Gene Technology Confronting The Issues:

Gene Technology Christopher Lampton,1990 Explains the structure of human genetics and discusses how new advances in gene technology will impact society *Advances in Biotechnology and Genetic Engineering: Implications for the Development of New Biological Warfare Agents* ,1996 **The Alcalde** ,2002-01 As the magazine of the Texas Exes The Alcalde has united alumni and friends of The University of Texas at Austin for nearly 100 years The Alcalde serves as an intellectual crossroads where UT s luminaries artists engineers executives musicians attorneys journalists lawmakers and professors among them meet bimonthly to exchange ideas Its pages also offer a place for Texas Exes to swap stories and share memories of Austin and their alma mater The magazine s unique name is Spanish for mayor or chief magistrate the nickname of the governor who signed UT into existence was The Old Alcalde **Cyborg Babies** Robbie Davis-Floyd,Joseph Dumit,2013-08-21 First Published in 1998 Routledge is an imprint of Taylor Francis an informa company Genetic Technology: A New Frontier Assessment Office Of Technology,2020-09-23 First published in 1982 This report examines the application of classical and molecular genetic technologies to micro organisms plants and animals This book is one of the first comprehensive documents on emerging genetic technologies and their implications for society The authors discuss the opportunities and problems involved describe current techniques and attempt to project some of the economic environmental and institutional impacts of those techniques The issues they raise go beyond those of technology utility and economic feasibility As we gain the ability to manipulate life we must face basic questions of just what life means and how far we can reasonably and safely allow ourselves to go School Library Journal ,1990-07 From the World Wide Web to September 11 Patricia Levy,Sean Sheehan,2006 The two events that define the years between the early 1990s and 2001 the World Wide Web and the attacks on New York and Washington D C on September 11 were both unthinkable at the beginning of that century Find out more in this thought provoking title **Society's Choices** Committee on the Social and Ethical Impacts of Developments in Biomedicine,Institute of Medicine,1995-03-13 Breakthroughs in biomedicine often lead to new life giving treatments but may also raise troubling even life and death quandaries Society s Choices discusses ways for people to handle today s bioethics issues in the context of America s unique history and culture and from the perspectives of various interest groups The book explores how Americans have grappled with specific aspects of bioethics through commission deliberations programs by organizations and other mechanisms and identifies criteria for evaluating the outcomes of these efforts The committee offers recommendations on the role of government and professional societies the function of commissions and institutional review boards and bioethics in health professional education and research The volume includes a series of 12 superb background papers on public moral discourse mechanisms for handling social and ethical dilemmas and other specific areas of controversy by well known experts Ronald Bayer Martin Benjamin Dan W Brock Baruch A Brody H Alta Charo Lawrence Gostin Bradford H Gray Kathi E Hanna Elizabeth Heitman Thomas Nagel Steven Shapin and Charles M Swezey

The Twenty-first Century Confronts Its Gods David J. Hawkin, 2012-02-01 This book penetrates the assumptions of Western technological society and exposes the powers that govern it The contributors argue that it is a mistake to think that religion and belief have been relegated to the private sphere and are no longer important in the public and political domains They assert that the twenty first century has a set of new gods the powers of globalization technology the market and military might that reign alongside those of traditional religions These are the forces to which the modern era has granted ultimacy This book looks at how major religions such as Christianity Islam Judaism Hinduism and Buddhism play an important role in politics and society on both the global and local levels The new gods of technology globalization and war are shown to exacerbate the existing cultural divisions and religious strife that mark our time By understanding the importance of that which is held sacred whether traditional belief or modern practice not acknowledged as belief the contributors help us to comprehend our present situation and challenges

Women and Prenatal Testing Karen H. Rothenberg, Elizabeth Jean Thomson, 1994 For pregnant women in the 1990s technological developments have ushered in new and expanding reproductive genetic testing options Some herald these procedures as advances providing women with previously unavailable information about their pregnancies Others contend that with this surge of information come increasing and perhaps unwarranted obligations while some women have greater knowledge about their pregnancies they also face far more complex decisions and a greater pressure to do as much as is technologically possible to ensure the birth of a healthy child This book focuses on the major women s issues surrounding the development and application of reproductive genetic testing Although much has been written about the biological safety and efficacy of these technologies few publications have addressed their psychological sociocultural ethical legal and political impact on women and their experience of pregnancy The first of three sections provides the contextual framework in which the debate should be analyzed The second section sets forth the philosophical foundations and complex ethical and legal questions that need to be addressed and the final section delineates a variety of perspectives on the psychological and sociocultural issues raised by reproductive genetic testing These fourteen essays on the cutting edge of the debate are essential reading for anyone interested in women s studies human genetics health law and bioethics and prenatal care providers

