Gender-Class Equality in Political Economies Lynn Prince Cooke, 2011-03-17

Gender Class Equality in Political Economies offers an in depth analysis of gender class equality across six countries to reveal why gender class equality in paid and unpaid work remains elusive and what more policy might do to achieve better social and economic outcomes This book is the first to meld cross time with cross country comparisons link macro structures to micro behavior and connect class with gender dynamics to yield fresh insights into where we are on the road to gender equality why it varies across industrialized countries and the barriers to further progress

Unequal Time Dan Clawson, Naomi Gerstel, 2014-07-10

Life is unpredictable Control over one s time is a crucial resource for managing that unpredictability keeping a job and raising a family But the ability to control one s time much like one s income is determined to a significant degree by both gender and class In Unequal Time sociologists Dan Clawson and Naomi Gerstel explore the ways in which social inequalities permeate the workplace shaping employees capacities to determine both their work schedules and home lives and exacerbating differences between men and women and the economically privileged and disadvantaged Unequal Time investigates the interconnected schedules of four occupations in the health sector professional class doctors and nurses and working class EMTs and nursing assistants While doctors and EMTs are predominantly men nurses and nursing assistants are overwhelmingly women In all four occupations workers routinely confront schedule uncertainty or unexpected events that interrupt reduce or extend work hours Yet Clawson and Gerstel show that members of these four occupations experience the effects of schedule uncertainty in very distinct ways depending on both gender and class But doctors who are professional class and largely male have significant control over their schedules and tend to work long hours because they earn respect from their peers for doing so By contrast nursing assistants who are primarily female and working class work demanding hours because they are most likely to be penalized for taking time off no matter how valid the reasons Unequal Time also shows that the degree of control that workers hold over their schedules can either reinforce or challenge conventional gender roles Male doctors frequently work overtime and rely heavily on their wives and domestic workers to care for their families Female nurses are more likely to handle the bulk of their family responsibilities and use the control they have over their work schedules in order to dedicate more time to home life Surprisingly Clawson and Gerstel find that in the working class occupations workers frequently undermine traditional gender roles with male EMTs taking significant time from work for child care and women nursing assistants working extra hours to financially support their children and other relatives Employers often underscore these disparities by allowing their upper tier workers doctors and nurses the flexibility that enables their gender roles at home including for example reshaping their workplaces in order to accommodate female nurses family obligations Low wage workers on the other hand are pressured to put their jobs before the unpredictable events they

might face outside of work Though we tend to consider personal and work scheduling an individual affair Clawson and Gerstel present a provocative new case that time in the workplace also collective A valuable resource for workers advocates and policymakers alike Unequal Time exposes how social inequalities reverberate through a web of interconnected professional relationships and schedules significantly shaping the lives of workers and their families Interactions and Intersections of Gendered Bodies at Work, at Home, and at Play Marcia Texler Segal, 2010-07-16 Includes articles that examine the intersection of gender with other characteristics in a variety of settings including factory floors and corporate offices welfare offices state legislatures the armed forces universities social clubs and playing fields **Beyond the Typewriter** Sharon Hartman Strom, 1992 By World War I managers wanted young women with some high school education for new light manufacturing jobs in the office Women could be paid significantly less than men with equivalent educations and the marriage bar the practice of not hiring or retaining married women ensured that most of them would leave the workplace before the issue of higher salaries arose Encouraged by free training gained in high schools and by working conditions better than those available in factories young working class women sought out office jobs Facing sexual discrimination in most of the professions and higher level office jobs middle class women often found themselves falling into clerical positions Sharon Hartman Strom details office working conditions and practices drawing upon archival and anecdotal data She analyzes women office workers ambitions and explores how the influences of scientific management personnel management and secondary vocational education affected office workplaces and hierarchies Strom illustrates how businessmen manipulated concepts of scientific management to maintain male dominance and professional status and to confine women to supportive positions She finds that women s responses to the reorganized workplace were varied although they were able to advance professionally in only limited ways they used their jobs as a means of pursuing friendships education and independence **For the Family?** Sarah Damaske, 2011-10-03 In the contentious debate about women and work conventional wisdom holds that middle class women can decide if they work while working class women need to work Yet even after the recent economic crisis middle class women are more likely to work than working class women Sarah Damaske deflates the myth that financial needs dictate if women work revealing that financial resources make it easier for women to remain at work and not easier to leave it Departing from mainstream research Damaske finds three main employment patterns steady pulled back and interrupted She discovers that middle class women are more likely to remain steadily at work and working class women more likely to experience multiple bouts of unemployment She argues that the public debate is wrongly centered on need because women respond to pressure to be selfless mothers and emphasize family need as the reason for their work choices Whether the decision is to stay home or go to work women from all classes say work decisions are made for their families In *For the Family* Sarah Damaske at last provides a far more nuanced and richer picture of women work and class than the one commonly drawn *Working-class Formation* Ira Katznelson, Aristide R.

