Robin Cooper, 2017-10-19 What would happen if everyone in your company followed a disciplined approach to cost reduction Go ahead imagine it What would it look like How can it be done The answer smart cost management Effective cost management must start at the design stage As much as 90-95% of a product's costs are added in the design process That is why effective cost management programs focus on design and manufacturing The primary cost management method to control cost during design is a combination of target costing and value engineering Target Costing Objectives Identify the cost at which your product must be manufactured at if it is to earn its profit margin at its expected target selling price Break

the target cost down to its component level and have your suppliers find ways to deliver the components they sell you at the set target prices while still making adequate returns

**Value Engineering** The connection to function An organized effort and team based approach to analyze the functions of goods and services that the design stage and find ways to achieve those functions in a manner that allows the firm to meet its target costs

**The result** Added value for your company development costs on line with added value for your company development costs on line with selling prices and added value for your customer higher quality products that meet possibly even exceed customer expectations

*The Targeting System of Language* Leonard Talmy, 2024-04-09 A proposal that a single linguistic cognitive system targeting underlies two domains of reference anaphora speech internal and deixis speech external In this book Leonard Talmy proposes that a single linguistic cognitive system targeting underlies two domains of linguistic reference those termed anaphora for a referent that is an element of the current discourse and deixis for a referent outside the discourse and in the spatiotemporal surroundings Talmy argues that language engages the same cognitive system to single out referents whether they are speech internal or speech external Talmy explains the targeting system in this way as a speaker communicates with a hearer her attention is on an object to which she wishes to refer this is her target To get the hearer s attention on it as well she uses a trigger a word such as this that here there or now The trigger initiates a three stage process in the hearer he seeks cues of ten distinct categories uses these cues to determine the target and then maps the concept of the target gleaned from the cues back onto the trigger to integrate it into the speaker s sentence achieving comprehension The whole interaction Talmy explains rests on a coordination of the speaker s and hearer s cognitive processing The process is the same whether the referent is anaphoric or deictic Talmy presents and analyzes the ten categories of cues and examines sequences in targeting including the steps by which interaction leads to joint attention A glossary defines the new terms in the argument

Footsteps or Marching Alone? Srinivas Parinandi,2023-02-21 In recent years the federal government s increasing inability to

address major societal challenges has arguably hampered America's commitment to renewable energy initiatives Individual U S states have stepped into this void and adopted their own policies leading some to believe that the states can propel America's renewable energy industry forward However we know little about how legislative and regulatory dynamics within America's states might accelerate or hinder renewable energy policy creation In *Following in Footsteps or Marching Alone* Srinivas Parinandi explores how states have devised their own novel policies and how the political workings of legislatures and public utilities commissions have impacted state renewable energy policy design Through the meticulous study of nearly three decades of state level renewable energy policy making he finds that their creation is primarily driven by legislatures and that ideologically liberal legislatures largely push the envelope The book suggests that having a predominantly state driven renewable energy effort can lead to uneven and patchwork based policy development outcomes and a possible solution is to try to more successfully federalize these issues Parinandi urges readers scholars and policy practitioners to consider whether a state led effort is adequate enough to handle the task of building momentum for renewable energy in one of the world's largest electricity markets
