Nagaoka Ellen van Goethem, 2008-03-31 This is the first work to deal comprehensively with the historical and physical aspects of the Nagaoka palace and capital which were constructed in the eighth century at the order of Kanmu Tenn but abruptly abandoned after only ten years. New research and the information yielded by decades of excavation made possible this fresh reassessment of conventional theories of the construction and layout of Nagaoka as well as the life and reign of its founder. It also examines the motivations behind Nagaoka's establishment and abandonment within the context of Kanmu's reign and personal convictions. In broader terms this volume deals with the process of capital building in late eighth century Japan and the links between the Nara and Heian capitals.

[The Postwar Development of Japanese Studies in the United States](#) Helen Hardacre, 2023-07-17 The present volume documents the postwar history of United States scholarship on Japan. A careful selection of North American scholars under the general editorship of Helen Hardacre, Reischauer Institute Professor of Japanese Religions and Society at Harvard University shows that a range of factors have directed Japanese studies in the United States since 1945. Among these factors are social and political change in Japan and the United States shifts in dominant scholarly concerns about Japan and changing evaluations of area studies. The work consists of twelve essays in a wide variety of fields: history, art, religion, literature, anthropology, political science, and law. Each essay chronicles postwar scholarship in its particular discipline and provides a useful bibliography to serve further reference. The general aim of the volume is to put current debates in historical perspective and to help assess the field's achievements. It identifies areas requiring more work and charts directions for the future.