Genetic Technology and Food Safety Roland Norer, 2015-12-17 The volume gives an overview on how legislators all over the world have come up with different legal solutions for governing genetically modified organisms GMOs and food security and provides a compact summary of the existing regulations in this field In a comparative legal approach a general report analyses and compares these various national and supranational legal systems It closely follows the newest developments at the interface between genetic engineering law and food law The emergence of a new technology usually leads to fundamental questions as to how the law

should respond to it The regulation of genetically modified organisms is a prime example they have been discussed controversially ever since they were subject of legislation and regulation In particular this applies to the use of GMOs in food production There is a variety of interesting legislations and a differentiated width of legal frameworks on international supranational EU and national level to be found The different regulations that thereby came to light are evidence of the various opinions and policies the societies and states have developed on this matter It is this variety of regulations the volume examines primarily on the basis of national reports that were handed in concerning the topic of genetic technology and food security at the occasion of the XIX International Congress of Comparative Law

The Political Geographies of Pregnancy Laura R. Woliver, 2010-10-01 A searing study of how modern reproductive politics shapes women's bodily agency Pregnancy indisputably takes place within a woman's body But as reproductive power finds its way into the hands of medical professionals lobbyists and policymakers the geographies of pregnancy are shifting and the boundaries need to be redrawn argues Laura R Woliver The Political Geographies of Pregnancy is a vigorous analysis of the ways modern reproductive politics are shaped by long standing debates on abortion and adoption surrogacy arrangements new reproductive technologies medical surveillance and the mapping of the human genome Across a politically charged backdrop of reproductive issues Woliver exposes strategies that claim to uphold the best interests of children families and women but in reality complicate women's struggles to have control over their own bodies Utilizing feminist standpoint theory and promoting a feminist ethic of care Woliver looks at abortion politics modern adoption laws that cater to male headed families regulations that allow the state to monitor pregnant women but not always provide care for them and the power structures behind the seemingly benign world of egg selling and surrogate parenting She also considers the potentially staggering political implications of mapping the human genome and the exclusion of women's perspectives in discussions about legislation and advancements in reproductive technologies

Facing Ethical Issues Patrick T. McCormick and Russell B. Connors, Jr., In depth explorations of five contemporary issues in Christian ethics using case studies Used along with the authors Character Choices Community readers have the perfect combination to make moral theology come alive

Feminism Confronts Technology Judy Wajcman, 1991 In the first major study of its kind Judy Wajcman challenges the common assumption that technology is gender neutral and analyzes its influence on the lives of women Does technology liberate women and encourage equality or are the new technologies reinforcing sexual divisions in society Does the problem lie in men's monopoly of technology or is technology itself in some sense inherently patriarchal To answer these questions Judy Wajcman explores what the impact of technology is on the lives of women today Popular stereotypes depict women as technologically incompetent or invisible in technical spheres Wajcman argues that the identification between men and machines is not immutable but is the result of ideological and cultural processes She surveys sociological and feminist literature on technology highlighting the male bias in the way technology is defined as well as developed Over the last two

decades feminists have identified men's monopoly on technology as an important source of their power women's lack of technological skills as an important element in their dependence on men During this period women's efforts to control their fertility have extended from abortion and contraception to mobilizing around the new reproductive technologies At the same time there has been a proliferation of new technologies in the home and in the workplace The political struggles emerging around reproductive technology as well as the technologies affecting domestic work paid labor and the built environment are the focus of this book

Genetic Engineering, Evolution of a Technological Issue, Supplemental Report I, Report Prepared for the Subcommittee on Science, Research, and Development Of..., Dec. 1974 United States. Congress. House. Science and Astronautics Committee, 1974

Policing Pregnancy Sheena Meredith, 2016-12-05 Are pregnant women entitled to the same rights of self determination and bodily integrity as other adults This is the fundamental question underlying recent high profile legal interventions in situations when pregnant women and healthcare staff do not agree on management options or appropriate behaviour Courts on both sides of the Atlantic have sometimes answered that they are not and the law has at times been manipulated to enforce compliance with medical recommendations This is the first book of its kind to offer a comprehensive assessment of healthcare law as applied to the unique situation of pregnancy Drawing on case material from both the UK and the USA it describes the trend towards policing pregnancy and explores the emergence of the concept of maternal foetal conflict and why in the author's view this would be more appropriately labelled obstetric conflict Suggestions are made for alternative approaches that better safeguard the overall well being of pregnant women and their future children
