General Dynamics F 111:

General Dynamics F-111 'Aardvark' AM Thornborough, Anthony M. Thornborough, 2010-07-29 The iconic General Dynamics F 111 Aardvark a medium range interdicator tactical strike strategic bomber reconnaissance and electronic warfare aircraft was one of the more controversial jets ever to fly Yet despite its inauspicious beginnings it became a highly effective under the radar bomber As a result of a poorly planned development specification both the Navy and Air Force were committed much against their will to a Tactical Fighter Experimental TFX program which called for a single aircraft the F 111 to fulfill both a Navy fleet defense interceptor requirement and an Air Force supersonic strike aircraft requirement This was impossible to achieve especially since planners placed priority upon the Air Force requirement and then tried to tailor this heavy aircraft to the constraints of carrier based naval operations The abortive naval aircraft the F 111B was never placed in production whilst the Air Force aircraft which was produced in a variety of models had numerous problems and only the F 111F actually fulfilled the original TFX design specification This was less the fault of General Dynamics than that of the civilian planners in the Pentagon whose cost effective inclinations produced the major aeronautical fiasco of the 1960s and a costly one at that Acclaimed author Anthony M Thornborough brings the entire F 111 story into one Datafile looking in depth at all of the variants of the F 111 its difficult birth its poor combat debut in the Vietnam War and its final maturity into a potent weapons delivery system This new work will include hitherto unpublished photographs technical diagrams and color profiles which tell the whole story of this incredible machine *General Dynamics F-111 Aardvark* Miller, **General Dynamics F-111 Aardvark** Peter E. Davies, 2013-10-20 Despite its uncertain start the F 111 proved to be one of the most successful and influential designs of the 1960s Its radical swing wing was adopted by the F 14 Tomcat Panavia Tornado and Rockwell B 1B Lancer while its turbofan type engines became standard in many combat aircraft F 111 crews pioneered tactics using terrain following and laser targeting devices that made the F 15E Eagle s missions possible Its 4 000 low altitude penetration missions during Operation Linebacker in Vietnam showed how individual aircraft can deliver crippling blows to enemy capability without loss to themselves The first Osprey book on the subject Peter Davies volume charts the history of this aircraft type in the wake of its retirement of the F 111 from Australian service F-111 Aardvark John Gourley, 2021-02-28 The General Dynamics F 111 was one of aviation history s most promising planes when it came out in the early 1960s Despite a rocky service career political changes in how the military acquired its weaponry and the addition of too much new technology the plane provided a credible frontline deterrent to NATO in the Cold War era and was used to great effect in the Vietnam War and Operation Desert Storm Many of the challenges faced by putting the F 111 with all of its new systems into service are now accepted as a normal outfit in modern fighter aircraft The F 111 had a lot of bad publicity but in the end the F 111 did its job extremely well Although the Navy did not accept the F 111B model the Grumman F 14 Tomcat became a success resulting in large part from the F 111B experience and tests it did accomplish with the radar and missile

Davies,2014-02-20 The General Dynamics F 111 was one of the most technically innovative designs among military aircraft introducing the variable sweep wing terrain following radar military rated afterburning turbofan engines and a self contained escape module among other features Designed as a cost saving multi role interceptor naval fighter and strike bomber its evolution prioritised the latter role and it became the USAF s most effective long range strike aircraft during three decades of service Rushed into combat in Vietnam before some of its structural issues were fully understood the type suffered several early losses and gained an unfairly negative reputation that dogged it for the rest of its career and restricted funding for more advanced versions of the design However in Operation Linebacker in 1972 the F 111 flew 4000 nocturnal under the radar missions delivering with unprecedented accuracy many decisive blows that would have resulted in heavy losses for any other attack aircraft

the company had little recent experience in building carrier borne aircraft and turned to Grumman as a subcontractor for the assembly and testing of the Navy planes The F 111 itself the first production variable wing geometry aircraft would have a remarkable 30 year service history During that time the aircraft was produced in five models and modified and rebuilt into three additional models Illustrated with over 200 color and b w photos **Persian Gulf War Encyclopedia** Spencer C. Congressional Record United States. Congress,1967 **Aircraft of The Royal Australian Air Force** Air Force History Branch,2021-06-01 Aircraft of The Royal Australian Air Force tells the story of the RAAF s first one hundred years by describing the acquisition operation and service record of the multitude of aircraft types flown by the RAAF The 176 aircraft types include the flimsy wood and canvas aircraft typical of World War I through the technological advances during and after World War II to modern fifth generation complex aircraft like the F 35 Lightning II Even before its formation Sir Richard Williams the Father of the RAAF had decided to employ an alpha numeric numbering system to identify and account for each aircraft in service This system started with A1 A2 A3 etc as each type of aircraft came into service Each individual aircraft within each series was identified as A1 1 A1 2 and so on and the aircraft serial became known colloquially as the A number With some exceptions over the century since the A number system started aircraft entered RAAF service in broadly the sequence of the A numbers and so this book is intended to assist in charting the 100 year history of the RAAF by listing aircraft operated in A number sequence rather than by listing them by role such as Fighter Bomber Maritime Trainer Transport etc or alphabetically by name or by manufacturer The inclusion of a comprehensive Index and the Quick Reference Guide to aircraft by role is intended to facilitate the location of the entry for any specific type of aircraft for those who may not already know its A number Aircraft of The Royal Australian Air Force is a must have for all those who have served in the

RAAF those with a passion for military aviation and aircraft in general and the broader members of the public wishing to gain an appreciation of the Royal Australian Air Force in its centenary year
