifty plus years the Council has evolved into a voice of the marketplace analyzing conditions in the petroleum industry at the request of the government and publishing its findings in reports widely considered authoritative and useful Three uniquely qualified historians here chronicle the development and contributions of the NPC to both the energy industry and the American market While technological advances skyrocketing world demand the rise of OPEC and far reaching regulatory initiatives have fundamentally transformed the petroleum industry's structure and operating environment the National Petroleum Council has remained a reliable source of authoritative information Joseph A Pratt William H Becker and William McClenahan Jr analyze the choices and strategies that have given the Council the adaptability and resilience to survive and remain important The authors look also at the actual reports generated by the Council more than two hundred studies to date and the impact they have had on both government and business They examine the NPC's ability to tap information and personnel from all sectors of the industry and to fund from industry resources studies that would have exceeded the pockets of the federal government They consider the way the Council has managed to encompass the varied viewpoints within a diverse highly competitive industry and particularly to bridge the sharp historical division between the majors and the independents Finally the authors analyze the one political concern that has remained constant for the industry antitrust This engagingly written book not only sheds light on the petroleum industry and its regulatory context but also addresses the larger questions of the U S government's relations with the industries it regulates **Branding Hoover's FBI** Matthew Cecil, 2016-09-16 Hunting down America's public enemies was just one of the FBI's jobs Another perhaps more vital and certainly more covert was the job of promoting the importance and power of the FBI a process that Matthew Cecil unfolds clearly for the first time in this eye opening book The story of the PR men who fashioned the Hoover era Branding Hoover's FBI reveals precisely how the Bureau became a monolithic organization of thousands of agents who lived and breathed a well crafted public relations message image and worldview Accordingly the

book shows how the public was persuaded some would say conned into buying and even bolstering that image Just fifteen years after a theater impresario coined the term public relations the FBI under J Edgar Hoover began practicing a sophisticated version of the activity Cecil introduces those agency PR men in Washington who put their singular talents to work by enforcing and amplifying Hoover s message Louis B Nichols overseer of the Crime Records Section for more than twenty years was a master of bend your ear networking Milton A Jones brought meticulous analysis to bear on the mission Fern Stukenbroeker a gift for eloquence and Cartha Deke DeLoach a singular charm and ambition Branding Hoover s FBI examines key moments when this dedicated cadre all working under the protective wing of Associate Director Clyde Tolson manipulated public perceptions of the Bureau was the Dillinger triumph really what it seemed In these critical moments the book allows us to understand as never before how America came to see the FBI s law enforcement successes and overlook the dubious accomplishments such as domestic surveillance that truly defined the Hoover era The Integration of the US Armed Forces Morris J. MacGregor,2020-12-17 In the quarter century that followed American entry into World War II the nation s armed forces moved from the reluctant inclusion of a few segregated Negroes to their routine acceptance in a racially integrated military establishment Nor was this change confined to military installations By the time it was over the armed forces had redefined their traditional obligation for the welfare of their members to include a promise of equal treatment for black servicemen wherever they might be In the name of equality of treatment and opportunity the Department of Defense began to challenge racial injustices deeply rooted in American society For all its sweeping implications equality in the armed forces obviously had its pragmatic aspects In one sense it was a practical answer to pressing political problems that had plagued several national administrations In another it was the services expression of those liberalizing tendencies that were permeating American society during the era of civil rights activism But to a considerable extent the policy of racial equality that evolved in this quarter century was also a response to the need for military efficiency So easy did it become to demonstrate the connection between inefficiency and discrimination that even when other reasons existed military efficiency was the one most often evoked by defense officials to justify a change in racial policy Morris J MacGregor Jr received the A B and M A degrees in history from the Catholic University of America He continued his graduate studies at the Johns Hopkins University and the University of Paris on a Fulbright grant Before joining the staff of the U S Army Center of Military History in 1968 he served for ten years in the Historical Division of the Joint Chiefs of Staff *Catalog of Copyright Entries.
