Peter J. Buckley, 2018-02-23 This key new book synthesises Peter Buckley's work on the global factory the modern networked multinational enterprise The role of interfirm networks entrepreneurship and cooperation in the creation and management of global factories leads to a discussion of their governance internal knowledge transfer strategies and performance including their role in potentially combating societal failures Emerging country multinationals are examined as a special case of global factories with a focus on Indian and Chinese multinationals their involvement in tax havens and offshore financial centres the performance and processes of their acquisition strategies all seen as key aspects of globalisation **World Power**

Forsaken John Duffield, 1998-08-01 What does German unification imply for international politics Many commentators have speculated about how a united Germany will use its new found power and influence on the world stage and for good reason Because of its size central location and strong economy Germany will inevitably exert considerable influence over developments in Europe if not beyond Drawing on interviews and other primary source materials this comprehensive study examines in detail each of the central issues of Germany's security policy since 1990 its promotion of political and economic reform in the former Soviet bloc its efforts to maintain and strengthen European security institutions the transformation of Germany's armed forces and its responses to international crises and conflicts including the debate over German participation in foreign military actions Rejecting claims that German policy is becoming nationalized and militarized the author argues that Germany's actions have in fact been characterized by considerable restraint and continuity with the past notwithstanding its much greater potential freedom of action after the Cold War In order to make sense of this record the book presents a general framework of analysis that promises to be useful for explaining the security policies of a variety of states It then shows how a variety of influences both in Germany's external environment and within Germany itself have importantly shaped German security policy since unification In sharp contrast to the realist approaches that have dominated security studies the book highlights the roles played by international institutions and Germany's distinct postwar political culture in molding German state behavior In a final chapter the author discusses the likely future course of German security policy and the implications of his analysis for the theoretical study of national security policy International Airline

Alliances : EC Competition Law/US Antitrust Law and International Air Transport Angela Cheng-Jui Lu, 2003-01-01 This new study takes a keen look at the problems facing the international community due to conflicts arising from applications of varying competition laws by different competition authorities to international airline alliances As a result of privatisation deregulation liberalisation and globalisation international air carriers form alliances with one another in order to cope with growing competition in the international air transport market This book clearly provides an introduction to the background to and origin of airline alliances different models of alliances and the related anti competitive practices resulting from existing international airline alliances The potential anti competitive practices resulting from these cross border alliances trigger a

great deal of concern from various competition authorities Thus this study goes on to provide a detailed analysis regarding the relevant EC competition law and US antitrust law and their applications to alliance activities The comparison of different applications of EC competition law and US antitrust law to international airline alliances provides leading research results first hand In the conclusion the essential elements regarding establishing a level playing field in the international air transport market are identified and the author provides possible solutions for the harmonisation of different applications of competition law to international airline alliances

The Ottoman Road to War in 1914 Mustafa Aksakal,2008-12-11 Why did the Ottoman Empire enter the First World War in late October 1914 months after the war s devastations had become clear Were its leaders simple minded below average individuals as the doyen of Turkish diplomatic history has argued Or as others have claimed did the Ottomans enter the war because War Minister Enver Pasha dictating Ottoman decisions was in thrall to the Germans and to his own expansionist dreams Based on previously untapped Ottoman and European sources Mustafa Aksakal s dramatic study challenges this consensus It demonstrates that responsibility went far beyond Enver that the road to war was paved by the demands of a politically interested public and that the Ottoman leadership sought the German alliance as the only way out of a web of international threats and domestic insecurities opting for an escape whose catastrophic consequences for the empire and seismic impact on the Middle East are felt even today

Two Crows Denies it Robert Harrison Barnes,1984-01-01 In *Two Crows Denies It* R H Barnes undertakes an ambitious historical analysis of anthropological scholarship about Omaha kinship systems His groundbreaking work offers a critique of this established scholarship including the work of L vi Strauss Dorsey and Fletcher In comparing the primary and secondary accounts of Omaha descent relationship and naming systems Barnes reveals the dissonance between the reality of Omaha society and the scholarship that has formed around it Not only does he put forth a new and more realistic interpretation of Omaha sociology specifically but in so doing he provides a reinterpretation of an aspect of anthropological theory This edition includes a new introduction by Raymond J DeMallie

Global Crisis And Sustainability Technologies Kenji Uchino,2017-07-18 *Global Crisis and Sustainability Technologies* is a nontechnical introduction and overview of the current politico engineering politically initiated engineering intended for an international relationship The book focuses specifically on technologies for crisis and societal sustainability in response to natural disasters infectious diseases enormous accidents terrorist or criminal incidents war or territorial invasions elimination of toxic materials and renewable energy as well as risk management The case studies cited draw from the author s experience in the United States Japan and China and act as instructive studies that may be extended and applied to other countries

The Foundations of Mao Zedong's Political Thought, 1917-1935 Brantly Womack,2019-03-31 This study traces the development of Mao s political thinking from his earliest writings to the beginning of the Long March In a thorough examination of the early years the

author delineates Mao's distinctive perspectives, political concerns, and leadership style, the enduring components of his political identity. The analysis goes to the roots of Mao's thinking, the crucible of action, in order to demonstrate the fundamental unity of theory and practice which constituted the leading principle of Mao's thought, an approach to politics that was a major innovation within both the Chinese and Marxist political traditions.
