Chemistry Success Volume 2 is a concise and accessible textbook that covers the critical information a student needs to understand the basic mathematics used in chemistry courses. The book provides easy to understand step by step instructions for solving general chemistry problems. The book begins with chapters dedicated to solutions, kinetics, and liquids, solids, and phase changes. In subsequent chapters, the text covers important topics like equilibrium, concentrations, strong and weak acids and bases, the Common Ion Effect, and reaction mechanisms. It also covers the equilibrium between a solid and its respective ions in a solution as well as the second law of Thermodynamics. The text also addresses Gibbs Free Energy, equilibrium constants, and electrolysis calculations. Each chapter contains sample problems and practice problems to help further understanding of how math and chemistry go hand in hand. The Answer Key is an excellent resource for any undergraduate course that deals with the basic concepts of general chemistry.

Rachel Turoscy earned her B S M S and Ph D in chemistry from Lehigh University. She is an associate professor of chemistry at Middlesex County College. *Toward a Unified Theory of Problem Solving* Mike U. Smith, 2012-11-12 One of the most active fields of educational research in recent years has been the investigation of problem solving performance Two opposing views of current research one suggesting that there are more differences than similarities within different domains and the other stating that there is great similarity lead to a variety of questions Is problem solving a single construct Are there aspects of problem solving performance that are similar across a variety of content domains What problem solving skills learned within one context can be expected to transfer to other domains The purpose of this book is to serve as the basis for the productive exchange of information that will help to answer these questions by drawing together preliminary theoretical understandings sparking debate and disagreement raising new questions and directions and perhaps developing new world views      **Survival Guide to General Chemistry** Patrick E.
