Gender, Race, and Nation Vanaja Dhruvarajan, Jill Vickers, 2002-01-01 Dhruvarajan and Vickers call into question feminism s presumed universality of gender analysis and bring to the foreground the voices of marginalized women in Western society and of women outside of the western world

Nation and Gender in Contemporary Europe Vera Tolz, Stephenie Booth, 2005 Building on the growing body of theoretical literature on the gendered nature of nationalism this book offers a systematic examination of similarities and differences in the construction of gender and national identities in post communist societies of Eastern and East Central Europe as well as established and the more stable democracies of Western Europe It points to some of the key sources of inevitable tensions in the future united Europe which stem from different perceptions of national and gender roles in different parts of the continent

The Gender Politics of Development Shirin M. Rai, 2008-09-15 In The Gender Politics of Development Shirin Rai provides a comprehensive assessment of how gender politics has emerged and developed in post colonial states In chapters on key issues of nationalism and nation building the third wave of democratization and globalization and governance Rai argues that the gendered way in which nationalist statebuilding occurred created deep fissures and pressures for development She goes on to show how women have engaged with institutions of governance in

developing countries looking in particular at political participation deliberative democracy representation leadership and state feminism Through this engagement Rai claims vital new political spaces have been created Though Rai focuses in depth on how these debates have played out in India the book's argument is highly relevant for politics across the developing world This is a unique and compelling synthesis of gender politics with ideas about development from an authoritative figure in the field

The Gender Order of Neoliberalism Smitha Radhakrishnan, Cinzia D. Solari, 2023-08-09 What do mompreneurs angry working class men and migrant domestic workers all have in common They are all gendered subjects responding to the economic political and cultural realities of neoliberalism's global gender order In this ambitious book Radhakrishnan and Solari map the varied gendered pathways of a global hegemonic regime Focusing on the US the former Soviet Union and South and Southeast Asia they argue that the interconnected histories of imperialism socialism and postcolonialism have converged in a new way since the fall of the Soviet Union transforming the post war international order that preceded it Today the ideal of the empowered woman a striving entrepreneurial subject who overcomes adversity and has many choices symbolizes modernity for diverse countries competing for status in the global hierarchy This ideal bridges the painful gap between aspiration and lived reality but also spurs widespread discontent Blending social theory rich empirical evidence and a multi-sited understanding of neoliberalism this book invites all of us to question taken-for-granted knowledge about gender and capitalism and to look to grassroots international movements of the past to chart the path to a fairer future

Walled Life Jenny Stümer, 2022-02-24 Going beyond a discussion of political architecture Walled Life investigates the mediation of material and imagined border walls through cinema and art practices The book reads political walls as more than physical obstruction instead treating the wall as an affective screen capable of negotiating the messy feelings personal conflicts and haunting legacies that make up walled life as an evolving signpost in the current global border regime By exploring the wall as an emotional and visceral presence the book shows that if we read political walls as forms of affective media they become legible not simply as shields impositions or monuments but as projective surfaces that negotiate the interaction of psychological barriers with political structures through cinema art and of course the wall itself Drawing on the Berlin Wall the West Bank Separation barrier and the U S Mexico border Walled Life discovers each wall through the films and artworks it has inspired examining a wide array of graffiti murals art installations movies photography and paintings Remediating the silent barriers we erect between and often within ourselves these interventions tell us about the political fantasies and traumatic histories that undergird the politics of walls as they rework the affective settings of political boundaries

Gendered Nations Ida Blom, Karen Hagemann, Catherine Hall, 2000-05 In recent years nations nationalism and the nation state have enjoyed a resurgence of scholarly interest The focus on the twentieth century and in particular the post colonial and post socialist era however has neglected the crucial developmental phase of modern nationalism when basic patterns were created that were to exert long term influence on the political culture of nations in and outside Europe This

book examines how gender and nation legitimize and limit the access of individuals and groups to national movements and the resources of nation state From problems of inclusion exclusion and difference national wars and military systems to national symbols rituals and myths contributors present a diverse array of critical perspectives methodological approaches and case studies that are intellectually provocative and will help to guide future research as well as orient it toward international comparison This book raises new questions about nation and gender and provides an assessment of the state of research in different countries for all those interested in cultural and social history politics anthropology and gender studies