Zolberg, 1986-12-21 Applying an original theoretical framework an international group of historians and social scientists here explores how class rather than other social bonds became central to the ideologies dispositions and actions of working people and how this process was translated into diverse institutional legacies and political outcomes Focusing principally on France Germany and the United States the contributors examine the historically contingent connections between class as objectively structured and experienced and collective perceptions and responses as they develop in work community and politics Following Ira Katznelson's introduction of the analytical concepts William H Sewell Jr Michelle Perrot and Alain Cottureau discuss France Amy Bridges and Martin Shefter the United States and Jargen Kocka and Mary Nolan Germany The conclusion by Aristide R Zolberg comments on working class formation up to World War I including developments in Great Britain and challenges conventional wisdom about class and politics in the industrializing West *Her Own Worth* Eerika Koskinen-Koivisto, 2014 In this study I examine the life narrative of a female factory labourer Elsa Koskinen ne Kiikkala born in 1927 I analyze her account of her experiences related to work class and gender because I seek to gain a better understanding of how changes in these aspects of life influenced the ways in which she saw her own worth at the time of the interviews and how she constructed her subjectivity Elsa's life touches upon many of the core aspects of 20th century social change changes in women's roles the entrance of middle class women into working life women's increasing participation in the public sphere feminist movements upward social mobility the expansion of the middle class the growth of welfare and the appearance of new technologies What kind of trajectory did Elsa take in her life What are the key narratives of her life How does her narrative negotiate the shifting cultural ideals of the 20th century A life story a retrospective evaluation of a life lived is one means of constructing continuity and dealing with the changes that have affected one's life identity and subjectivity In narrating one's life the narrator produces many different versions of her/himself in relation to other people and to the world These dialogic selves and their relations to others may manifest internal contradictions Contradictions may also occur in relation to other narratives and normative discourses Both of these levels subjective meaning making and the negotiation of social ideals and collective norms are embedded in life narratives My interest in this study is in the ways in which gender and class intersect with paid labour in the life of an ordinary female factory worker I approach gender class and work from both an experiential and a relational perspective considering the power of social relationships and subject formations that shape individual life at the micro level In her narratives Elsa discusses ambivalence related to gendered ideals social class and especially the phenomenon of social climbing as well as technological advance I approach Elsa's life and narratives ethnographically The research material was acquired in a long standing interview process and the analysis is based on reflexivity of the dialogic knowledge production and contextualization of Elsa's experiences In other words I analyze Elsa's narratives in their situational but also socio cultural and historical contexts Specific episodes in one's life and other significant events constitute smaller narrative entities which I call micro narratives The analysis of micro narratives key

dialogues and cultural ideals embedded in the interview dialogues offers perspectives on experiences of social change and the narrator's sense of self

Homeworking Women Annie Phizacklea, Carol Wolkowitz, 1995-04-17 An up to date overview of all types of home based work is provided in this volume which makes an important contribution to sociological and policy debates on homeworking The authors argue that homeworking replicates wider divisions in the labour force and that its potential for improving women's employment opportunities is therefore limited Using original research they outline the advantages and disadvantages the pay and conditions and the family situations for contemporary women homeworkers Gender class racism and ethnicity are shown to be key factors in constructing the homeworking labour force The authors acknowledge the shared position that homeworkers occupy as women as well as the differences experienced by

