International Film, Television, and Video Acronyms Matthew Stevens, 1993 The use of acronyms and abbreviations in the film television and video industries is constantly increasing the list seems endless and often baffling which makes it virtually impossible for one to comprehend what each and every acronym means This new and original book is a comprehensive international guide to some 3400 film television and video acronyms and abbreviations in current use It not only provides their meaning but also their corresponding organization s or corporation s aims and objectives their founding date their address and their telephone fax number The second section of the book lists over 1400 technical terms and their meanings Fully indexed this book provides an essential and much needed reference source for libraries educational institutions archives institutes and all of those involved in the motion picture and audiovisual industries **Video Field Production** Ron Whittaker, 1996 Offering a balanced treatment of pre production production and post production for single camera video this book provides coverage of electronic news gathering spot production corporate video and creative performance music video A chapter on legal and ethical guidelines related to current issues discusses principles of privacy and invasion of privacy definitions of defamation and the use of copyrighted materials **Dun & Bradstreet/Gale Group Industry Handbook: Entertainment and hospitality** Jennifer Zielinski, Gale Group, 2000 These volumes are compilations of data from select commonly found titles published by Gale in partnership with Dun a compilation of business statistics from the federal government performance indicators financial norms and ratios a directory of companies rankings recent mergers and acquisitions associations consultants trade information sources and trade show data and a short bibliography of articles from trade magazines Each volume has the usual fine set of Gale indexes There are SIC Standard Industry Classification to NAICS North American Industry Classification and NAICS to SIC conversion guides a geographic index and a master index The convenient organization by industry is certain to be appreciated by undergraduates yet libraries should be aware that most of

this material is repackaged from other sources which include Million Dollar Directory Dun Bradstreet's Industry Norms and Key Business Ratios and Gale's excellent Encyclopedia of Associations Consultants and Consulting Organizations Directory Encyclopedia of Business Information Sources and Trade Shows Worldwide The new volumes are well documented clearly citing the source for the original data and for the government statistics presented in Chapter 2 The merger and acquisition information is easy to read but not as complete as in Moody's manuals and the industry overview is not quite as detailed as the Standard Poor's Industry Surveys but the introductory matter is more clearly written than in most business references Libraries that own all or most of the titles listed here will find that this set duplicates and does not supersede the originals Yet an undergraduate library with a small business collection will find these titles a good buy and two year colleges high schools and small or medium sized public libraries can use them to build up their business collections relatively inexpensively Library Journal