The SAGE Handbook of Nations and Nationalism Gerard Delanty, Krishan Kumar, 2006-06-14 With its list of distinguished contributors and its wide range of topics the handbook is surely destined to become an invaluable resource for all serious students of nationalism Michael Billig Professor of Social Sciences at Loughborough University and author of *Banal Nationalism* SAGE 1995 The persistence some would say revival of nationalism across the recent history of modernity in particular the past two decades has taken many scholars in the social sciences by surprise In response interest in the analysis of nationalism has increased and given rise to a great variety of new angles under which to study the phenomenon What was missing in the cacophony of voices addressing nationalism was a volume that brought them together and confronted them with each other This handbook does just that It deserves particular praise for the wide range of approaches and topics included and for the systematic attempt at studying nationalism as a phenomenon of our time not a remnant from the past Peter Wagner Professor of Social and Political Theory European University Institute and Professor of Sociology University of Warwick For students concerned with the contemporary study of nationalism this will be an invaluable publication The three fold division into approaches themes and cases is a very solid and sensible one The editors have commissioned essays from leading scholars in the field and this handbook provides the best single volume overview of contemporary nationalism John Breuilly Professor of Nationalism and Ethnicity London School of Economics Nationalism has long excited debate in political social and cultural theory and remains a key field of enquiry among historians anthropologists sociologists as well as political scientists It is also one of the critical media issues of our time There are however surprisingly few volumes that bring together the best of this intellectual diversity into one collection This Handbook gives readers a critical survey of the latest theories and debates and provides a glimpse of the issues that will shape their future Its three sections guide the reader through the theoretical approaches to this field of study its major themes from modernity to memory migration and genocide and the diversity of nationalisms found around the globe The overall aim of this Handbook is to relate theories and debates within and across a range of disciplines illuminate themes and issues of central importance in both historical and contemporary contexts and show how nationalism has impacted upon and interacted with other political and social forms and forces This book provides a much needed resource for scholars in international relations political science social theory and sociology

Ivekovic(eds.),2004-01-01 The essays in the volume consider the significance of nation and gender in the context of post 1989 transitions in the former Soviet Union and Yugoslavia and in the context of post partition India The texts critique the ways in which narratives of nationhood and womanhood naturalize and essentialize difference and hierarchy The authors explore uses of sexualized gendered imagery in defining the space of the nation and sexualized gendered metaphors of state fatherhood and motherhood in defining the distribution of power within that space of the nation e.g. feminized landscapes and battlefields and sexualized gendered metaphors of state fatherhood and motherhood in defining the distribution of power within that space The particular histories of nationalism and partition are different in the countries involved but commonalities in the narrative structures state and nation building strategies patriarchal patterns of control and mechanisms of inclusion and exclusion are striking This is particularly so with respect to the ways in which exclusive national identities are constituted through gendered representations of the nation and its members

Gender Ironies of Nationalism Tamar Mayer,2012-10-12 This book provides a unique social science reading on the construction of nation gender and sexuality and on the interactions among them It includes international case studies from Indonesia Ireland former Yugoslavia Liberia Sri Lanka Australia the USA Turkey China India and the Caribbean The contributors offer both the masculine and feminine perspective exposing how nations are comprised of sexed bodies and exploring the gender ironies of nationalism and how sexuality plays a key role in nation building and in sustaining national identity The contributors conclude that control over access to the benefits of belonging to the nation is invariably gendered nationalism becomes the language through which

sexual control and repression is justified masculine prowess is expressed and exercised Whilst it is men who claim the prerogatives of nation and nation building it is for the most part women who actually accept the obligation of nation and nation building **The Gendered Nation** Neluka Silva, 2004-05-25 In examining the literary representations of these critical junctures Neluka Silva draws upon key aspects of postcolonial nationalist and feminist theory which have influenced both the understanding of the concerned episodes and the literary productions of the authors selected By providing an implicit comparative frame of reference the author succeeds in suggesting ways in which certain choices reinforce or subvert established power relations in the fraught arena of nationalist politics in the four South Asian countries This book will be of interest to students and scholars of postcolonial literature cultural studies critical theory gender studies politics and nationalism BOOK JACKET Debating Gender Justice in Asia Asian Association of Women's Studies. Seeing Nature Through Gender Virginia Scharff, 2003 Environmental history has traditionally told the story of Man and Nature Scholars have too frequently overlooked the ways in which their predominantly male subjects have themselves been shaped by gender Seeing Nature through Gender here reintroduces gender as a meaningful category of analysis for environmental history showing how women's actions desires and choices have shaped the world and seeing men as gendered actors as well In thirteen essays that show how gendered ideas have shaped the ways in which people have represented experienced and consumed their world Virginia Scharff and her coauthors explore interactions between gender and environment in history Ranging from colonial borderlands to transnational boundaries from mountaintop to marketplace they focus on historical representations of humans and nature on questions about consumption on environmental politics and on the complex reciprocal relations among human bodies and changing landscapes They also challenge the ecofeminist position by challenging the notion that men and women are essentially different creatures with biologically different destinies Each article shows how a person or group of people in history have understood nature in gendered terms and acted accordingly often with dire consequences for other people and organisms Here are considerations of the ways we study sexuality among birds of William Byrd's masking sexual encounters in his account of an eighteenth century expedition of how the ecology of fire in a changing built environment has reshaped firefighters own gendered identities Some are playful as in a piece on the evolution of snow bunnies to shred betties Others are dead serious as in a chilling portrait of how endocrine disrupters are reinventing humans animals and water systems from the cellular level out Aiding and adding significantly to the enterprise of environmental history Seeing Nature through Gender bridges gender history and environmental history in unexpected ways to show us how the natural world can remake the gendered patterns we've engraved on ourselves and on the planet