Work Engendered Ava Baron, 2018-05-31 In tobacco fields auto and radio factories cigarmakers tenements textile mills print shops insurance companies restaurants and bars notions of masculinity and femininity have helped shape the development of work and the working class The fourteen original essays brought together here shed new light on the importance of gender for economic and class analysis and for the study of men as well as women workers After an introduction by Ava Baron addressing current problems in conceptualizing gender and work chapters by leading historians consider how gender has colored relations of power and hierarchy between employers and workers men and boys whites and blacks native born Americans and immigrants as well as between men and women in North America from the 1830s to the 1970s Individual essays explore a spectrum of topics including union bureaucratization protective legislation and consumer organizing They examine how workers concerns about gender identity influenced their job choices the ways in which they thought about and performed their work and the strategies they adopted toward employers and other workers Taken together the essays illuminate the plasticity of gender as men and women contest its meaning and its implications for class relations Anyone interested in labor history women's history and the sociology of work or gender will want to read this pathbreaking book

Home in British Working-Class Fiction Nicola Wilson, 2016-03-09 *Home in British Working Class Fiction* offers a fresh take on British working class writing that turns away from a masculinist work based understanding of class in favour of home gender domestic labour and the family kitchen As Nicola Wilson shows the history of the British working classes has often been written from the outside with observers looking into the world of the inhabitants Here Wilson engages with the long cultural history of this gaze and asks how home is represented in the writing of authors who come from a working class background Her book explores the depiction of home as a key emotional and material site in working class writing from the Edwardian period through to the early 1990s Wilson presents new readings of classic texts including *The Ragged Trousered*

Philanthropists Love on the Dole and Saturday Night and Sunday Morning analyzing them alongside works by authors including James Hanley Walter Brierley Lewis Grassie Gibbon Buchi Emecheta Pat Barker James Kelman and the rediscovered ex mill girl novelist Ethel Carnie Holdsworth Wilson's broad understanding of working class writing allows her to incorporate figures typically ignored in this context as she demonstrates the importance of home's role in the making and expression of class feeling and identity

Power At Work Marcel van der Linden, Nicole Mayer-Ahuja, 2023-07-04 Between working men and women which may include free wage earners chattel slaves indentured labourers sharecroppers domestic servants and many others and those employing them there has always been a constant mostly silent but sometimes overt struggle concerning employers discretionary power and over the interpretation of formal and informal rules There is a constantly shifting frontier of control that is an ongoing struggle for control in the workplace with managers and supervisors trying to increase their power over their subordinates and their subordinates in reaction trying to maintain and increase their relative autonomy The detailed case studies in this volume span three centuries and cover different parts of the world Still they speak to each other in many ways highlighting the fact that power at work whether on the shopfloor or beyond results from a wide range of complex interrelations Between technological innovations and the ways in which they are actually implemented Between the division of labour at the site of production or service provision and changing standards of social segmentation beyond the premises of the company which can be reinforced or weakened by management strategies of utilizing labour power as well as workers reaction to these strategies And finally between politics in production which shape the relations between capital and labour on the shopfloor and state politics of production which cannot be understood without reference to broader developments in economy and society

Employment Regimes and the Quality of Work

Duncan Gallie, 2009 The book makes a major new contribution to the sociology of employment by comparing the quality of working life in European societies with very different institutional systems France Germany Great Britain Spain and Sweden It focuses in particular on skills and skill development opportunities for training the scope for initiative in work the difficulty of combining work and family life and the security of employment Drawing on a range of nationally representative surveys it reveals striking differences in the quality of work in different European countries It also provides for the first time rigorous comparative evidence on the experiences of different types of employee and an assessment of whether there has been a trend over time to greater polarization between a core workforce of relatively privileged employees and a peripheral workforce suffering from cumulative disadvantage It explores the relevance of three influential theoretical perspectives focussing respectively on the common dynamics of capitalist societies differences in production regimes between capitalist societies and differences in the institutional systems of employment regulation It argues that it is the third of these an employment regime perspective that provides the most convincing account of the factors that affect the quality of work in capitalist societies The findings underline the importance of differences in national policies for people's experiences of work and point to the need for a renewal at European level of initiatives for improving the quality of work

A Research Agenda for Management and Organization Studies Barbara Czarniawska, 2016-08-26 Managing and organizing are now central phenomena in contemporary societies It is essential they are studied from a variety of perspectives and with equal attention paid to their past their present and their future This book collects opinions of the trailblazing scholars concerning the most important research topics essential for study in the next 15 20 years The opinions concern both traditional functions such as accounting and marketing personnel management and strategy technology and communication but also new challenges such as diversity equality waste and cultural encounters The collection is intended to be inspiration for young scholars and an invitation to a dialogue with practitioners
