Modern Rockhounding and Prospecting Handbook Garret Romaine, 2018-10-01 This volume gives you the basic tools to transition from pebble pup to expert rockhound and explains everything from geology basics identification tips tools of the trade how to record your findings and how to set up a lab or gem shop Before you know it you'll be driving the open roads and traveling home with dusty pockets full of rocks gems minerals fossils and maybe even gold Features geology basics popular collectibles including rocks gems fossils meteorites and gold tools of the trade for every level of collector rules and regulations polishing preserving crafting and displaying your treasures *Asbestos Exposure in India* Maya Yadav, 2016-01-06 The International Agency for Cancer Research IARC classifies asbestos as a proven human carcinogen No amount of asbestos exposure is safe for human health Consequently the use of all forms of asbestos has been banned in most of the developed countries Unfortunately India has failed to impose such a ban Despite the fact that a ban on mining in India is being placed for more than 20 years mines in the private sector of India are still in operation and asbestos continues to be used in large quantities The official reason given by both industry and government is that it is a material for the poor as it is cheap and has many good properties Generally people in the slum area often cook their food in the open wood fire under asbestos roofing This results in cracking of asbestos cement roofs exposing asbestos making it friable as the height of most rural houses roofed with asbestos cement is too small to have effective air circulation In addition on the roofs of Indian slums where it is sawn and fixed by hand it's difficult to avoid releasing a large number of dangerous fibers The inhabitants paint their asbestos roofing with emulsion paint which also deteriorates it rapidly resulting in discoloration and mould growth As a result Asbestos related diseases are more common in the slum area In this study Asbestos cement sample was randomly scanned at various magnifications to identify asbestos fibers and determine how asbestos fibers are mixed with construction materials Laboratory analyses were performed on the asbestos cement sample to establish a relationship between i

morphology shape of the crystals ii the asbestos cement mineralogical composition using SEM analyses and iii high magnification structure of the individual fibers fibrils as well as iv energy dispersive x ray analysis of the fiber chemistry by comparison to a standard Also quantification analysis of fiber length and thickness was performed due to the reason that fibrogenicity and carcinogenicity of asbestos fibers are both dependent on several fiber parameters including fiber dimensions There are several standards specified under the Factories Act and Mines Act including limits of exposure But standards in India are only on paper All forms of asbestos pose grave to human health All are proven human carcinogens There is no continued justification for the use of asbestos Its production and use should be banned worldwide A global ban on asbestos is needed *Diamonds (3rd Edition)* Antoinette Matlins,2011 Whether buying for personal pleasure or for investment in today s market of Internet auctions new diamond cuts new colours new treatments and new frauds buyers need a source of expert guidance This comprehensive guide from diamond expert and best selling author Antoinette Matlins is the unofficial bible for all diamond buyers who want to get the most for their money
